It can be said that our Sharing-and-Visibility-Architect study materials are the most powerful in the market at present, not only because our company is leader of other companies, but also because we have loyal users. Sharing-and-Visibility-Architect study materials are not only the domestic market, but also the international high-end market. We are studying some learning models suitable for high-end users. Our research materials have many advantages. Now, I will briefly introduce some details about our Sharing-and-Visibility-Architect Study Materials for your reference.

To prepare for the Salesforce Certified Sharing and Visibility Architect exam, candidates can take the Salesforce Sharing-and-Visibility-Architect certification course. This course covers all the topics included in the exam and provides hands-on experience in implementing security and sharing models in Salesforce. Candidates can also access online resources such as practice exams, study guides, and video tutorials to help them prepare for the exam.

Salesforce Certified Sharing and Visibility Architect certification is designed for architects who have extensive knowledge of Salesforce security and sharing models. Sharing-and-Visibility-Architect Exam covers topics such as data security, data sharing, user access, and record-level security. Candidates for this certification must have a deep understanding of Salesforce security best practices and have hands-on experience in implementing security and sharing models.

Sharing-and-Visibility-Architect Actualtest | Definitely Pass | Refund Gurarnteed

Life is beset with all different obstacles that are not easily overcome. For instance, Sharing-and-Visibility-Architect exams may be insurmountable barriers for the majority of population. However, with the help of our exam test, exams are no longer problems for you. The reason why our Sharing-and-Visibility-Architect Training Materials outweigh other study prep can be attributed to three aspects, namely free renewal in one year, immediate download after payment and simulation for the software version.

As a Salesforce Certified Sharing and Visibility Architect, you will be able to design and implement sharing and visibility solutions that align with your organization's business requirements. You will learn how to create sharing rules, permission sets, and role hierarchies to control access to data and metadata in Salesforce. You will also be able to design and implement complex security models that provide granular control over data access based on user roles and profiles.

Salesforce Certified Sharing and Visibility Architect Sample Questions (Q70-Q75):

NEW QUESTION # 70

What is the best practice for testing sharing and visibility changes?

- A. Use Administrative and User reports to view the Active Users.
- B. Use Field Audit Trail to audit the field meta-data and visibility.
- C. Use the Sharing button to test Profile and Permission set changes.
- **D. Use the Login As feature for a sample user in each role and profile.**

Answer: D

Explanation:

Explanation

The best practice for testing sharing and visibility changes is to use the login as feature for a sample user in each role and profile. This allows the tester to see exactly what the user can see and do in the org, and verify that the sharing settings are working as expected. The other options are either not comprehensive or not relevant.

NEW QUESTION # 71

A sales rep (John) at Universal Containers (UC) requested to update information in an account record where he has READ only access. John requested the EDIT access permission from the owner of the record (Paul). Paul manually shared the record with John. Assuming the OWD of the Account object is Public Read-Only, what is the impact in the system?

- A. Existing AccountShare record is updated. Row Cause is "Owner" and User/Group is "John".
- **B. New AccountShare record is created. Row Cause is "Manual" and Access Level is "Read/Write".**
- C. Existing AccountShare record is updated. Row Cause is "Manual" and Access Level is "Read/Write".
- D. New AccountShare record is created. Row Cause is "Owner" and Access Level is "Full".

Answer: B

NEW QUESTION # 72

Sales executives at Universal Containers (SC) want to create list views to filter opportunities for large at-risk Opportunities. These list views should only be available to certain executives that specialize in closing problematic deals. How can UC solve this requirement?

- A. Share the List Views with the appropriate Queue.
- **B. Share the List Views with the appropriate Public Group.**
- C. Share the List Views with the appropriate individual users.
- D. Share the List Views with the appropriate Role in the Role Hierarchy.

Answer: B

NEW QUESTION # 73

Which two reasons should the Architect consider regarding the use of Apex Sharing Reasons?
Choose 2 answers

- A. Ensuring the developer can more easily troubleshoot programmatic sharing.
- B. Ensuring the Share record is deleted upon ownership change.
- C. Ensuring there is additional criteria available for Criteria-Based Sharing.
- D. Ensuring the Share record is not deleted upon ownership change.

Answer: A,D

NEW QUESTION # 74

Universal Containers wants to create a way to store sensitive Invoice Data in Salesforce. A User who owns an Account should not see every Invoice, but only invoices that they or their subordinates own. Which two features should be considered during this solution implementation?
Choose 2 answers.

- A. Ensure that the Organization-Wide Default sharing for Invoices is set to Private.
- B. Deploy the Relationship between Accounts and the Invoices Object as Lookup.
- C. Create a Workflow that populates the Invoice sharing object upon Insert.
- D. Deploy the Relationship between Accounts and the Invoices Object as Master-Detail.

Answer: A,D

Explanation:

Explanation

To store sensitive invoice data in Salesforce, the architect should consider using a master-detail relationship between accounts and invoices, and setting the organization-wide default sharing for invoices to private. This would ensure that only the owners of the invoices and their subordinates can see them, and that the invoices inherit the sharing settings of the accounts. A workflow that populates the invoice sharing object upon insert is not necessary if the master-detail relationship is used. A lookup relationship between accounts and invoices would not enforce the same level of security and visibility as a master-detail relationship.
