Microsoft AI Business Professional Sample Questions (Q33-Q38):

NEW QUESTION # 33

Select the answer that correctly completes the sentence.

Answer:

Explanation:

NEW QUESTION # 34

You join an internal Microsoft Teams meeting late and want to catch up on what you missed. The meeting is being recorded. You need to summarize the portion of the meeting that you missed as soon as possible.

What is the best approach to achieve the goal? More than one answer choice may achieve the goal. Select the BEST answer.

- A. From the Teams app, view the intelligent recap.
- B. From the Microsoft 365 Copilot app, ask Copilot to tell you what you missed.
- C. From the meeting, read the transcript.
- D. From the Teams app, ask Copilot in Teams to summarize what you missed so far.

Answer: D

Explanation:

Microsoft 365 Copilot in Teams is designed to provide real-time meeting assistance, including summarizing discussions, identifying key decisions, and highlighting action items. When joining a meeting late, the most efficient and immediate method to catch up is to directly prompt Copilot within the Teams meeting experience.

Option A is the best answer because Copilot in Teams can summarize what has occurred so far during the live meeting. It leverages the meeting transcript, speaker attribution, and contextual signals to generate a concise, structured summary in real time. This minimizes delay and provides actionable insights instantly.

Reading the transcript (Option B) would require manual review and is not the fastest method. Intelligent recap (Option D) is typically available after the meeting concludes and processes recording data. Asking Copilot from the separate Microsoft 365 Copilot app (Option C) may not provide immediate, in-meeting contextual awareness.

Therefore, the fastest and most effective approach is to ask Copilot in Teams to summarize what you missed.

NEW QUESTION # 35

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION # 36

You sign in to the Microsoft 365 Copilot app by using your work account as shown in the following exhibit

A colleague tells you that when they open the Microsoft 365 Copilot app, they have access to the Researcher agent. You need to access to the Researcher agent.

What should you do?

- A. Select Explore agents and then search for Researcher.
- B. Request a Microsoft 365 Copilot license from an administrator.
- C. Sign in to the Copilot app by using a personal account
- D. From Microsoft Edge, use your work account to sign in to <https://copilot.microsoft.com>

Answer: A

Explanation:

In Microsoft 365 Copilot, agents such as Researcher are accessed through the Agents experience within the Copilot app. If the user interface does not immediately display a specific agent, the correct action is to browse or search the available agents catalog. The exhibit shows the left navigation pane with an Explore agents option.

According to Microsoft AI Business Professional guidance, built-in and custom agents can be discovered and enabled through the Explore agents section. If the user already has the appropriate Copilot license and is signed in with their work account, there is no need to switch accounts or request another license.

Signing in through a browser does not change feature availability, and using a personal account would remove access to organizational features. Therefore, to access the Researcher agent, you should select Explore agents and search for Researcher.

NEW QUESTION # 37

Select the answer that correctly completes the sentence.

Answer:

Explanation:

NEW QUESTION # 38

.....

BootcampPDF provides exam dumps designed by experts to ensure that the candidates' success. This means that there is no need to worry about your results since everything AB-730 exam dumps are verified and updated by professionals. Microsoft AB-730
