In the same way, PDFTorrent provides a free demo before you purchase so that you may know the quality of the AD0-E725 dumps. Similarly, the Adobe AD0-E725 practice test creates an actual exam scenario on each and every step so that you may be well prepared before your actual AD0-E725 examination time. Hence, it saves you time and money. PDFTorrent provides three months of free updates if you purchase the Adobe AD0-E725 questions and the content of the examination changes after that.

### Adobe Commerce Developer Expert Sample Questions (Q37-Q42):

#### NEW QUESTION # 37

A client reports an issue with indexers that are failing and remain stuck. The client asks a Developer to solve this issue. What recommended solution should the Developer use?

- A. Run `bin/magento indexer:set-mode realtime <indexer_list>`.
- B. In `app/etc/env.php` `indexer_sync_mode -> false` under `indexer` node.
- C. Create a cronjob that runs `bin/magento indexer:reindex` periodically.

**Answer: B**

#### NEW QUESTION # 38

A Developer is writing an integration test. The particular functionality being tested has many admin area configurations that need to be tested.

Which DocBlock annotation should be used to allow configuration settings to be manipulated for testing purposes?

- A. `@testAdminArea`
- B. `@testConfigFixture`
- C. `@testAdminConfigFixture`

**Answer: B**

#### NEW QUESTION # 39

A recent client-reported bug is fixed by the Adobe Commerce community. The Adobe engineering team has not yet released the patch or committed the bug fix to GitHub. A Developer acquires the custom patch and releases it to their Adobe Commerce environments.

What are the recommended steps the Developer should follow to implement the custom patch for the bug fix?

- A. Install the cweagans/composer-patches module and edit the composer.json file to apply the custom patch.
- B. Install only official patches supplied by them to maintain upgradability.
- C. Update the quality-patches module and list the required patch in the magento-ce-patch.yaml file.

**Answer: A**

Explanation:

If a bug fix patch has not yet been officially released by Adobe (via Quality Patches Tool (QPT)), developers can apply custom patches using the cweagans/composer-patches package.

Option A is best practice in general, but in urgent scenarios, custom patches are allowed.

Option B applies only for official Adobe patches distributed via QPT, not for community-supplied or custom fixes.

Option C is correct: cweagans/composer-patches allows applying custom patches via composer.json until an official fix is available.

#### NEW QUESTION # 40

A customer wants to create a set of CMS blocks to be used on their website but does not wish to create these manually. An Adobe Commerce Developer is tasked to install the CMS blocks programmatically.

How should the Developer achieve this?

- A. Implement the InstallSchemaInterface, then use the block repository in the execute() function to create the blocks.
- B. Implement the SchemaSetupInterface, then use the block repository in the apply() function to create the blocks.
- C. Implement the DataPatchInterface, then use the block repository in the apply() function to create the blocks.

**Answer: C**

Explanation:

The correct approach for creating CMS blocks programmatically is to use a Data Patch (DataPatchInterface).

Data Patches are used for creating or modifying data programmatically (e.g., CMS blocks, CMS pages, configuration values).

InstallSchemaInterface (B) and SchemaSetupInterface (C) are used for modifying database schema, not data.

#### NEW QUESTION # 41

A Developer is writing an integration test. The functionality being tested has many admin area configurations that need to be tested. Which DocBlock annotation should be used to allow configuration settings to be manipulated for testing purposes?

- A. @testAdminArea
- B. @testConfigFixture
- C. @testAdminConfigFixture

**Answer: B**

Explanation:

The correct annotation is @testConfigFixture. It allows developers to set or override configuration values during tests.

A does not exist.

B does not exist.

C is correct: @testConfigFixture provides a way to programmatically adjust admin configurations for the scope of the test.
