## Oracle Data Platform 2025 Foundations Associate Sample Questions (Q28-Q33):

### NEW QUESTION # 28

A customer wants to use Oracle Cloud Infrastructure (OCI) for storing application backups which can be stored for months, but retrieved immediately based on business needs. Which OCI storage service can be used to meet this requirement?

- A. Archive Storage
- **B. Object Storage (standard)**
- C. File Storage
- D. Block Volume

**Answer: B**

Explanation:

For storing application backups that need to be "stored for months, but retrieved immediately," "Object Storage (standard)" (A) is the suitable OCI service. Standard Object Storage offers durable, scalable storage with immediate access, ideal for backups requiring quick retrieval. "Archive Storage" (B) is cheaper but has retrieval delays, unsuitable for immediate access. "File Storage" (C) is for shared file systems, and "Block Volume" (D) is for high-performance attached storage, both less suited for long-term backups. Oracle's OCI Storage documentation confirms Standard Object Storage for this use case.

### NEW QUESTION # 29

Which are the capabilities of Oracle Autonomous Database that can accelerate innovation? (Choose 3)

- A. Provisions a data warehouse in seconds
- **B. Built-in AI and ML helps find patterns that could identify undiscovered anomalies**
- **C. Scaling of CPUs with very little downtime**
- **D. Instant scaling of storage**

**Answer: B,C,D**

Explanation:

"Oracle Autonomous Database" accelerates innovation with: "Scaling of CPUs with very little downtime" (A), enabling dynamic performance adjustments online; "Built-in AI and ML helps find patterns that could identify undiscovered anomalies" (B), leveraging in-database machine learning; and "Instant scaling of storage" (C), providing flexibility without interruption. "Provisions a data warehouse in seconds" (D) is true but more a setup feature than an ongoing innovation driver. Oracle's documentation emphasizes these capabilities for rapid development and insights.

### NEW QUESTION # 30

Which workload CANNOT be run on Oracle Database 19c?

- **A. Hadoop Clusters**
- B. Translytical
- C. Gaming
- D. Machine Learning

**Answer: A**

Explanation:

"Oracle Database 19c" supports "Machine Learning" (A) via in-database algorithms, "Translytical" (B) workloads combining transactional and analytical processing, and "Gaming" (C) through high-performance transaction support. However, "Hadoop Clusters" (D) cannot run directly on 19c, as Hadoop is a distributed framework requiring a separate ecosystem (e.g., Oracle Big Data Service), not a workload natively supported within the database engine. Oracle's 19c documentation details its converged database capabilities, excluding Hadoop as a direct workload.

### NEW QUESTION # 31

Which ADB tool can you use to discover anomalies, outliers, and hidden patterns in your data?

- A. Data Transforms
- B. Catalog
- C. Data Load
- **D. Data Insights**

**Answer: D**

Explanation:

In the Autonomous Database (ADB), "Data Insights" (B) is the tool to discover anomalies, outliers, and hidden patterns, leveraging built-in AI and ML capabilities to analyze data. "Data Load" (A) is for importing data, "Data Transforms" (C) is for data preparation, and "Catalog" (D) is for metadata (OCI Data Catalog). Oracle's documentation identifies Data Insights for pattern detection.

### NEW QUESTION # 32

Which two statements are true when deciding which Oracle Cloud Infrastructure (OCI) region to register an Exadata Cloud@Customer infrastructure in?

- **A. Consider any business policies or regulations that preclude the use of a particular region**
- B. Exadata Cloud@Customer is hosted in a customer data center so the Exadata infrastructure is not registered in an OCI region
- **C. Consider the physical proximity of the region you register the infrastructure into your data center**
- D. The Exadata Cloud@Customer region can be changed after the infrastructure is created

**Answer: A,C**

Explanation:

When registering "Exadata Cloud@Customer" in an OCI region, you must "consider any business policies or regulations that preclude the use of a particular region" (A), as compliance (e.g., data residency laws) dictates region selection. You should also "consider the physical proximity of the region you register the infrastructure into your data center" (D), as proximity reduces latency for control plane interactions. Option B is false because, despite being hosted on-premises, Exadata Cloud@Customer is registered in an OCI region for management. Option C is incorrect, as the region cannot be changed post-creation without significant reconfiguration. Oracle's documentation highlights these considerations for region selection.
