如果你還在為通過 Juniper的JN0-253考試認證而拼命的努力補習，準備考試。那你久大錯特錯了，努力的學習當然也可以通過考試，不過不一定能達到預期的效果。現在是互聯網時代，通過認證的成功捷徑比比皆是， KaoGuTi Juniper的JN0-253考試培訓資料就是一個很好的培訓資料，它針對性強，而且保證通過考試，這種培訓資料不僅價格合理，而且節省你大量的時間。你可以利用你剩下的時間來做更多的事情。這樣就達到了事半功倍的效果。

Juniper JN0-253 考試大綱：

主題	簡介
主題 1	<ul style="list-style-type: none">Juniper Mist Monitoring and Analytics: This domain focuses on monitoring tools including service-level expectations, packet captures, AI-driven insights, automated alerts, and audit logs for comprehensive network visibility.
主題 2	<ul style="list-style-type: none">Juniper Mist Cloud Operations: This domain covers three API types (RESTful, WebSocket, Webhook) for programmatic integration, plus support resources including ticketing systems and documentation.
主題 3	<ul style="list-style-type: none">Juniper Mist Cloud Fundamentals: This domain covers Juniper's cloud-native platform architecture, focusing on AI and machine learning capabilities for intelligent network management and real-world deployment scenarios.
主題 4	<ul style="list-style-type: none">Juniper Mist Network Operations and Management: This domain examines operational features across Wi-Fi, Wired, WAN, Routing, and Access Assurance, delivering specialized management capabilities for different network infrastructure layers.
主題 5	<ul style="list-style-type: none">Location-based Services: This domain presents virtual Bluetooth Low Energy capabilities for asset tracking, visibility, and location-aware experiences that extend networking into physical space management.

準備充分的JN0-253最新考題和資格考試領導者和可信賴的JN0-253參考資料

Juniper JN0-253是IT專業人士的首選，特別是那些想晉升的IT職員。Juniper的JN0-253是一個可以給你的職業生涯帶來重大影響的考試，而獲得JN0-253認證是作為IT職業發展的有力保證。JN0-253考古題已經幫助了成千上萬的考生獲得成功，這是一個高品質的題庫資料。我們提供給您最近更新的JN0-253題庫資料，來確保您通過認證考試，如果您一次沒有通過考試，我們將給您100%的退款保證。

問題 #16

Which two Juniper devices are used in Juniper Mist WAN Assurance? (Choose two.)

- **A. SRX Series Firewalls**
- **B. Session Smart Routers**
- C. QFX Series Switches
- D. EX Series Switches

答案: **A,B**

解題說明:

Juniper Mist WAN Assurance is a cloud-based service that extends Mist AI capabilities to the WAN edge, providing visibility, automation, and AI-driven analytics for WAN devices. It focuses on ensuring end-to-end service assurance for users and applications across distributed networks.

According to the Juniper Mist WAN Assurance and SD-WAN Deployment Guide, the supported devices include:

"Juniper SRX Series Firewalls and Session Smart Routers (SSR) are integrated with Mist WAN Assurance for telemetry collection, service-level monitoring, and AI-driven troubleshooting."

* SRX Series Firewalls (A): Provide secure WAN connectivity and send real-time telemetry (including throughput, latency, and packet loss metrics) to Mist Cloud.

* Session Smart Routers (C): Power the AI-driven SD-WAN solution with application-aware routing and session intelligence, fully integrated into Mist Cloud for advanced visibility and analytics.

EX and QFX switches are used with Wired Assurance, not WAN Assurance.

Therefore, the correct answers are A. SRX Series Firewalls and C. Session Smart Routers.

問題 #17

You are asked to configure a site in Juniper Mist.

Which statement describes completing this step?

- A. You must first configure the country, time zone, and location at the organization level.
- **B. You must configure the site within your organization.**
- C. You must claim your site by scanning the access point's QR code.
- D. You must define your organization within the site.

答案: **B**

解題說明:

You must configure the site within your organization-this is the correct process according to Juniper Mist's official configuration guides. When setting up a deployment, first an organization is created in the Mist cloud.

Within this organization, sites are added for each physical location. The Mist documentation says: "You can create Sites in the Juniper Mist portal from the Organization > Site Configuration menu. Add or update sites as needed." The configuration requires the site name, country, and location to be set at the site level-not the organization level. Claiming APs via QR codes and organization definition are separate steps in device onboarding and initial setup.

問題 #18

Under which category would you identify bad cables using Marvis Actions?

- A. Layer 1
- B. Connectivity
- C. security
- D. Clients

答案： A

解題說明：

Bad cables are identified under the Layer 1 category within Marvis Actions. Juniper Mist's documentation states: "Use the Actions dashboard to resolve Layer 1 issues. When you click the Layer 1 button on the Action dashboard, all available Layer 1 actions appear. This category currently contains only one action: bad cable." Marvis can detect and alert for bad cables based on frame errors, link statistics, and AP/Switch behavior, all under the Layer 1 category. Connectivity, security, and client issues are handled under their respective action categories, but bad cabling is specifically monitored and detected as a physical (Layer 1) fault. Reference: Layer 1 Actions | Mist, Marvis AI Operations Guide

問題 #19

Which statement is correct about the relationship between Juniper Mist organizations and sites?

- A. One Juniper Mist site can contain multiple organizations.
- B. You must have one Juniper Mist superuser login for each site.
- C. One Juniper Mist organization can contain multiple sites.
- D. A Juniper Mist superuser login grants access to all organizations.

答案： C

解題說明：

According to the official Juniper Mist documentation on the configuration hierarchy, the platform uses a three-tier model: Organization # Site # Device. At the organization level, you manage administrator accounts, subscriptions, and organization-wide settings. Then:

"An organization can include one or more sites. A site can represent a physical location or a logical subdivision of your enterprise or campus." Also, in the simpler case explanation:

"Each customer is created as a separate organization. Within that organization multiple sites can be created." Mist These statements make clear that the correct relationship is: one organization may have multiple sites under it.

The inverse - that a site might contain multiple organizations - is not supported in the documented hierarchy. Therefore option B is correct.

問題 #20

Which three components are used to deploy location-based services? (Choose three.)

- A. SFP
- B. BLE tags
- C. location sensors
- D. compact flash
- E. location engine

答案： B,C,E

解題說明：

To deploy location-based services in Mist, the following components are used:

Location Sensors: These devices capture the location data from BLE tags and other devices.

BLE Tags: These are small devices that emit Bluetooth signals to be picked up by location sensors.

Location Engine: This software processes the data from the sensors and tags to determine precise locations and provide analytics.

問題 #21

.....

你還在猶豫什麼，機不可失，失不再來。現在你就可以獲得Juniper的JN0-253考題的完整本，只要你進KaoGuTi網站就能滿足你這個小小的欲望。你找到了最好的JN0-253考試培訓資料，請你放心使用我們的考題及答案，你一定

會通過的。
