- A. Overview
- B. Risk
- C. List
- D. Security
- E. IPS

Answer: A,B,C

Explanation:

List:

This section allows you to view a detailed list of all logged events, including those related to the OT network incidents, providing a comprehensive overview of activity within the system.

Risk:

By analyzing the risk associated with detected incidents in the OT network, you can identify potential vulnerabilities and prioritize further investigation.

Overview:

The overview section provides a high-level summary of network activity, including alerts, trends, and potential issues, which can help you quickly pinpoint areas of concern within the OT network.

NEW QUESTION # 91

Which three criteria can a FortiGate device use to look for a matching firewall policy to process traffic? (Choose three.)

- A. Lowest to highest policy ID number
- B. Source defined as internet services in the firewall policy
- C. Highest to lowest priority defined in the firewall policy
- D. Services defined in the firewall policy.
- E. Destination defined as internet services in the firewall policy

Answer: C,D,E

Explanation:

The three criteria that a FortiGate device can use to look for a matching firewall policy to process traffic are:

A: Services defined in the firewall policy - FortiGate devices can match firewall policies based on the services defined in the policy, such as HTTP, FTP, or DNS.

D: Destination defined as internet services in the firewall policy - FortiGate devices can also match firewall policies based on the destination of the traffic, including destination IP address, interface, or internet services.

E: Highest to lowest priority defined in the firewall policy - FortiGate devices can prioritize firewall policies based on the priority defined in the policy. The device will process traffic against the policy with the highest priority first and move down the list until it finds a matching policy.
