C_SAC_2501 Exam Score & C_SAC_2501 Exam Questions Pdf

Whether you prefer web-based practice exam, desktop-based exam, or PDF real questions, we've got you covered. We believe that variety is key when it comes to SAP C_SAC_2501 Exam Preparation, and that's why we offer three formats that cater to different learning styles and preferences.

SAP Certified Associate - Data Analyst - SAP Analytics Cloud Sample Questions (Q24-Q29):

NEW QUESTION # 24

Which calculation types include dynamic date options? Note: There are 2 correct answers to this Question.

- **A. Difference From**
- B. Aggregation
- **C. Restricted Measure**
- D. Date Difference

Answer: A,C

NEW QUESTION # 25

You are using a live connection for a model. Where is the data stored?

- A. Embedded data set
- B. Public dataset
- C. SAP Analytics Cloud model
- **D. Source system**

Answer: D

Explanation:

Connections and data preparation

When using a live connection in SAP Analytics Cloud, the data remains stored in the source system. This means that no data is imported or replicated into SAP Analytics Cloud; instead, it is accessed and analyzed in real-time directly from the source system. This approach ensures that the most current data is always used for analysis and that data governance and security policies of the source system remain in control.

Reference:

SAP Analytics Cloud Connection Guide

SAP Analytics Cloud Data Connections - InsightCubes

In the context of SAP Analytics Cloud, when using a live connection to connect to a data source, the data remains stored in the source system. This setup means that SAP Analytics Cloud directly queries the data in its original location, without importing or copying it into the SAP Analytics Cloud environment. This approach is advantageous for several reasons, including maintaining a single source of truth, reducing data redundancy, and ensuring data is always up-to-date without the need for synchronization processes. Live connections are particularly useful for real-time or near-real-time data analysis and reporting, providing insights based on the most current data available without the overhead of data replication.

SAP Analytics Cloud documentation and user guides typically emphasize the benefits and use cases of live connections, highlighting how they maintain data in the source system to ensure real-time data access and analysis.

SAP training materials for Data Analysts using SAP Analytics Cloud, including study guides and official certification resources, explain the technical and practical aspects of live connections, including where data is stored and how it is accessed.

Best practice guides for SAP Analytics Cloud, often available through the SAP Community or SAP Knowledge Base, provide insights and recommendations on setting up and using live connections, reinforcing the concept that data stays in the source system.

NEW QUESTION # 26

To which story elements can you apply conditional formatting? Note: There are 2 correct answers to this question.

- **A. Chart**
- **B. Table**
- C. Lane
- D. Composite

Answer: A,B

Explanation:

In SAP Analytics Cloud stories, conditional formatting can be applied to Table and Chart elements. This feature allows users to visually highlight data points based on specific conditions, such as thresholds, ranges, or comparisons, making it easier to identify trends, outliers, or areas of interest within the data presented in tables and charts.

Reference:

NEW QUESTION # 27

You want to display differences between measures in a chart. What can you use?

- A. Restricted measure
- **B. Variance**
- C. Reference line
- D. Threshold

Answer: B

Explanation:

To display differences between measures in a chart within SAP Analytics Cloud, you can use the Variance feature. Variance helps to highlight the differences or gaps between two data points or measures, making it easier to identify trends, outliers, or areas requiring attention in visual representations like charts.
