Microsoft AB-730 Questions For Guaranteed Success [2026]

Before clients purchase our AI Business Professional test torrent they can download and try out our product freely to see if it is worthy to buy our product. You can visit the pages of our product on the website which provides the demo of our AB-730 study torrent and you can see parts of the titles and the form of our software. On the pages of our AB-730 study tool, you can see the version of the product, the updated time, the quantity of the questions and answers, the characteristics and merits of the product, the price of our product, the discounts to the client, the details and the guarantee of our AB-730 study torrent, the methods to contact us, the evaluations of the client on our product, the related exams and other information about our AI Business Professional test torrent.

Microsoft AI Business Professional Sample Questions (Q27-Q32):

NEW QUESTION # 27

You use Microsoft 365 Copilot.

You regularly upload the same five files to Copilot chats.

You need to simplify referencing the files in the chats.

What are two ways to achieve the goal?

- A. Create an agent that has a knowledge source.
- B. Send a prompt that includes the files, and then save the prompt.
- C. Create a notebook that references the files.
- D. Ask the data engineers to create a fine-tuned model.

- E. Zip the documents and upload the ZIP file to the chats.

Answer: A,C

Explanation:

Microsoft 365 Copilot provides structured ways to persist and reuse knowledge sources to avoid repeatedly uploading the same files.

Creating a notebook that references the five files (Option B) allows those documents to remain attached within a persistent workspace. Copilot can then consistently ground responses in those files without re-uploading them for every conversation.

Creating an agent with a defined knowledge source (Option D) also provides a reusable solution. By configuring the five files as part of the agent's knowledge base, the agent can automatically reference them in future interactions.

Saving a prompt does not persist file attachments. Fine-tuning models is not part of standard Microsoft 365 Copilot user workflows. Uploading a ZIP file does not improve reference management and may reduce accessibility of individual documents.

Therefore, the correct solutions are to create a notebook that references the files and to create an agent with a knowledge source.

NEW QUESTION # 28

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION # 29

You are creating a custom agent in the Microsoft 365 Copilot app for the marketing team at your company. The agent will be used to produce marketing collateral, including copy, logos, and artwork.

What should you add to the agent? More than one answer choice may achieve the goal. Select the BEST answer.

- A. a suggested prompt
- **B. image generator**
- C. a template
- D. code interpreter

Answer: B

Explanation:

When building a custom agent in Microsoft 365 Copilot for marketing use cases, the required capabilities must align with the intended outputs. Marketing collateral includes written copy as well as visual assets such as logos and artwork. According to Microsoft AI Business Professional documentation, generative AI solutions that produce visual creative assets require integrated image generation capabilities powered by multimodal AI models.

Option C is correct because an image generator enables the agent to create visual marketing materials such as logos, artwork, and design elements. While templates and suggested prompts can improve usability and consistency, they do not provide the underlying capability to generate images. A code interpreter is designed for data analysis, calculations, or technical scripting tasks and is not relevant to creative marketing asset production.

Therefore, to fulfill the requirement of producing both textual and visual marketing collateral, the most essential addition to the custom agent is an image generator.

NEW QUESTION # 30

In a Microsoft 365 Copilot conversation, you generate a report, and then edit the report in a page. You need to collaborate with a colleague on the report.

What are two ways to achieve the goal?

- **A. Share the page link.**
- B. Add the page to a notebook.
- **C. @mention the colleague in the page.**
- D. Open the page in Microsoft Word.

Answer: A,C

Explanation:

Microsoft 365 Copilot Pages supports collaboration similarly to other Microsoft 365 documents. Collaboration requires notifying or granting access to colleagues.

Using @mentions within the page (Option A) directly notifies the colleague and facilitates collaborative engagement. Sharing the page link (Option D) allows others to access and edit the content according to permissions. These two methods provide complete collaboration workflows.

Adding the page to a notebook does not grant collaborative access. Opening the page in Word changes the editing surface but does not inherently enable collaboration unless shared.

Therefore, the correct answers are A and D.

NEW QUESTION # 31

You use Microsoft 365 Copilot to generate a training plan.

You need to check if there are any existing training plans in your organization that are similar to the new training plan. What should you use in Copilot?

- A. Pages
- B. Designer
- C. Search
- D. Apps

Answer: C

Explanation:

Microsoft 365 Copilot integrates with Microsoft Search to help users discover relevant content across their organization's Microsoft 365 data estate, including SharePoint, OneDrive, Teams, and Exchange. When the objective is to determine whether similar training plans already exist, the appropriate action is to perform a search across organizational content.

Using Search allows Copilot to query indexed enterprise documents and return files, plans, or related materials that the user has permission to access. This supports content reuse, avoids duplication of work, and aligns with Microsoft's guidance on leveraging organizational knowledge efficiently.

Designer is focused on visual content creation, Apps provides access to Microsoft 365 applications, and Pages is used for creating and organizing content within Copilot. None of these options are intended for discovering existing documents across the tenant. Therefore, to identify similar existing training plans within your organization, the correct tool to use in Copilot is Search.

NEW QUESTION # 32

.....

It is universally accepted that the competition in the labor market has become more and more competitive in the past years. In order to gain some competitive advantages, a growing number of people have tried their best to pass the AB-730 exam.
