Salesforce Certified B2C Commerce Architect Sample Questions (Q12-Q17):

NEW QUESTION # 12

An existing B2C Commerce site has the following aliases configuration:

```

"www.example.com": [
  {
    "locale": "en_US",
    "if-site-path": "us"
  },
  {
    "locale": "de_DE",
    "if-site-path": "de"
  },
  {
    "locale": "en_US",
    "if-site-path": "us"
  },
  {
    "locale": "en_GB",
    "if-site-path": "uk"
  }
],
"www.example.de": [{
  "host": "www.example.com",
  "path": "de"
}],
"www.example.co.uk": [{
  "host": "www.example.com",
  "path": "uk"
}]

```

Which statement related to this configuration is incorrect?

- A. Hostname www.example.de will redirect to www.example.com/de.
- B. Site supports multiple hostnames and locales.
- C. Hostname www.example.co.uk will redirect to www.example.com/uk.
- D. Hostname www.example.com will redirect to www.example.com/us

Answer: D

NEW QUESTION # 13

A client has a single site with multiple domains, locales, and languages. After launch, there is a need for the client to perform offline maintenance. The client would like to show the same maintenance page for each locale.

Which version of aliases,Json file below will accomplish this task?

A)

```

{
  "nto.net": "www.nto.net",
  "nto.eu": "www.nto.eu",
  "nto-europe.eu": "www.nto.eu"
}

```

B)

```

{
  "www.nto.eu": "www.nto.eu"
}

```

C)

```

{
  "nto.eu": "www.nto.eu",
  "nto.at": "www.nto.at",
  "nto.de": "www.nto.de"
}

```

D)

- A. Option C
- B. Option A
- C. Option B
- **D. Option D**

Answer: D

NEW QUESTION # 14

The following promotions are configured with no exclusivity (can be combined with any other promotion) in a - 1 month campaign:

- * Free correct- in -store shipping
- * 20% accessories products discount, applies for all customers
- * \$5 off coupon based discount, sent to a selected group of customers

The combination of above promotions allows customers to get 16 socks for free in store. This was unintended, and the Client If considering disabling the coupon. The Client is concerned about a potential spike in the number of Call Center calls from customers who had the coupon code added to their baskets before it was disabled. As basket lifetime is set to 30 days for all customers, this can continue for the full length of the campaign.

What solutions should the Architect suggest to keep the Call Center calls to a minimum?

- A. Disable the coupon code. Restart the production instance from control Center to clear existing baskets.
- B. Disable the coupon code. Email all the customers to not use the coupon code in their baskets.
- C. Disable the coupon code. Clear the production cache from the Business Manager to clear existing baskets.
- **D. Disable the coupon code. Reduce the basket lifetime in Business Manager to expire some of the existing baskets**

Answer: D

Explanation:

Reducing the basket lifetime is a strategic approach to minimizing the impact of disabling a promotional coupon. This action will cause baskets that may still contain the now-disabled coupon to expire sooner, thereby reducing the potential volume of calls to the Call Center from customers inquiring about the coupon. This method also avoids the drastic measure of clearing all existing baskets or restarting the production instance, which could disrupt user experience and lead to further customer dissatisfaction.

NEW QUESTION # 15

The client provided these business requirements:

- * The B2C Commerce platform will integrate with the client's Order Management System (OMS).
- * The OMS supports Integration us-no legacy RPC style SOAP services.
- * The OMS is hosted on client s infrastructure.

What is the right cartridge folder to place the WSDL provided for the OMS service?

- A. /cartridge/services
- **B. /cartridge/webreferences**
- C. /cartridge/webreferences2
- D. /cartridge

Answer: B

NEW QUESTION # 16

The development team is building a complex LINK cartridge for a hosted checkout solution. The provider s database is used as a single source of truth, but the information in the Basket on B2C Commerce side needs to be synchronized. This is implemented asynchronously the back end when the customers interact will the hosted checkout page and change their shipping/biding details. As an Architect you have to advise the development team with how to implement the logging to ensure that there will be a mechanism available to allow troubleshooting in the case something goes wrong on production.

Which solution should the Architect suggest?

- A. Report info level message for the back-end asynchronous communication between both systems. Report all errors at error level message.
- B. Get logger for cartridge specific category. Report debug level message for the back end asynchronous communication between both systems. Report all errors at error level message.
- C. Report debug level message for the back-end asynchronous communication between both systems. Report all errors at error-level message.
- D. Get logger for cartridge-specific category. Report Info level message for the back-end asynchronous communication between both systems. Report all errors at error level message.

Answer: D
