If you think that time is important to you, try our B2C-Commerce-Architect Learning Materials and it will save you a lot of time.

### Salesforce Certified B2C Commerce Architect Sample Questions (Q44-Q49):

#### NEW QUESTION # 44

Northern Trail Outfitters (NTO) wants to migrate its online shop from a custom ecommerce platform to B2C Commerce. NTO needs to migrate several thousands of customer records profile information, address book). WTO can provide a B2C Commerce feed. It is currently using SHA-256 as an encryption mechanism for the customer passwords. What approach can the Architect propose?

- A. Import the customer records, with the hashed password as a custom attribute, and during the login compare the entered password with the hashed password and save it in the password field.
- B. Import the customer records, excluding the password field, and B2C Commerce will automatically require a password reset the first time a customer logs in to the storefront.
- C. Import the customer records, including the hashed password, as B2C Commerce supports SHA-256, and they will be able to login with their existing password.
- D. Do not import customer records and asks customers to create new accounts the first time they try to log in to the B2C Commerce storefront.

**Answer: A**

#### NEW QUESTION # 45

A company plans to build a new B2C Commerce storefront for a popular segment of products that generate high-volume sales. Their team is evaluating whether B2C Commerce is the right platform to build this storefront, and they are specifically concerned about how quotas and limits directly impact the efficiency and stability of solutions built on the platform. Which two considerations should a Solution Architect keep in mind when considering B2C Commerce Governance and Quotas? Choose 2 answers

- A. Object quotas status is updated with an up to 20-minute delay. Therefore, a Solution Architect must consider this delay when performing calculations related to traffic and limits.
- B. If an enforced quota is exceeded, an exception is thrown, which prevents the current operation from completing. The Solution Architect should design the solution so that the exception can be caught within a customization.
- C. For sandbox instances, quotas can be softened by exporting them from a production instance and importing them onto a sandbox instance. This approach lets Solution Architects match the development environment to the production environment.
- D. Unless a site is experiencing performance issues, the Solution Architect can assume that quota violations have not occurred.

**Answer: A,B**

#### NEW QUESTION # 46

The Client is Growing and decided to migrate its ecommerce website to B2C Commerce. The Client provided the Architect with the metrics for its existing website over the past 12 months and forecasted into the next year:

|                             |         |
|-----------------------------|---------|
| Average visits per hour     | 500     |
| Peak visits per hour        | 1000    |
| Average page views per hour | 10000   |
| Peak page views per hour    | 20000   |
| Average orders per hour     | 100     |
| Peak orders per hour        | 250     |
| Average items per order     | 2.1     |
| Average order value         | 300 USD |
| Expected growth percentage  | 300     |

Noting these historical metrics and the forecasted growth of 300%, which load test targets meet best practices for testing the new B2C Commerce site?

- A. 1500 visits per hour, 30000 page views per hour, and 375 orders per hour
- B. 3000 visits per hour, 60000 page views per hour, and 750 orders per hour
- C. 150000 visits per hour, 3000000 page views per hour, and 37500 orders per hour
- D. 15000 visits per hour, 300000 page views per hour, and 3750 orders per hour

**Answer: A**

#### NEW QUESTION # 47

An Architect is documenting the technical design for a single B2C Commerce storefront. The Client has a business requirement to provide pricing that is customized to specific groups:

- \* 50 different pricing groups of customers
- \* 30 different pricing groups of employees
- \* 10 different pricing groups of vendors

Which items should the Architect include in the design in order to set applicable price books based on these requirements? Choose 2 answers

- A. - One promotion and 50 campaigns for customers  
- One promotion and 30 campaigns for employees  
- One promotion and 10 campaigns for vendors
- B. - 50 customer groups for customers  
- 30 customer groups for employees  
- 10 customer groups for vendors
- C. - One campaign and multiple promotions for each customer group
- D. - One customer group and 50 subgroups for customers  
- One customer group and 30 subgroups for employees  
- One customer group and 10 subgroups for vendors

**Answer: B,D**

#### NEW QUESTION # 48

During discovery, the customer required a feature that is not included in the standard Storefront Reference Architecture (SFRA). In order to save budget, the Architect needs to find the quickest way to implement this feature.

What is the primary resource the Architect should use to search for an existing community implementation of the requested feature?

- A. Salesforce B2C Commerce Documentation
- B. Salesforce Trailblazer Portal
- C. Salesforce Commerce Cloud GitHub repository
- D. Salesforce Commerce Cloud Trailblazer community

**Answer: C**
