VMware 2V0-32.24 Exam Syllabus Topics:

Topic	Details

Topic 1	<ul style="list-style-type: none"> Planning and Designing: This section of the exam measures the skills of Cloud Architects and covers the architectural models and sizing requirements for vRealize Operations and vRealize Log Insight. It evaluates the ability to choose between standalone, clustered, and high-availability setups, and to plan appropriately based on scenario-based requirements for capacity and deployment type, ensuring well-designed cloud solutions.
Topic 2	<ul style="list-style-type: none"> Troubleshooting and Repairing: This section of the exam measures skills of Support Engineers and covers the diagnosis and resolution of common performance and configuration issues in vRealize Operations, Log Insight, and Lifecycle Manager. It also includes cluster management options, log bundle generation, password handling, and changing authentication settings, equipping professionals to ensure system reliability.
Topic 3	<ul style="list-style-type: none"> Installing, Configuring, and Setting Up: This section of the exam measures skills of Implementation Specialists and covers the end-to-end setup process for vRealize Suite Lifecycle Manager, vRealize Operations, and Log Insight. It includes prerequisites, installation steps (manual and automated), identity and access configuration, environment settings, data sources, content packs, and system integrations to enable a functional cloud management platform.

VMware Cloud Operations 8.x Professional V2 Sample Questions (Q16-Q21):

NEW QUESTION # 16

An administrator is deploying vRealize Log Insight and needs to choose the most performant disk format option. Which option should the administrator choose?

- A. Deploy vRealize Log Insight using the Thick Provision Lazy Zeroed disk format.
- B. Deploy vRealize Log Insight using Raw Disk Mapping.
- C. Deploy vRealize Log Insight using the Thick Provision Eager Zeroed disk format.**
- D. Deploy vRealize Log Insight using the Thin Provision disk format.

Answer: C

Explanation:

The most performant disk format for vRealize Log Insight is Thick Provision Eager Zeroed. This format provides better performance because the entire disk is allocated at the time of creation and is immediately zeroed out, which eliminates the overhead of allocating space during runtime and ensures faster read/write operations.

NEW QUESTION # 17

An administrator has been tasked with optimizing capacity and overall performance in their existing virtual infrastructure. How can the capabilities of vRealize Operations help complete this task?

- A. It enforces IT regulatory standards, integrated compliance, and automated drift remediation.
- B. It determines recommendations for oversized and undersized virtual machines.**
- C. It automatically migrates virtual machines into a public cloud.
- D. It adjusts the queue depth for datastores presented by storage arrays.

Answer: B

Explanation:

vRealize Operations provides capacity optimization by analyzing the performance of virtual machines (VMs) in the environment. It identifies recommendations for resizing VMs that are either oversized (underutilized resources) or undersized (resources being overutilized), ensuring more efficient resource allocation. This helps optimize overall capacity and performance in the virtual infrastructure.

NEW QUESTION # 18

An administrator needs to change the password for the admin user account on vRealize Operations. Which two methods can the administrator use to complete this task? (Choose two.)

- A. Log in to the Primary node via SSH and use the appropriate command to reset the admin user account password
- B. Log in to the vRealize Operations admin UI as the admin user, take the cluster offline and use the change password functionality
- C. Log in to vRealize Suite Lifecycle Manager and use the rotate password functionality
- D. Log in to each node via SSH and use the appropriate script to reset the admin user account password
- E. Log in to the vRealize Operations admin UI as the admin user and use the change password functionality

Answer: A,D

Explanation:

To change the password for the admin user account in vRealize Operations, these methods can be used:

Log in to the Primary node via SSH and use the appropriate command to reset the admin user account password: This method allows the administrator to directly reset the admin password on the primary node via SSH using command-line utilities specific to vRealize Operations.

Log in to each node via SSH and use the appropriate script to reset the admin user account password: In a multi-node environment, the password reset might need to be performed on each node using a script to ensure that the new password is applied across all nodes in the cluster.

NEW QUESTION # 19

Which VMware product provides continuous performance optimization, efficient capacity and cost management, intelligent remediation, and integrated compliance as a subscription based service?

- A. vRealize Operations
- B. vRealize Operations Cloud
- C. vRealize Log Insight Cloud
- D. vRealize Log Insight

Answer: B

Explanation:

vRealize Operations Cloud is a subscription-based service that delivers continuous performance optimization, efficient capacity and cost management, intelligent remediation, and integrated compliance. It leverages the cloud to provide these features, which allow organizations to manage and optimize their environments more effectively and with flexibility.

NEW QUESTION # 20

What is the purpose of using Collector Groups in vRealize Operations?

- A. Achieve adapter resiliency when the remote collector experiences network interruption or becomes unavailable.
- B. Expand vRealize Operations cluster capacity by adding more data storage and compute power.
- C. Achieve adapter load distribution by distributing the number of monitored objects across different remote collectors.
- D. Collect and upload environment data to VMware for customer experience improvement.

Answer: C

Explanation:

Collector Groups in vRealize Operations are used to distribute the load of monitored objects across different remote collectors. This helps balance the workload and ensures that no single collector becomes overwhelmed. By distributing the monitoring tasks, Collector Groups improve performance, scalability, and overall efficiency in large environments.
