

DP-700 New Question, Test DP-700 Cram Review

DOWNLOAD the newest BraindumpsPass DP-700 PDF dumps from Cloud Storage for free: https://drive.google.com/open?id=1P5aj08AF3daJAHIB05upZUk9kBud32-_

Our DP-700 study materials cover three versions, they can meet all your needs. You can choose different versions according to your own needs. DP-700 PDF materials are instant access to download, if you like, it can be transformed into a paper version, you can put it into your bags. DP-700 Soft test engine and DP-700 online test engine are also your choice, DP-700 online test engine using the online tool and it can also provide the record for your process, and DP-700 online test engine can practice online anytime. If you have the needs like this, just choose us.

Microsoft DP-700 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> Monitor and optimize an analytics solution: This section of the exam measures the skills of Data Analysts in monitoring various components of analytics solutions in Microsoft Fabric. It focuses on tracking data ingestion, transformation processes, and semantic model refreshes while configuring alerts for error resolution. One skill to be measured is identifying performance bottlenecks in analytics workflows.
Topic 2	<ul style="list-style-type: none"> Implement and manage an analytics solution: This section of the exam measures the skills of Microsoft Data Analysts regarding configuring various workspace settings in Microsoft Fabric. It focuses on setting up Microsoft Fabric workspaces, including Spark and domain workspace configurations, as well as implementing lifecycle management and version control. One skill to be measured is creating deployment pipelines for analytics solutions.
Topic 3	<ul style="list-style-type: none"> Ingest and transform data: This section of the exam measures the skills of Data Engineers that cover designing and implementing data loading patterns. It emphasizes preparing data for loading into dimensional models, handling batch and streaming data ingestion, and transforming data using various methods. A skill to be measured is applying appropriate transformation techniques to ensure data quality.

2026 DP-700 New Question - Trustable Microsoft Implementing Data Engineering Solutions Using Microsoft Fabric - Test DP-700 Cram Review

BraindumpsPass's Microsoft DP-700 Exam Training materials allow candidates to learn in the case of mock examinations. You can control the kinds of questions and some of the problems and the time of each test. In the site of BraindumpsPass, you can prepare for the exam without stress and anxiety. At the same time, you also can avoid some common mistakes. So you will gain confidence

and be able to repeat your experience in the actual test to help you to pass the exam successfully.

Microsoft Implementing Data Engineering Solutions Using Microsoft Fabric Sample Questions (Q68-Q73):

NEW QUESTION # 68

You are building a data loading pattern by using a Fabric data pipeline. The source is an Azure SQL database that contains 25 tables. The destination is a lakehouse.

In a warehouse, you create a control table named Control.Object as shown in the exhibit. (Click the Exhibit tab.) You need to build a data pipeline that will support the dynamic ingestion of the tables listed in the control table by using a single execution.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Answer:

Explanation:

Explanation:

NEW QUESTION # 69

You have a Fabric workspace that contains a Real-Time Intelligence solution and an eventhouse.

Users report that from OneLake file explorer, they cannot see the data from the eventhouse.

You enable OneLake availability for the eventhouse.

What will be copied to OneLake?

- A. only the existing data in the eventhouse
- B. only new data added to the eventhouse
- C. both new data and existing data in the eventhouse
- D. only data added to new databases that are added to the eventhouse
- E. no data

Answer: C

Explanation:

When you enable OneLake availability for an eventhouse, both new and existing data in the eventhouse will be copied to OneLake. This feature ensures that data, whether newly ingested or already present, becomes available for access through OneLake, making it easier for users to interact with and explore the data directly from OneLake file explorer.

NEW QUESTION # 70

You need to recommend a method to populate the POS1 data to the lakehouse medallion layers.

What should you recommend for each layer? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

Bronze Layer: A pipeline Copy activity

The bronze layer is used to store raw, unprocessed data. The requirements specify that no transformations should be applied before landing the data in this layer. Using a pipeline Copy activity ensures minimal development effort, built-in connectors, and the ability to ingest the data directly into the Delta format in the bronze layer.

Silver Layer: A notebook

The silver layer involves extensive data cleansing (deduplication, handling missing values, and standardizing capitalization). A notebook provides the flexibility to implement complex transformations and is well-suited for this task.

NEW QUESTION # 71

You have a Fabric workspace that contains a warehouse named DW1. DW1 is loaded by using a notebook named Notebook1. You need to identify which version of Delta was used when Notebook1 was executed. What should you use?

- **A. Fabric Monitor**
- B. the Microsoft Fabric Capacity Metrics app
- C. OneLake data hub
- D. Real-Time hub
- E. the Admin monitoring workspace

Answer: A

Explanation:

To identify the version of Delta used when Notebook1 was executed, you should use the Admin monitoring workspace. The Admin monitoring workspace allows you to track and monitor detailed information about the execution of notebooks and jobs, including the underlying versions of Delta or other technologies used. It provides insights into execution details, including versions and configurations used during job runs, making it the most appropriate choice for identifying the Delta version used during the execution of Notebook1.

NEW QUESTION # 72

You have a Fabric notebook named Notebook1 that has been executing successfully for the last week. During the last run, Notebook1 executed nine jobs. You need to view the jobs in a timeline chart. What should you use?

- A. Monitoring hub
- B. the job history from the application run
- C. the run series from the details of the application run
- **D. Spark History Server**
- E. Real-Time hub

Answer: D

Explanation:

The run series from the details of the application run is the most detailed and relevant feature for visualizing job execution in a timeline format, making it the correct choice for this scenario. It provides an intuitive way to analyze job execution patterns and improve the efficiency of the notebook.

NEW QUESTION # 73

.....

You want to get the most practical and useful certificate which can reflect your ability in some area. If you choose to attend the test DP-700 certification buying our DP-700 study materials can help you pass the test and get the valuable certificate. Our company has invested a lot of personnel, technology and capitals on our products and is always committed to provide the top-ranking DP-700 Study Materials to the clients and serve for the client wholeheartedly.
