AAPCのCPC認定試験に関連する知識を学んで自分のスキルを向上させ、CPC認定資格を通して他人の認可を得たいですか。AAPCの認定試験はあなたが自分自身のレベルを高めることができます。CPC認定試験の資格を取ったら、あなたがより良く仕事をすることができます。この試験が非常に困難ですが、実は試験の準備時に一生懸命である必要はありません。JpexamのCPC問題集を利用してから、一回で試験に合格することができるだけでなく、試験に必要な技能を身につけることもできます。

AAPC CPC 認定試験の出題範囲：

トピック	出題範囲
トピック 1	<ul style="list-style-type: none"> Integumentary System: This section of the exam measures the skills of medical coders and covers procedures related to the skin and related structures. Topics include excisions, biopsies, repairs, and destruction services, focusing on accurate code selection and modifier usage for integumentary interventions.
トピック 2	<ul style="list-style-type: none"> Cardiovascular System: This section of the exam measures the skills of coding specialists and addresses services related to the heart, arteries, and veins. It involves the coding of diagnostic and therapeutic procedures, including catheterizations, bypasses, and repairs.:

トピック 3	<ul style="list-style-type: none"> • Overview of ICD-10-CM: This section of the exam measures the skills of medical coders and introduces the structure, format, and usage of the ICD-10-CM coding system. It reviews the purpose of ICD-10-CM in diagnosis reporting and prepares candidates to interpret chapters, code ranges, and conventions embedded in the system.
トピック 4	<ul style="list-style-type: none"> • Urinary System and Male Genital System: This section of the exam measures the skills of medical coders and assesses understanding of procedures on kidneys, bladder, ureters, prostate, and male reproductive organs. Proper use of CPT codes for surgical and diagnostic interventions is tested.
トピック 5	<ul style="list-style-type: none"> • Anesthesia: This section of the exam measures the skills of medical coders and involves coding anesthesia services based on surgical site, complexity, and time. It tests the understanding of anesthesia modifiers and the importance of linking anesthesia codes with the correct primary procedures.
トピック 6	<ul style="list-style-type: none"> • Respiratory System: This section of the exam measures the skills of medical coders and evaluates the ability to code procedures involving the nose, sinuses, larynx, trachea, bronchi, and lungs. Attention is given to services like endoscopies, excisions, and resections within the respiratory tract.
トピック 7	<ul style="list-style-type: none"> • Special Senses (Ocular and Auditory): This section of the exam measures the skills of coding specialists and covers the coding of procedures related to the eyes and ears. Topics include surgeries on the cornea, retina, and middle • inner ear, as well as related diagnostic procedures.
トピック 8	<ul style="list-style-type: none"> • Hemic & Lymphatic Systems, Mediastinum, Diaphragm: This section of the exam measures the skills of medical coders and includes procedures related to the spleen, lymph nodes, bone marrow, as well as surgical interventions in the mediastinum and diaphragm. Coders must differentiate procedures by region and system accurately.
トピック 9	<ul style="list-style-type: none"> • Accurate ICD-10-CM Coding: This section of the exam measures the skills of medical coders and focuses on the precise assignment of diagnosis codes using the ICD-10-CM system. The goal is to ensure accurate representation of patient conditions, proper sequencing, and a clear linkage between diagnoses and services.
トピック 10	<ul style="list-style-type: none"> • Endocrine System and Nervous System: This section of the exam measures the skills of medical coders and assesses the ability to assign codes for surgeries involving glands, the brain, spinal cord, and peripheral nerves. Procedures like resections and electrical stimulation are part of the evaluated content.
トピック 11	<ul style="list-style-type: none"> • Musculoskeletal System: This section of the exam measures the skills of coding specialists and focuses on coding procedures involving bones, joints, muscles, and tendons. It covers surgeries, reductions, arthroscopies, and fracture treatments, emphasizing accurate mapping of procedures to anatomical areas.
トピック 12	<ul style="list-style-type: none"> • Digestive System: This section of the exam measures the skills of coding specialists and evaluates the coding of surgeries and procedures involving the oral cavity, pharynx, esophagus, stomach, intestines, liver, pancreas, and related organs. Understanding endoscopic procedures is particularly critical here.
トピック 13	<ul style="list-style-type: none"> • Review of Anatomy: This section of the exam measures the skills of coding specialists and covers a high-level understanding of human anatomy. It includes organs, systems, directional terminology, and anatomical locations, enabling coders to link procedures and diagnoses to the correct bodily structures with accuracy and consistency.
トピック 14	<ul style="list-style-type: none"> • Applying the ICD-10-CM Guidelines: This section of the exam measures the skills of coding specialists and covers how to apply official ICD-10-CM guidelines to real-world coding scenarios. It emphasizes the hierarchy of instructional notes, general and chapter-specific rules, and how to make judgment calls within compliant coding frameworks.
トピック 15	<ul style="list-style-type: none"> • Introduction to CPT®, HCPCS Level II, and Modifiers: This section of the exam measures the skills of coding specialists and introduces candidates to CPT® coding for procedures, HCPCS Level II for supplies and services, and the correct use of modifiers. It helps learners distinguish between different code sets and understand their place in medical billing.

今日では、Jpexam柔軟な学習方法が電子製品の開発でますます一般的になっています。AAPCこの分野でも主導的な立場にあるため、CPCの実際の試験にも最新のテクノロジーが適用されています。CPC学習教材を使用すると、まったく新しい快適な学習体験を得ることができます。さらに、CPC練習資料には3つのバージョンがあるため、さまざまな選択肢があります。同時に、あなたはCPC試験に合格し、Certified Professional Coder (CPC) Exam学習教材の有効性と正確性について希望する認定を取得する必要があります。

AAPC Certified Professional Coder (CPC) Exam 認定 CPC 試験問題 (Q70-Q75):

質問 # 70

A patient arrived at the emergency department experiencing pain in both legs. The ED physician ordered a comprehensive duplex scan of the arteries in both lower extremities to rule out arteriosclerosis. What CPT and ICD-10-CM codes are reported?

- A. 93925, M79.604, M79.605
- B. 93926 x 2, I70.303, M79.604, M79.605
- C. 93926 x 2, M79.604, M79.605
- D. 93925x2, I70.303

正解: A

解説:

93925 - Duplex scan of arteries, bilateral lower extremities; complete

Includes both legs → do not bill twice

Diagnosis Codes:

M79.604 - Pain in right leg

M79.605 - Pain in left leg

Why others are incorrect:

93926 × 2 - Unilateral only

I70.303 - Arteriosclerosis not confirmed

質問 # 71

Preoperative diagnosis: Right thigh benign congenital hairy nevus. *1

Postoperative diagnosis: Right thigh benign congenital hairy 0 nevus.

Operation performed: Excision of right thigh benign congenital >1 nevus, excision size with margins 4.5 cm and closure size 5 cm.

Anesthesia: General.0

Intraoperative antibiotics: Ancef.0

Indications: The patient is a 5-year-old girl who presented with her parents for evaluation of her right thigh congenital nevus. It has been followed by pediatrics and thought to have changed over the past year. Family requested excision. They understood the risks involved, which included but were not limited to risks of general anesthesia, infection, bleeding, wound dehiscence, and poor scar formation. They understood the scar would likely widen as the child grows because of the location of it and because of the age of the patient. They consented to proceed.

Description of procedure: The patient was seen preoperatively in > I the holding area, identified, and then brought to the operating room. Once adequate general anesthesia had been induced, the patient's right thigh was prepped and draped in standard surgical fashion. An elliptical excision measuring 6 x 1.8 cm had been marked. This was injected with Lidocaine with epinephrine, total of 6 cc of 1% with 1:100,000. After an adequate amount of time, a #15 blade was used to sharply excise this full thickness.

This was passed to pathology for review. The wound required limited undermining in the deep subcutaneous plane on both sides for approximately 1.5 cm in order to allow mobilization of the skin for closure. The skin was then closed in a layered fashion using 3-0 Vicryl on the dermis and then 4-0 Monocryl running subcuticular in the skin, the wound was cleaned and dressed with Dermabond and Steri-Strips.

The patient was then cleaned and turned over to anesthesia for S extubation.

She was extubated successfully in the operating room and taken S to the recovery room in stable condition. There were no complications.

What CPT codes are reported?

- A. 35876-RT, 75710-26
- B. 35875-RT, 75716-26
- C. 35875-RT, 75710-26
- D. 37184-RT, 75716-26

正解: C

解説:

35875 = Thrombectomy, femoral-popliteal artery

RT = Right side

75710-26 = Angiography, extremity, unilateral, professional component

質問 # 72

A patient who has HIV disease presents with loin pain in the clinic today. The patient reports he is having trouble sleeping due to the pain. What ICD-10-CM coding is reported?

- A. B20, M54.9
- B. M54.51, B20
- C. M54.50, B20
- D. B20, M54.50

正解: D

解説:

The correct ICD-10-CM coding for this patient is B20, M54.50. The first code, B20, is used for HIV disease, which is a confirmed diagnosis of HIV infection. It's important to note that this code can be used regardless of whether the patient is symptomatic or asymptomatic, as long as the patient has been diagnosed with HIV.

The second code, M54.50, refers to low back pain, which would be used to report the loin pain described by the patient. "Loin pain" typically refers to pain in the lower back area, and this code specifically covers the general category of low back pain not otherwise specified.

The other options are not as accurate:

* A (B20, M54.9) includes a nonspecific code for back pain (M54.9), which does not fully specify the pain's location.

* B (M54.51, B20) incorrectly includes a code for thoracic or lumbar radiculopathy (M54.51), which is not indicated here.

* D (M54.50, B20) is similar to the correct answer, but it incorrectly lists the codes in reverse order. It is important to list the HIV diagnosis first in ICD-10-CM.

Reference topics: ICD-10-CM Coding for HIV Disease; Pain Coding

質問 # 73

A patient underwent a colonoscopy, where the gastroenterologist biopsied two polyps from the colon. Each polyp was sent to pathology as separately identified specimens. The gastroenterologist was requesting a pathology consult while the patient was still on the table. Tissue blocks and frozen sections were then prepared and examined as follows:

Specimen 1: First Tissue Block-Three Frozen Sections Second Tissue Block-One Frozen Section Specimen 2: First Tissue Block-Two Frozen Sections Second Tissue Block-One Frozen Section What CPT coding is reported?

- A. 88331 x 4, 88332 x 3
- B. 88331 X 2, 88332 x 2
- C. 88331 x 3, 88332x2
- D. 88331,88332

正解: A

解説:

Frozen section pathology coding rules:

88331 - Frozen section, first tissue block, each specimen

88332 - Frozen section, each additional tissue block, same specimen

Breakdown:

Specimen 1

Block 1 # 88331 × 1

Block 2 # 88332 × 1

Specimen 2

Block 1 # 88331 × 1

Block 2 # 88332 × 1

However, multiple frozen sections per tissue block are separately reportable:

Total first blocks = 4 frozen sections # 88331 × 4

Total additional blocks = 3 frozen sections # 88332 × 3

CPT pathology guidelines require coding by tissue block and specimen, not by polyp alone.

質問 # 74

A physician orders a CT scan of the abdomen without contrast.

What CPT coding is reported?

- A. 0
- B. 1
- C. 2
- D. 3

正解: C

解説:

74150 = CT abdomen without contrast

Other codes describe MRI or combined studies

質問 # 75
