

Pass Guaranteed Quiz PL-900 - Microsoft Power Platform Fundamentals Marvelous Test Assessment

P.S. Free & New PL-900 dumps are available on Google Drive shared by TopExamCollection: <https://drive.google.com/open?id=1AJOkoeI3zbhcKLJl-IIw2Fd6XXoL9gF6>

Here I would like to explain the core value of TopExamCollection exam dumps. TopExamCollection Practice PL-900 Test dumps guarantee 100% passing rate. TopExamCollection real questions and answers are compiled by lots of Microsoft experts with abundant experiences. So it has very high value. The dumps not only can be used to prepare for Microsoft certification exam, also can be used as a tool to develop your skills. In addition, if you want to know more knowledge about your exam, TopExamCollection exam dumps can satisfy your demands.

What is Microsoft PL-900?

Microsoft doesn't usually reveal the details of its certification exams and the PL-900 test is not an exception. The exam is available in multiple languages, including English, French, German, Spanish, Simplified Chinese, Korean, and Japanese. You can take the test either through Certiport or PearsonVUE. The exam costs \$99. This is the pricing applicable to the United States. If you are located in another country, you should check the actual costs on the website of the Microsoft testing partner.

The Microsoft PL-900 exam covers a wide range of knowledge areas. All the skills measured in the certification test can be united into six domains. Let's have a closer look at these topics.

Microsoft PL-900 exam, also known as the Microsoft Power Platform Fundamentals exam, is designed to validate the foundational knowledge of candidates in the Microsoft Power Platform. The Power Platform is a suite of business applications that includes Power BI, PowerApps, and Power Automate. The PL-900 Exam is an ideal starting point for individuals who wish to pursue a career in the field of data analysis, application development, or business automation using the Microsoft Power Platform.

Microsoft PL-900 Exam is a foundational exam that is suitable for individuals who are new to the Microsoft Power Platform or who have some experience with the platform but want to deepen their knowledge. PL-900 exam covers a range of topics, including the basics of the Microsoft Power Platform, the different components of the platform, and how to build custom applications and workflows using the platform. PL-900 exam is designed to test your understanding of the Microsoft Power Platform and your ability to use its various components to solve business problems. If you are interested in pursuing a career in the field of business application development or automation, then the Microsoft PL-900 Exam is a great place to start.

TopExamCollection's Microsoft PL-900 exam training materials are absolutely give you a true environment of the test preparation. Our material is highly targeted, just as tailor-made for you. With it you will become a powerful IT experts. TopExamCollection's Microsoft PL-900 Exam Training materials will be most suitable for you. Quickly registered TopExamCollection website please, I believe that you will have a windfall.

Microsoft Power Platform Fundamentals Sample Questions (Q23-Q28):

NEW QUESTION # 23

A company is creating a chatbot to replace a frequently asked questions (FAQ) site.

You must perform step-by-step testing for all scenarios that are part of a complex user interaction that includes multiple topics.

Testers must be able to see the workflow while interacting with the chatbot.

You need to test the chatbot.

What should you do?

- A. View analytics for a chatbot conversation.
- **B. Use the chatbot designer to test the chatbot**
- C. Publish the chatbot and test it in the demo website.
- D. Publish the chatbot and test it in any channel

Answer: B

Explanation:

"Testers must be able to see the workflow while interacting with the chatbot." They can see the workflow in the designer when testing the chatbot in the test pane. Not in a website.

<https://docs.microsoft.com/en-us/power-virtual-agents/authoring-test-bot#test-a-topic-in-the-test-bot-pane>

NEW QUESTION # 24

A company plans to create an information portal that managers can use to view critical information about their teams.

You need to recommend the type of Power BI components that the company should use.

What should you recommend? To answer, drag the appropriate components to the correct requirements. Each component may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE. Each correct selection is worth one point.

Component types

Dashboard
Report

Display data from a Microsoft Excel workbook that has multiple worksheets into one chart.

Display the top departmental goal metrics and alert users when specific thresholds targets are met.

Display Sales charts that can be filtered by region.

Component type

Component type
Component type
Component type

Answer:

Explanation:

Screenshot of the question interface showing the correct answer mapping. The 'Component types' list has 'Dashboard' and 'Report' highlighted with green dashed boxes. The 'Requirement' list has three items. The 'Component type' list has 'Report', 'Dashboard', and 'Report' highlighted with red dashed boxes. A legend at the top indicates that the red and green boxes represent the 'Answer Area' and the blue and orange boxes represent the 'Requirement'.

Explanation:

Answer Area

Requirement	Component type
Display data from a Microsoft Excel workbook that has multiple worksheets into one chart.	<input type="text" value="Report"/>
Display the top departmental goal metrics and alert users when specific thresholds targets are met.	<input type="text" value="Dashboard"/>
Display Sales charts that can be filtered by region.	<input type="text" value="Report"/>

Box 1: Report

Reports are more detailed data displayed in many formats like chart, graphs list and in tabular, etc.

Box 2: Dashboard

Dashboards are a business key performance indicator view where it displays key values that can change business profits and can be glanced at one screen.

Box 3: Report

Power BI dashboards cannot slice and dice, but reports have many ways to filter and slice.

Note: Power BI dashboards are one placeholder to display the most important decision-making facts to run a business. But reports are more detailed data displayed in many formats like chart, graphs list and in tabular, etc. Reports are based on one dataset or one business unit data for example reports of a store belonging to California.

NEW QUESTION # 25

You plan to send an email notification to a user when a new file is placed in a specific folder in OneDrive for Business.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statement	Yes	No
You can create a flow without writing a single line of code and deploy the flow to a production environment.	<input type="radio"/>	<input type="radio"/>
You cannot add additional actions to the built-in Power Automate templates.	<input type="radio"/>	<input type="radio"/>
You can view the code that implements workflow actions and triggers without installing additional software.	<input type="radio"/>	<input type="radio"/>

Answer:

Explanation:

Statement	Yes	No
You can create a flow without writing a single line of code and deploy the flow to a production environment.	<input checked="" type="radio"/>	<input type="radio"/>
You cannot add additional actions to the built-in Power Automate templates.	<input type="radio"/>	<input checked="" type="radio"/>
You can view the code that implements workflow actions and triggers without installing additional software.	<input checked="" type="radio"/>	<input type="radio"/>
