Pass-Sure CWSP-208 Reliable Exam Registration & Leading Offer in Qualification Exams & Marvelous CWNP Certified Wireless Security Professional (CWSP)

The education level of the country has been continuously improved. At present, there are more and more people receiving higher education, and even many college graduates still choose to continue studying in school. Getting the test CWSP-208 certification maybe they need to achieve the goal of the learning process, have been working for the workers, have more qualifications can they provide wider space for development. The CWSP-208 Study Materials can provide them with efficient and convenient learning platform so that they can get the certification as soon as possible in the shortest possible time.

Professional ability is very important both for the students and for the in-service staff because it proves their practical ability in the area. Therefore choosing a certificate exam which boosts great values to attend is extremely important for them and the test CWSP-208 certification is one of them. Passing the test certification can prove your outstanding major ability in some area and if you want to pass the CWSP-208 test smoothly you'd better buy our CWSP-208 test guide. And our CWSP-208 exam questions boost the practice test software to test the clients' ability to answer the questions.

Exam CWSP-208 Preview - Reliable CWSP-208 Study Guide

We can claim that the qulity of our CWSP-208 exam questions is the best and we are famous as a brand in the market for some advantages. Firstly, the content of our CWSP-208 study materials is approved by the most distinguished professionals who are devoting themselves in the field for years. Secondly, our CWSP-208 praparation braindumps are revised and updated by our experts on regular basis. With these brilliant features our CWSP-208 learning engine is rated as the most worthwhile, informative and high-effective.

CWNP Certified Wireless Security Professional (CWSP) Sample Questions (Q108-Q113):

NEW QUESTION # 108
In what deployment scenarios would it be desirable to enable peer-to-peer traffic blocking?

- A. In corporate Voice over Wi-Fi networks with push-to-talk multicast capabilities
- B. In university environments using multicast video training sourced from professor's laptops
- C. At public hot-spots in which many clients use diverse applications
- D. In home networks in which file and printer sharing is enabled

Answer: C

Explanation:
Peer-to-peer blocking (also called client isolation) is useful in open or public WLANs to prevent devices from communicating directly with each other.
B). In public hot-spots, isolating users helps protect against malware spread, snooping, and attacks from nearby devices.
Incorrect:
A). In home networks, peer-to-peer communication is often desired for file sharing.
C). Voice over Wi-Fi may rely on peer communication (e.g., multicast).
D). In university setups using multicast, peer-to-peer restrictions could hinder functionality.

CWNP WLAN Best Practices for Public Networks

NEW QUESTION # 109

Given: ABC Hospital wishes to create a strong security policy as a first step in securing their 802.11 WLAN.
Before creating the WLAN security policy, what should you ensure you possess?

- A. End-user training manuals for the policies to be created
- B. Security policy generation software
- C. Awareness of the exact vendor devices being installed
- D. Management support for the process

Answer: D

Explanation:
Developing a robust WLAN security policy requires buy-in from executive or senior management. Without management support, it's difficult to enforce compliance, allocate resources, or prioritize security among other organizational objectives. This foundational step ensures that policy creation and enforcement are feasible and aligned with organizational goals.
Incorrect:
A). Device/vendor specifics are addressed later during implementation.
C). End-user training materials are created after the policy is finalized.
D). Security policy software can assist, but is not essential compared to management support.

NEW QUESTION # 110

You are using a utility that takes input and generates random output. For example, you can provide the input of a known word as a secret word and then also provide another known word as salt input. When you process the input it generates a secret code which is a combination of letters and numbers with case sensitivity. For what is the described utility used? (Choose 3)

- A. Generating passwords for WLAN infrastructure equipment logins
- B. Generating dynamic session keys used for IPSec VPNs
- C. Generating secret keys for RADIUS servers and WLAN infrastructure devices
- D. Generating PMKs that can be imported into 802.11 RSN-compatible devices
- E. Generating passphrases for WLAN systems secured with WPA2-Personal

Answer: C,D,E

Explanation:
A utility that combines a secret and salt to generate a random string is effectively a key derivation tool. It can be used to:
Generate PMKs (Pairwise Master Keys) to preload ready-made keys into RSN devices Generate shared secrets (e.g., RADIUS shared secrets, WLAN controller keys) Create strong passphrases for WPA2-Personal networks Using it for IPSec session keys is less common (those are usually dynamically negotiated), and creating management passwords is possible but not the main us

NEW QUESTION # 111

The IEEE 802.11 standard defined Open System authentication as consisting of two auth frames and two assoc frames. In a WPA2-Enterprise network, what process immediately follows the 802.11 association procedure?

- A. 802.1X/EAP authentication
- B. RADIUS shared secret lookup
- C. 4-Way Handshake
- D. DHCP Discovery
- E. Passphrase-to-PSK mapping
- F. Group Key Handshake

Answer: A

Explanation:
In WPA2-Enterprise:
After successful Open System authentication and 802.11 association, the next step is 802.1X/EAP authentication via EAPOL frames.
This phase establishes user identity and derives the PMK.

Incorrect:
A). Group Key Handshake comes after the 4-Way Handshake.
C). DHCP occurs after authentication and key negotiation.
D). 4-Way Handshake follows successful 802.1X authentication.
E). PSK mapping applies to WPA2-Personal, not Enterprise.
F). The RADIUS shared secret is pre-configured between authenticator and RADIUS server-not part of real- time negotiation.

CWSP-208 Study Guide, Chapter 3 (Authentication and Association Flowchart) IEEE 802.11-2012 Standard

NEW QUESTION # 112
You are implementing an 802.11ac WLAN and a WIPS at the same time. You must choose between integrated and overlay WIPS solutions. Which of the following statements is true regarding integrated WIPS solutions?

- A. Integrated WIPS use special sensors installed alongside the APs to scan for threats.
- B. Integrated WIPS is always more expensive than overlay WIPS.
- C. Many integrated WIPS solutions that detect Voice over Wi-Fi traffic will cease scanning altogether to accommodate the latency sensitive client traffic.
- D. Integrated WIPS always perform better from a client throughput perspective because the same radio that performs the threat scanning also services the clients.

Answer: C

Explanation:
In integrated WIPS systems, radios are shared between client servicing and security scanning. To maintain quality of service for latency-sensitive applications such as VoWiFi (Voice over Wi-Fi), scanning operations may be temporarily suspended or deprioritized, potentially reducing security monitoring during those periods.
