Pass Guaranteed Tableau - TDA-C01 - High Hit-Rate New Tableau Certified Data Analyst Test Simulator

You need to do something immediately to change the situation. For instance, the first step for you is to choose the most suitable TDA-C01 actual guide materials for your coming exam. so the TDA-C01 study materials is very important for you exam, because the TDA-C01 study materials will determine whether you can pass the TDA-C01 Exam successfully or not. We would like to introduce you our TDA-C01 exam questions, which is popular and praised as the most suitable and helpful TDA-C01 study materials in the market.

Tableau TDA-C01 certification exam is a computer-based test that consists of multiple-choice questions. TDA-C01 exam is divided into two sections: Desktop Specialist and Desktop Certified Associate. The Desktop Specialist section tests basic knowledge of Tableau Desktop, including data connectivity, creating visualizations, and sharing insights. The Desktop Certified Associate section

delves deeper into advanced concepts such as data blending, calculations, and advanced analytics. TDA-C01 exam is designed to assess the candidate's ability to use Tableau to perform complex data analysis and present findings in a clear and concise manner.

Tableau TDA-C01 Exam covers a wide range of topics, such as data preparation, data analysis, exploration, and visualization using Tableau. It offers a comprehensive exam experience consisting of multiple-choice questions, case studies, and scenarios that simulate real-world analytical problems. TDA-C01 exam is also time-bound so that candidates can demonstrate their proficiency at analyzing data within strict conditions.

Tableau Certified Data Analyst Sample Questions (Q62-Q67):

NEW QUESTION # 62

You have the following visualization.

The Last() calculation is set to compute using Table (across)

Which value will appear in the crosstab for the Consumer segment of the year 2018 if you change compute to use Order Date?

- A. 0
- B. 1
- C. 2
- D. 3

Answer: A

NEW QUESTION # 63

You have the Mowing dashboard.

Which two elements are floating? Choose two.

- A. The state filter
- B. The title
- C. The Rate of Obesity chart
- D. The color legend
- E. The map

Answer: A,C

Explanation:

In Tableau dashboards, floating elements are those that can be freely moved over the dashboard canvas without being snapped into the tiled layout. The floating elements are often indicated by their standalone frames and the ability to overlap with other dashboard items. From the provided image, the state filter and the Rate of Obesity chart can be identified as floating if they can be moved independently of the tiled grid layout that constrains other elements.

NEW QUESTION # 64

You have a Tableau workbook.

You want to make the workbook available in Tableau Online.

What should you do?

- A. From the Server menu, select Tableau Public, and then select Save to Tableau Public.
- B. From the Server menu, select Publish Data Source.
- C. From the File menu, select Export Packaged Workbook.
- D. From the Server menu, select Publish Workbook.

Answer: D

Explanation:

To make a workbook available in Tableau Online, you need to publish it from Tableau Desktop to Tableau Online. You can do this by selecting Publish Workbook from the Server menu, signing in to your Tableau Online account, choosing a project and a name for your workbook, and clicking Publish. This will upload your workbook and its data sources to Tableau Online, where you can view, edit, and share it with others. References:

NEW QUESTION # 65

You have the following dataset.

- When you use the dataset in a worksheet, you want Sales to appear automatically as shown in the following table.
- What should you do?

- A. Create a calculated field that uses a formula of 'S' + str(<(Sales)/1000)).
- **B. Change the default number format of the Sales field**
- C. Change the data type of the Sales field to String
- D. Create a calculated field that uses a formula of 'S' * str (Round((Sales),2)) + 'k'

Answer: B

Explanation:

To make Sales appear automatically as shown in the second table, you should change the default number format of the Sales field. The default number format is how Tableau displays a field when you drag it to a worksheet. You can change the default number format by right-clicking on the field and selecting Default Properties > Number Format from the menu. This will open a dialog box where you can choose a category, such as Currency or Percentage, and customize the options, such as decimal places or prefixes. In this case, you want to change the default number format of Sales to Currency with zero decimal places and a custom prefix of "S". This will make Sales appear as "S" followed by the rounded value in thousands.

The other options are not correct for this scenario. Changing the data type of Sales to String will not affect how it appears on a worksheet. Creating a calculated field that uses a formula will not change the default number format of Sales, but create a new field that you have to drag to a worksheet. Converting Sales to Attribute will return only one value for each partition of data, which will not show any variation over time.
