

# Latest Released Netskope NSK300 Exam Book: Netskope Certified Cloud Security Architect - NSK300 Latest Dumps Sheet

Here in this Desktop practice test software, the Netskope Certified Cloud Security Architect (NSK300) practice questions given are very relevant to the actual Netskope NSK300 exam. It is compatible with Windows computers. ActualTestsIT provides its valued customers with customizable Netskope Certified Cloud Security Architect (NSK300) practice exam sessions. The Netskope NSK300 practice test software also keeps track of the previous Netskope NSK300 practice exam attempts.

## Netskope NSK300 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>• <b>Netskope Platform Monitoring:</b> This section of the exam measures the capabilities of Security Operations Center (SOC) Analysts and focuses on monitoring the platform through reporting and analytics tools. It highlights how Netskope insights support visibility into user activity, cloud app behavior, and policy effectiveness to help organizations maintain a continuous cloud security posture.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>• <b>Netskope Platform Management:</b> This section of the exam measures the skills of Security Administrators and covers essential administrative tasks required to manage the Netskope Security Cloud Platform. It includes managing DLP functions, handling identity integrations, and monitoring Netskope components to maintain platform stability. The domain ensures professionals can manage daily operations and maintain strong access, data, and security controls.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>• <b>Cloud Security Solutions:</b> This section of the exam measures the skills of Cloud Security Analysts and covers the core components and functions of the Netskope Security Cloud Platform. It includes understanding how the platform integrates with enterprise environments, the deployment methods supported by Netskope, and the role of various microservices in delivering cloud-based security. The focus is on ensuring candidates can recognize how Netskope's architecture protects users, applications, and data across cloud services.</li></ul>

Topic 4	<ul style="list-style-type: none"> <li>• <b>Netskope Platform Implementation:</b> This section of the exam measures the abilities of Cloud Security Engineers and focuses on implementing the Netskope Security Cloud Platform using recommended steering architectures and deployment approaches. It includes key concepts such as API-enabled protection and real-time protection features, ensuring candidates understand how to deploy Netskope to secure cloud usage effectively within enterprise networks.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>• <b>Netskope Platform Troubleshooting:</b> This section of the exam measures the skills of Support Engineers and focuses on identifying and resolving common issues within the Netskope platform. It includes troubleshooting client connectivity problems, analyzing steering methods, resolving general connectivity concerns, and addressing SAML integration issues. The section ensures candidates can diagnose and fix issues that impact platform performance and user access.</li> </ul>

## Prominent Features of Netskope NSK300 Exam Practice Test Questions

It is a truth well-known to all around the world that no pains and no gains. There is another proverb that the more you plough the more you gain. When you pass the NSK300 exam which is well recognized wherever you are in any field, then acquire the NSK300 certificate, the door of your new career will be open for you and your future is bright and hopeful. Our NSK300 Guide Torrent will be your best assistant to help you gain your certificate. We believe that you don't encounter failures anytime you want to learn our NSK300 guide torrent.

### Netskope Certified Cloud Security Architect Sample Questions (Q37-Q42):

#### NEW QUESTION # 37

You want to verify that Google Drive is being tunneled to Netskope by looking in the nsdebuglog file. You are using Chrome and the Netskope Client to steer traffic. In this scenario, what would you expect to see in the log file?

- **A.**
- B.
- C.
- D.

**Answer: A**

Explanation:

When verifying that Google Drive traffic is being tunneled to Netskope using Chrome and the Netskope Client, you would expect to see log entries indicating that the traffic is being directed through Netskope's proxy. Specifically, Option A is correct as it shows the process "google drive" being tunneled to nsProxy. The log entry for Option A indicates that a TLS tunneling flow from a local address and process (Google Drive) is being directed to a host (play.googleapis.com) and then to Netskope's proxy (nsProxy). This is consistent with how Netskope tunnels specified traffic for security and policy enforcement.

#### NEW QUESTION # 38

You are currently designing a policy for AWS S3 bucket scans with a custom DLP profile Which policy action (s) are available for this policy?

- A. Alert, Quarantine, Block, User Notification
- **B. Alert, Quarantine**
- C. Alert, User Notification
- D. Alert only

**Answer: B**

Explanation:

When designing a policy for AWS S3 bucket scans with a custom DLP profile in Netskope, the available policy actions are Alert and Quarantine. These actions allow you to be notified when a policy violation occurs and to quarantine sensitive data to prevent potential data loss or exposure. The Alert action will notify the designated personnel or system when a match to the DLP profile is

found during the scan. The Quarantine action will move the offending file to a secure location where it can be reviewed and dealt with appropriately<sup>1</sup>.

The information about policy actions for AWS S3 bucket scans is available in the Netskope documentation, which provides guidance on creating API Data Protection policies for scanning S3 buckets and the actions that can be taken when a policy is triggered<sup>1</sup>.

#### NEW QUESTION # 39

You are deploying the Netskope Client to Windows devices. The following command line would be used to install the client MSI file:

□ In this scenario, what is <token> referring to in the command line?

- A. the Netskope organization ID
- B. a Netskope user identifier
- C. the URL of the IdP used to authenticate the users
- D. a private token given to you by the SCCM administrator

**Answer: A**

Explanation:

In the context of deploying the Netskope Client to Windows devices, <token> in the command line refers to the Netskope organization ID. This is a unique identifier associated with your organization's account within the Netskope security cloud. It is used during the installation process to ensure that client devices are registered and managed under the correct organizational account, enabling appropriate security policies and configurations to be applied. References: The answer can be inferred from general knowledge about installing software clients and isn't directly available on Netskope's official resources.

#### NEW QUESTION # 40

Review the exhibit.

□ Netskope has been deployed using Cloud Explicit Proxy and PAC files. Authentication using Active Directory Federation Services (ADFS) has been configured for SAML Forward Proxy auth. When the users open their browser and try to go to a site, they receive the error shown in the exhibit.

What is a reason for this error?

- A. The group attribute was not set in the Netskope SAML Forward Proxy configuration.
- B. Netskope is not compatible with the identity provider.
- C. There is an issue with the formatting of the ADFS certificate that was uploaded to the Netskope tenant for SAML Forward Proxy configuration.
- D. The Netskope nsauth proxy cannot reach the identity provider.

**Answer: C**

#### NEW QUESTION # 41

You have deployed Netskope to all users of the organization and you are now ready to begin ingesting all events, alerts, and Web transactions into your SIEM as a part of your requirements.

What are three ways in which you would accomplish this task? (Choose three.)

- A. Use syslog directly to Splunk.
- B. Use Cloud Log Shipper to an IaaS storage repository and then into your SIEM.
- C. Use the Netskope Publisher to a stream syslog to your SIEM.
- D. Use custom API calls to ingest to a data lake and then into your SIEM.

**Answer: A,B,D**

#### NEW QUESTION # 42

.....

Therefore, you have the option to use Netskope NSK300 PDF questions anywhere and anytime. ActualTestsIT Netskope Certified

Cloud Security Architect (NSK300) dumps are designed according to the Netskope NSK300 certification exam standard and have hundreds of questions similar to the actual Netskope Certified Cloud Security Architect (NSK300) exam. Netskope Certified Cloud Security Architect (NSK300) web-based practice exam software also works without installation.
