NEW QUESTION # 275

A technician needs to install an operating system on a large number of workstations. Which of the following is the fastest method?

- A. Image deployment
- B. Physical media
- C. Mountable ISO

- D. Manual installation

Answer: A

Explanation:

Image deployment is the fastest and most efficient method for installing operating systems on multiple machines. It involves creating a pre-configured image of an OS and deploying it across systems using tools like Windows Deployment Services (WDS) or third-party imaging solutions. This method saves time and ensures consistency across all devices.

- A). Physical media is slow and not scalable.
- B). Mountable ISOs are useful but still require manual installation.
- C). Manual installation is time-consuming and not suitable for large-scale deployment.

NEW QUESTION # 276

A user's application only works with a legacy version of the OS. The OS is reaching its end-of-life date. For security reasons, the company is migrating to the current version of the OS. Which of the following is the most efficient way to complete the migration while maintaining accessibility to the application?

- **A. Virtualization**
- B. Bare-metal server
- C. Multiboot
- D. Terminal server

Answer: A

Explanation:

Virtualization allows the legacy OS to be run in a virtual machine (VM) on top of the newer OS. This method provides backward compatibility without requiring outdated operating systems on physical hardware.

From Quentin Docter - CompTIA A+ Complete Study Guide:

"Using virtualization is a preferred method when legacy applications are needed after migrating to newer operating systems. It allows legacy environments to exist securely within a modern OS framework."

NEW QUESTION # 277

After new device software for a webcam is installed, a Windows PC is experiencing BSOD. The BSOD occurs during a videoconference call. Which of the following should the technician do next?

- A. Update the anti-malware signature and scan the system
- B. Reconnect the webcam to the computer
- C. File a warranty claim with the manufacturer
- **D. Start in Safe Mode and roll back the device driver**

NEW QUESTION # 278

- A. Update the device OS
- B. Reinstall the productivity suite
- **C. Check the license device limit**
- D. Download an open-source alternative

Answer: C

NEW QUESTION # 279

A technician needs to configure laptops so that only administrators can enable virtualization technology if needed. Which of the following should the technician configure?

- A. Guest account
- B. AutoRun setting
- **C. BIOS password**
