

MB-700 Authorized Certification - MB-700 100% Correct Answers

What's more, part of that Exam4Free MB-700 dumps now are free: https://drive.google.com/open?id=1dcn5wFI_bDfHx5VzND97Jx-qbzrwiDp

If you are worried about your exam, just choose us, we will help you pass the exam and strengthen your confidence. MB-700 Soft test engine can stimulate the real exam environment, so that you can know the procedure of the exam, and your nerves will be decreased and your confidence will be increased. In addition, MB-700 Training Materials are high quality, and they can help you pass the exam just one time. If you fail to pass the exam in your first attempt after using MB-700 exam dumps of us, we will give you full refund.

Exam4Free gives a guarantee to our customers that they can pass the Microsoft MB-700 Certification Exam on the first try by preparing from the Exam4Free and if they fail to pass it despite their efforts they can claim their payment back as per terms and conditions. Exam4Free facilitates customers with a 24/7 support system which means whenever they get stuck somewhere they don't struggle and contact the support system which will assist them in the right way. A lot of students have prepared from practice material and rated it positively.

MB-700 100% Correct Answers, MB-700 Test Score Report

Our company has employed a lot of leading experts in the field to compile the MB-700 exam question. Our system of team-based working is designed to bring out the best in our people in whose minds and hands the next generation of the best MB-700 exam torrent will ultimately take shape. Our company has a proven track record in delivering outstanding after sale services and bringing innovation to the guide torrent. Your success is guaranteed for our experts can produce world class MB-700 Guide Torrent for our customers. You will be bound to pass the MB-700 exam.

How much MB-700:Microsoft Dynamics 365: Finance and Operations Apps Solution Architect Exam Cost

The price of the Microsoft Mobility and Devices Fundamentals exam is \$165 USD, for more information related to exam price please visit to Microsoft Training website as prices of Microsoft exams fees get varied country wise.

Microsoft MB-700 Exam Syllabus Topics:

Topic	Details
Architect solutions (20-25%)	

Gather requirements	<ul style="list-style-type: none"> - identify operational and organizational challenges that may affect a business - identify existing business processes and opportunities to optimize business processes - gather information about expected transaction volume - categorize business requirements and perform gap fit analyses - review and validate business requirements throughout the solution lifecycle
Define the solution architecture	<ul style="list-style-type: none"> - map business requirements to functional components - evaluate whether to build versus buy for selected business requirements - identify opportunities to integrate other Microsoft technologies - select the appropriate implementation tools including LCS and Azure DevOps - describe the Success by Design process - create solution architecture diagrams
Describe and document the solution blueprint	<ul style="list-style-type: none"> - define an organization including company information, locations, and structure - document the implementation timeline including roll-out strategies - define the business process catalog and document solution gaps - define instances, environments, and solution components - develop a disaster recovery strategy - identify required security roles
Define solution strategies (35-40%)	
Select a deployment strategy	<ul style="list-style-type: none"> - develop a process to manage solution code and deployment - select a deployment model and identify instances and environments required for the selected deployment model - describe the One Version strategy for Dynamics 365 and the effects of One Version on solutions - segment solution development and delivery into logical phases - provide alternative methodologies and approaches for deploying modifications - determine solution maintenance cadence and timelines - identify upgrade scenarios and select appropriate tools
Define an application lifecycle management (ALM) strategy	<ul style="list-style-type: none"> - define a code management and data flow strategy - define a Microsoft Power Platform solution management strategy - determine which build automation capabilities to implement - define a roll-back strategy for solution code and data
Determine a data management strategy	<ul style="list-style-type: none"> - differentiate between transactional and historical data - define data quality and data validation process - define data cleansing and transformation strategies - define data dependencies - develop a data migration strategy for master, transactional, reference, parameter, and document data entities - develop data cut-over and data retention plans
Define the security architecture	<ul style="list-style-type: none"> - differentiate between Azure, Dynamics 365, and infrastructure security - describe Azure and infrastructure security-related elements - describe use cases for and capabilities of record-level and role-based security in Dynamics 365
Define the integration architecture	<ul style="list-style-type: none"> - select an integration pattern including OData, Microsoft Power Platform, Batch Data API, Azure Data Lake, Business events, and Dual-write - identify required integration and interface details - design integrations - define an integration testing strategy
Define the business intelligence and reporting architecture	<ul style="list-style-type: none"> - gather business intelligence and reporting requirements - define data sources required to meet business intelligence and reporting requirements - select appropriate business intelligence and reporting tools including Power BI, organizational workspaces, financial reports, SQL Server Reporting Services (SSRS), and the Electronic Reporting tool - define printing requirements including Print management, Document Routing Agent (DRA), modern report design layout templates, check printing, and label printing
Manage implementations (20-25%)	

Describe Lifecycle Services (LCS) tools	<ul style="list-style-type: none"> - understand the use cases and capabilities of different LCS tools - understand the use cases and capabilities Business Process Modeler (BPM) - understand the use cases and capabilities LCS Methodologies - create a usage profile to describe current or projected usage
Manage interactions with FastTrack	<ul style="list-style-type: none"> - identify the value proposition for FastTrack - identify FastTrack engagement types and personnel roles - describe typical types of FastTrack workshops and the inputs for each workshop - describe go-live checklist elements
Determine support options	<ul style="list-style-type: none"> - develop a support plan and strategy - define post-go-live support plans including response times and service-level agreements (SLAs) - describe use cases and capabilities for the LCS Support tool
Determine licensing requirements	<ul style="list-style-type: none"> - determine the types of licenses required - estimate the number of licenses required by using the License Sizing estimator - describe the process for estimating ongoing software licensing costs

What Is MB-700 Test?

MB-700 is the exam that will lead you to the Microsoft Certified: Dynamics 365: Finance and Operations App Solution Architect Expert certification. Like other Microsoft tests, it has 40-60 questions such as drag & drops, hot area, mark review, MCQs, active screen, build lists and short answers that the candidate has to attempt within 150 minutes. One may sit for this exam in English and should pay \$165 to register for it. It is not a fixed price as it varies from one country to another.

To ace MB-700 test, applicants need to prepare well by taking the instructor-led course available on the Microsoft website. Once achieves this certificate, professionals can put it in their social media profiles to attract employers.

Microsoft Dynamics 365: Finance and Operations Apps Solution Architect Sample Questions (Q187-Q192):

NEW QUESTION # 187

A company is implementing Dynamics 365 Supply Chain Management.

You are helping the company use Subscription Estimator in Lifecycle Services (LCS).

You need to import data for the usage profile.

Which data source should you use?

- A. Data Migration Framework
- B. Azure Data Lake connector
- C. Performance SDK
- D. Business process modeler (BPM)

Answer: D

Explanation:

Usage profiler (Lifecycle Services, LCS), Import business processes from BPM.

We recommend that you start by importing data from Business process modeler, and then add additional data manually.

* Go to Lifecycle Services.

* Configure your organization in Business process modeler.

* On the project home page, click the Usage profiler tile, and then on the Usage profiler page, click Import from BPM. The system displays the message Retrieving BPM data. When it has finished importing the data, you will be returned to the Usage profiler page.

NEW QUESTION # 188

A company implements Dynamics 365 Finance. The company does not have a developer on staff.

The company designs vendor checks that will be accepted by banks. The company wants to format new vendor checks for multiple banks.

You need to recommend a solution to validate that a venerated vendor check format matches the original check format.

What should you recommend? To answer, drag the appropriate tools to the correct requirements. Each tool may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION # 189

You need to recommend solutions to meet the CIO's requirements (or the customers and the roadmap. What should you recommend? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

Topic 4, VanArsdel, Ltd.

VanArsdel, Ltd. is a company that uses Microsoft Dynamics AX 2012 R3 in the United States, Canada,

Mexico, and Brazil in an on-premises environment. The company implemented the solution by using Sure Step 2012. VanArsdel, Ltd. plans to upgrade to Dynamics 365 Finance, Dynamics 365 Supply Chain Management and Dynamics 365 Commerce using Proseware, inc. as the implementation partner.

VanArsdel, Ltd. has implemented 13 other software systems for customer management and sales.

Methodology

VanArsdel, Ltd. deploys a proprietary methodology named VanPMP. The company plans to use VanPMP for all software implementations. The company uses a standard project template for all new implementations.

Solution

Microsoft Power Apps is used by the sales team to enter sales orders. The orders are then integrated with the current Dynamics AX 2012 R3 instance asynchronously once every hour. All sales orders are invoiced through the invoicing batch process at the end of the day. Sales are used for all business-critical scenarios.

The external systems include 12 integrations, such as Microsoft Power Platform, Office 365, Azure, and third-party systems.

One of the automated accounts receivable import integrations, named integration 1, generates revenue in a business-to-business (B2B) scenario that is supported by sales orders. The integration runs every night and is always the first integration to be tested.

All regression testing is completed manually.

Security

The company uses Dynamics AX 2012 R3 in all the countries/regions in which they operate.

Because VanArsdel, Ltd. operates within the United States, the company must comply with government financial compliance standards. Government compliance requires that VanArsdel, Ltd. manufacturing divisions must not be able to approve purchase orders. Manufacturing managers must not be able to access data in other manufacturing sites. The manufacturing divisions belong to a single legal entity with multiple sites.

Licensing

The implementation requires the following Dynamics 365 licenses:

- * 120 Supply Chain Management licenses

- * 60 Finance licenses

- * 50 Commerce licenses

Methodology

The implementation must use the VanArsdel, Ltd. proprietary methodology for the Dynamics 365 implementation. The methodology in the project template must use the Microsoft-recommended approach. Progress must be tracked in a central location for VanArsdel, Ltd.

Microsoft and Proseware, Inc. to view.

VanArsdel Ltd. requires a sample methodology in Lifecycle Services (LCS).

The project must coordinate project dates in the methodology with any required Microsoft touchpoints to ensure that the project is on track and implemented according to best practices.

Solution

The sales order entry Power Apps integration must be configured by using out-of-the-box Solutions-Integrations. The company has the following integration requirements:

- * Four integrations must run asynchronously.

- * Eight integrations must run synchronously.

- * The integrations must be able to run after applying updates to the system.

All items must have their own item pricing. Each item must have an MSRP and a selling price that is determined based on the date

and location.

Testing

The user reporting test case needs to be reviewed by using the same process in the test environment.

The Regression suite automation tool (RSAT) must be used to automate every critical scenario. All other testing must be performed manually.

integration 1 must be deployed first. All data must be created and tested in the correct sequence to ensure that pricing is applied correctly to the item.

Security

Dynamics 365 must be rolled out incrementally by country/region. The implementation must go live in the United States first and then continue to the other countries/regions over the next 12 months.

VanArsdel, Ltd. must assign access to new users based on the site of the users.

VanArsdel, Ltd. requires that Proseware, Inc. perform the following:

- * Objective 1. Determine the software licensing costs for the system based on the contracted costs determined during the start of the project.

- * Objective 2. Audit the security roles for users in the manufacturing division.

Some users report that too many fields are displayed when the users create records in the Dynamics 365 AX

2012 R3 instance. These fields often prevent users from being productive.

Statement of work concerns

Before the project kickoff, several of the VanArsdel, Ltd. IT team members had concerns after reviewing the statement of work.

The primary concerns were raised by the following team members

- * An administrator named Admin1 reports a performance impact on multiple large integrations with the Dynamics 365 AX 2012 R3 implementation.

- * An administrator named Admin2 reports a concern with environment management with the global rollout.

All concerns must be reviewed and scheduled with all solution architects in workshops.

Testing

The Dynamics 365 AX 2012 R3 instance experiences frequent issues due to users running reports for an extended period of time on the same Application Object Server (AOS) service. A user named User1 reports a delay retrieving the same report in Dynamics 365.

NEW QUESTION # 190

A company plans to implement Dynamics 365 Supply Chain Management. The company has the following requirements:

Use mobile devices for warehouse activities including cycle counting.

Set up automatic cycle counting work IDs and assign the IDs to workers.

Ensure that workers can group work IDs that are specific to a particular location, zone, or work pool.

Ensure that workers can specify a cycle counting work ID that has a status of Open.

Ensure that workers can count items in a warehouse location at any time.

You need to recommend cycle counting options that meet the company's requirements.

What should you recommend? To answer, drag the appropriate counting options to the correct requirements. Each counting option may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

□

Answer:

Explanation:

□

NEW QUESTION # 191

A company uses Dynamics 365 Finance.

The company receives a large number of accounts payable invoices on a regular basis that are currently being entered manually.

You need to research ways accounts payable invoices can be created automatically.

What should you recommend? To answer, drag the appropriate solutions to the correct scenarios. Each solution may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.
