Use Real VMware 3V0-21.23 Exam Questions And Achieve Brilliant Results
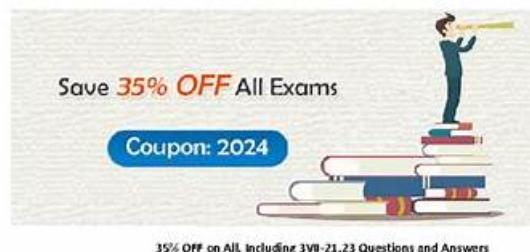

P.S. Free & New 3V0-21.23 dumps are available on Google Drive shared by PDFVCE: https://drive.google.com/open?id=1RYvu3ECnTguZDjc0dU2gXWGQ31EFVU0B

Our 3V0-21.23 test torrent was designed by a lot of experts in different area. You will never worry about the quality and pass rate of our 3V0-21.23 study materials, it has been helped thousands of candidates pass their 3V0-21.23 exam successful and helped them find a good job. If you choose our 3V0-21.23 study torrent, we can promise that you will not miss any focus about your 3V0-21.23 exam. It is proved that our 3V0-21.23 learning prep has the high pass rate of 99% to 100%, you will pass the 3V0-21.23 exam easily with it.

Try to have a positive mindset, keep your mind focused on what you have to do. Self- discipline is important if you want to become successful. Learn to reject temptations. As old saying goes, no pains no gains. Learning our 3V0-21.23 preparation materials will help you calm down. What you have learned will finally pay off. With the 3V0-21.23 Certification, you can have more oppotunities to the bigger companies. And our 3V0-21.23 exam guide is condersidered the best aid to obtain the certification.

2026 Fantastic 3V0-21.23: VMware vSphere 8.x Advanced Design Latest Braindumps

The desktop practice test design is best for self-appraisal and decreases the possibilities of disappointment in the VMware vSphere 8.x Advanced Design (3V0-21.23) Exam. It is upheld by each window PC which assists clients with clearing the VMware 3V0-21.23 certification exam with passing marks.The web-based format can be gotten online without introducing the product for the VMware 3V0-21.23 Exam. The web-based practice test is upheld by every one of the working frameworks and programs which will be useful for VMware vSphere 8.x Advanced Design (3V0-21.23) exam preparation.

VMware vSphere 8.x Advanced Design Sample Questions (Q14-Q19):

NEW QUESTION # 14
A customer provides the following list of requirements for their vSphere platform:
- REQ01 The solution should utilize dual network connections to eliminate single points of failure.
- REQ02 The solution should allow logs to be retained for a period of 30 days.
- REQ03 All user access to the platform should be recorded for audit purposes.
- REQ04 The solution should allow the management of multiple ESXi hosts.
- REQ05 The solution should allow users to view the remote console of virtual machines.
Which two of the listed requirements would be classified as non-functional requirements? (Choose two.)

- A. The solution should utilize dual network connections to eliminate single points of failure
- B. All user access to the platform should be recorded for audit purposes
- C. The solution should allow the management of multiple ESXi hosts
- D. The solution should allow users to view the remote console of virtual machines
- E. The solution should allow logs to be retained for a period of 30 days

Answer: A,E

NEW QUESTION # 15
What does a multi-site deployment design involve?

- A. Deploying vCenter Server in a highly available configuration within a single data center.
- B. Deploying vCenter Server across multiple data centers in different regions.
- C. Deploying vCenter Server on a single virtual machine across multiple data centers.
- D. Deploying vCenter Server on multiple physical servers for load balancing.

Answer: B

NEW QUESTION # 16
During a transformation project kick-off meeting, an architect highlights specific areas on which to focus while developing the new conceptual design.
Which two of the listed statements are business requirements- (Choose two.)

- A. There must not be a single point of failure for the virtual infrastructure
- B. There is no budget specifically assigned for disaster recovery
- C. The solution must allow data replication between sites
- D. The project should use the existing storage devices within the data center
- E. Sites must support a network latency of less than 12 ms round-trip time (RTT)

Answer: A,C

Explanation:
Describes why the system is being transformed, stipulate the business drivers that justify the transformation.
A >> Constraint
B >> Requirement
C >> Justification for the new solution
D >> Constraint Financial
E >> Justification for the new solution

NEW QUESTION # 17

Which requirements specify the number of virtual machines and cores needed for a virtualized system?

- A. Performance requirements
- B. Compute requirements
- C. Storage requirements
- D. Capacity requirements

Answer: B

NEW QUESTION # 18
An architect is designing a new vSphere 8 environment and needs to plan the migration of virtual machines from the source vSphere 7 infrastructure.
The following has been captured about the source infrastructure and project:
All virtual machines operate supported versions of Microsoft Windows
All virtual machines have VMware Tools 11 or higher installed
vCenter Enhanced Linked Mode is configured
VMware PowerCLI is available in the environment
No budget is available for discovery tooling
The architect must capture and review active services from inside running virtual machines to inform the migration design.
Considering the information available, which method can the architect use to acquire the information required?

- A. Deploy and review the service information from VMware Aria Operations for Applications
- B. Deploy and review the service information from VMware Aria Operations
- C. Request and review the information via VMware Tools and VMware PowerCLI
- D. Request and review the information via VMware vCenter

Answer: C

Explanation:
Given that VMware Tools 11 or higher is installed on all virtual machines and VMware PowerCLI is available in the environment, the architect can leverage PowerCLI to interact with VMware Tools and collect information about active services running inside the virtual machines.
VMware PowerCLI allows you to query virtual machines for information about their services by accessing the guest operating system, provided VMware Tools is installed and running. You can use PowerCLI cmdlets to retrieve service data, such as which services are running on the VM, their statuses, and other details necessary for planning the migration.
This option is cost-effective since there is no budget available for additional discovery tooling, and it aligns well with the existing tools and infrastructure already in place.

NEW QUESTION # 19
