## SAP Certified Associate - Managing SAP S/4HANA Cloud Private Edition Projects Sample Questions (Q79-Q84):

### NEW QUESTION # 79

What are some prerequisites if you want to transfer data with the Migrate Your Data - Migration Cockpit app using a separate SAP HANA database in SAP S/4HANA Cloud Private Edition? Note: There are 2 correct answers to this question.

- A. You have to set up the integration.
- B. You have to create the migration projects.
- C. You have to create the migration objects.
- D. You have to activate a certain business process.

**Answer: A,B**

### NEW QUESTION # 80

Where do you create test cases in SAP Cloud ALM to document formal tests?

- A. Test Execution app
- B. Test Plan app
- C. Test Preparation app
- D. Manage Your Test Processes app

**Answer: C**

Explanation:

Step 1 - Understanding the question

This question asks where to create test cases in SAP Cloud ALM to document formal tests.

SAP Cloud ALM provides a testing framework to plan, prepare, execute, and monitor test activities.

Step 2 - Evaluate each option

Option A: Test Preparation app

Correct.

The Test Preparation app in SAP Cloud ALM is used to create and manage test cases.

It allows users to define test case details, steps, expected results, and link them to requirements or business processes.

Option B: Test Plan app

Incorrect.

The Test Plan app is used to organize and group existing test cases into a testing cycle, not to create them.

Option C: Manage Your Test Processes app

Incorrect.

There is no specific app called "Manage Your Test Processes" in SAP Cloud ALM's testing module.

Option D: Test Execution app

Incorrect.

The Test Execution app is used to execute test cases that have already been created and assigned, not to create new ones.

### NEW QUESTION # 81

How would you describe the different dimensions of SAP's organizational change management framework?

Note: There are 3 correct answers to this question.

- A. Change leadership involves activities to enable all management levels to handle the cloud implementation and deal with resistance.
- B. Change effectiveness contains activities that can be applied to evaluate the impact of change management interventions.
- C. Change realization includes activities to realize the business benefits associated with the cloud implementation.
- D. Change communication encompasses activities to provide relevant project information to the different stakeholder groups at the right time.
- E. Change strategy covers activities to set up change management properly.

**Answer: B,C,D**

### NEW QUESTION # 82

What is the purpose of the Migration Server in an SAP S/4HANA Cloud Private Edition migration project?

- A. To replicate the HANA database in real-time.
- B. To provide a temporary environment for executing migration tools like Software Provisioning Manager.
- C. To store the backup files of the source system.
- D. To host the target SAP S/4HANA application server.

**Answer: B**

### NEW QUESTION # 83

In which workshop do you validate SAP standard functionality and collect delta requirements?

- A. Solution design
- B. Fit-to-standard
- C. Fit-to-gap
- D. Solution assessment

**Answer: B**

Explanation:

Step 1 - Understanding the question

The question asks which workshop is used to validate SAP standard functionality and collect delta requirements during an SAP S/4HANA Cloud, Private Edition project.

This is a key activity in the SAP Activate methodology, particularly within the Explore phase.

In SAP Activate, the Explore phase is where the customer and implementation team come together to review the SAP standard (best

practice) processes, confirm what fits the business, and identify what additional ("delta") requirements are needed.

Step 2 - Evaluate each option

Option A: Fit-to-gap

This term is not used in SAP Activate for SAP S/4HANA Cloud projects.

Older SAP implementation methods (like ASAP) used the term "fit-gap," but in SAP Activate, it was replaced with Fit-to-Standard, because SAP promotes the adoption of standard processes rather than heavy customization.

Result: Incorrect.

Option B: Solution assessment

This term generally refers to an initial evaluation of the customer's current system and business needs, usually done before the project starts (for example, during the Discover phase).

It is not the workshop where SAP standard processes are validated or where delta requirements are formally captured.

Result: Incorrect.

Option C: Solution design

The Solution Design workshop typically happens after Fit-to-Standard sessions, when teams design how the final solution will look based on confirmed requirements.

It is a design activity, not the stage where standard functionality is validated.

Result: Incorrect.

Option D: Fit-to-standard

This is the correct answer.

The Fit-to-Standard workshop is a central activity in the Explore phase of the SAP Activate methodology.

Its purpose is to:

- \* Demonstrate SAP Best Practice business processes in the system (usually through a preconfigured environment).
- \* Validate that the standard functionality meets the customer's business needs.
- \* Identify delta requirements - only where the standard process does not meet a critical business requirement.
- \* Document these delta requirements for review, prioritization, and potential configuration or enhancement in later phases.

Step 3 - Step-by-step explanation of how it works

\* Preparation - Before the workshop, the project team loads SAP Best Practices into the sandbox or quality system and prepares demo scripts for each process area (e.g., Finance, Procurement, Sales).

\* Execution - During the workshop:

\* The implementation team walks through SAP standard processes using live demonstrations in the system.

\* The business users and process owners review these processes.

\* Together, they confirm which processes can be adopted "as-is."

\* Validation - For each process:

\* If the SAP Best Practice meets the business requirement # it is marked as Fit.

\* If not # it is marked as Delta.

\* Documentation - The delta requirements are captured in a requirements management tool (such as SAP Cloud ALM or Solution Manager) with clear details for further design or configuration in later project phases.

\* Outcome - The result is a list of:

\* Standard processes to be adopted.

\* Delta requirements that may need extensions, configurations, or integrations.

Step 4 - Practical Examples

Example 1:

In a Procurement Fit-to-Standard workshop, SAP demonstrates the purchase requisition and purchase order process.

\* The customer confirms that the standard workflow matches their approval process (Fit).

\* However, they request an additional approval level for high-value orders (Delta). This delta is documented for later configuration.

Example 2:

In a Finance Fit-to-Standard workshop, SAP shows the standard Accounts Payable process.

\* The customer agrees to adopt SAP's three-way match for invoices (Fit).

\* They need a specific report for tax authority submission (Delta). This delta is captured for later design.

Step 5 - Final Answer

The correct answer is D. Fit-to-standard,

because it is the workshop in which SAP standard processes are validated and delta requirements are identified and documented during the Explore phase of SAP Activate.
