

Quiz SAP - Authoritative C_ADBTP_2601 Dumps PDF

SAP
C_WZADM_01 Certified Application Associate - SAP Build Work Zone - Implementation and Administration 2
Implementation and Administration Test Certification Cost

If you want to start your learning as quickly as possible, just choose us, we can do this for you. Our C_WZADM_01 study materials is famous for instant download, and you can get the downloading link and password within ten minutes after purchasing, if you don't receive, you can ask our service staff for help. Besides, C_WZADM_01 Exam Dumps of us contain both questions and answers, and you can check the answer when you finish practicing. C_WZADM_01 study materials are also have certain questions and it will help you to pass the exam successfully.

SAP Certified Application Associate - SAP Build Work Zone - Implementation and Administration Sample Questions (Q19-Q24):

NEW QUESTION # 19

Which of the following system types must you integrate manually into the SAP Build Work Zone Content Manager? Note: There are 2 correct Answers to this question.

- A. SAP IBP
- B. SAP Analytics Cloud
- C. SAP BTP ABAP
- D. SAP SuccessFactors

Answer: A,B

NEW QUESTION # 20

To use SAP Build Work Zone OData APIs or webhooks, you must connect to which of the following?

- A. Content Manager
- B. Digital Workplace Service (DWS)
- C. SAP API Management
- D. SAP BTP subaccount

Answer: B

Explanation:

To use SAP Build Work Zone OData APIs or webhooks, you must first connect to your SAP Business Technology Platform (BTP) subaccount. The subaccount provides access to the required services and resources for using the Build Work Zone APIs and webhooks. The other options listed (Content Manager, SAP API Management, Digital Workplace Service) are not directly related to connecting to and using the Build Work Zone APIs and webhooks.

NEW QUESTION # 21

Which of the following system types must you integrate manually into the SAP Build Work Zone Content Manager? (Choose two.)

- A. SAP IBP
- B. SAP Analytics Cloud

Pass Guaranteed Quiz 2023 Authoritative SAP C_WZADM_01: Certified Application Associate - SAP Build Work Zone - Implementation and Administration Test Certification Cost

It is our company that can provide you with special and individual service which includes our C_ADBTP_2601 preparation quiz and good after-sale services. Our experts will check whether there is an update on the question bank every day, so you needn't worry about the accuracy of study materials. If there is an update system, we will send them to the customer automatically. As is known to all, our C_ADBTP_2601 simulating materials are high pass-rate in this field, that's why we are so famous. If you are still hesitating, our C_ADBTP_2601 exam questions should be wise choice for you.

You also get the opportunity to download the latest C_ADBTP_2601 pdf questions and practice tests up to three months from the date of SAP Administrating SAP Business Technology Platform(C_ADBTP_2601) exam dumps purchase. So rest assured that with SAP C_ADBTP_2601 real dumps you will not miss even a single C_ADBTP_2601 Exam Questions in the final exam. Now take the best decision of your career and enroll in SAP Administrating SAP Business Technology Platform(C_ADBTP_2601) certification exam and start this journey with Administrating SAP Business Technology Platform(C_ADBTP_2601) C_ADBTP_2601 practice test questions.

Valid SAP C_ADBTP_2601 Study Plan, Study C_ADBTP_2601 Tool

In addition to the C_ADBTP_2601 exam materials, our company also focuses on the preparation and production of other learning materials. If you choose our C_ADBTP_2601 study guide this time, I believe you will find our products unique and powerful. Then you don't have to spend extra time searching for information when you're facing other exams later, just choose us again. As long as you face problems with the exam, our company is confident to help you solve. Give our C_ADBTP_2601 practice quiz a choice is

to give you a chance to succeed. We are very willing to go hand in hand with you on the way to preparing for C_ADBTP_2601 exam

SAP Administrating SAP Business Technology Platform(C_ADBTP_2601) Sample Questions (Q10-Q15):

NEW QUESTION # 10

SIMULATION

Enable Service Subscriptions

In the entitlements of a directory, add a service plan for a service subscription. Assign and create this subscription to/in a subaccount of the directory.

Task 1: Entitle a Service in a Directory

In your SAP BTP cockpit, enable entitlement management for your Partner directory.

In your Partner directory, entitle the standard (Application) service plan for the SAP Build Work Zone, standard edition.

Answer:

Explanation:

See the Explanation below for complete solution.

Explanation:

Before You Start

Log in to the SAP BTP Cockpit.

Open the correct Global Account.

Go to Directories.

Open the Partner directory.

Why this matters:

Both actions in this task must be done at the Partner directory level, not directly in a subaccount.

Step 1 - Open the Partner Directory

What to do

In the left navigation, click Directories.

Select Partner.

Explanation:

This opens the directory where you must manage entitlements for this task.

What to verify

You should now be inside the Partner directory page.

Step 2 - Open Entitlements

What to do

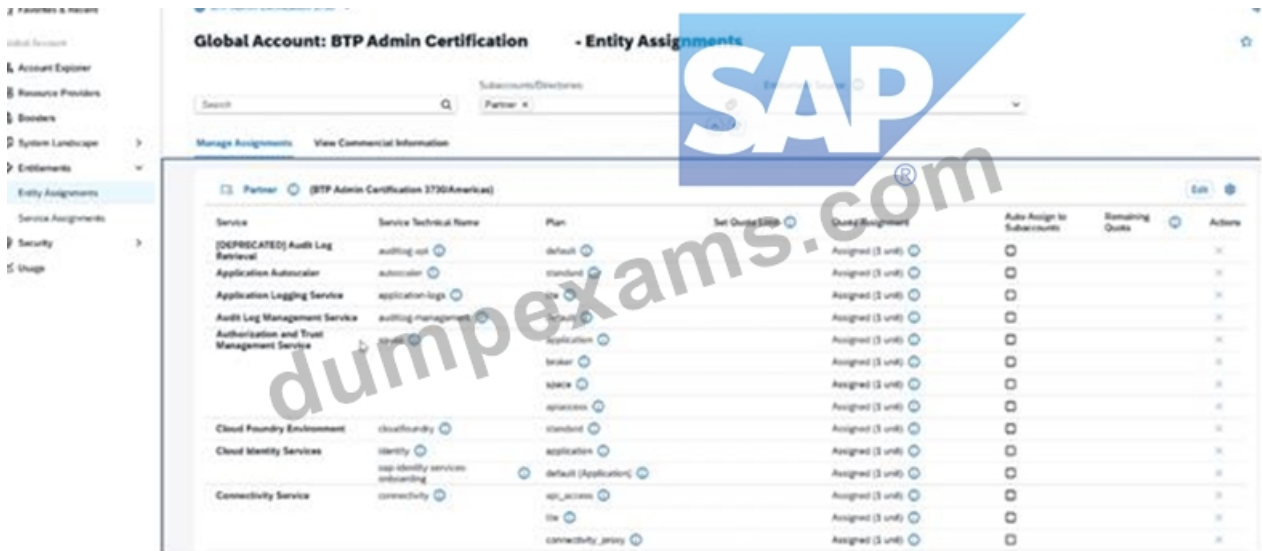

Inside the Partner directory, go to Entitlements.

Explanation:

This is the area where you manage quota and service plan assignments for the directory and its subaccounts.

What to verify

You should see the entitlements page for Partner.

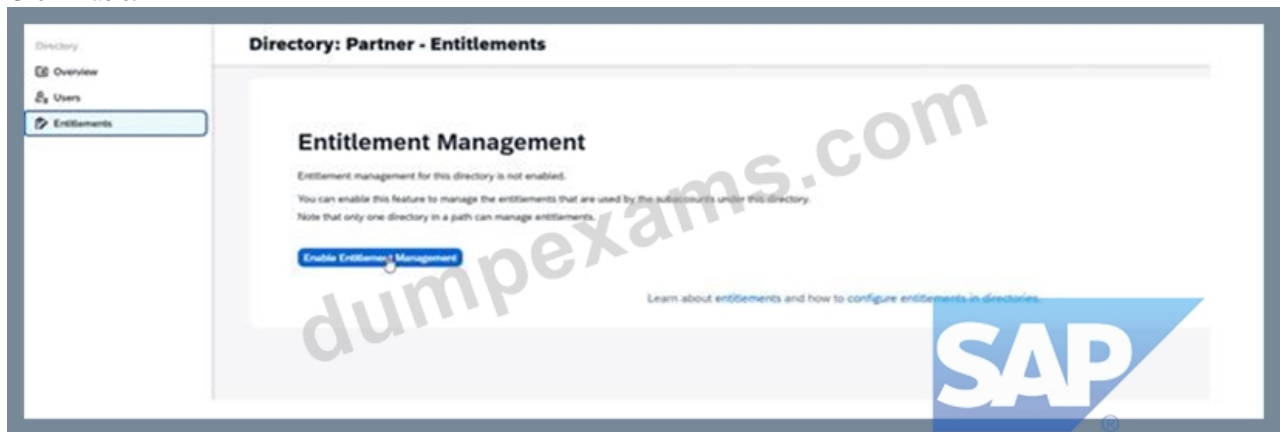

Step 3 - Enable Entitlement Management for the Partner Directory

What to do

In the Entitlements area, look for the option to Enable Entitlement Management.

Click Enable.

Explanation:

A directory must have entitlement management enabled before you can add and manage service plans there.

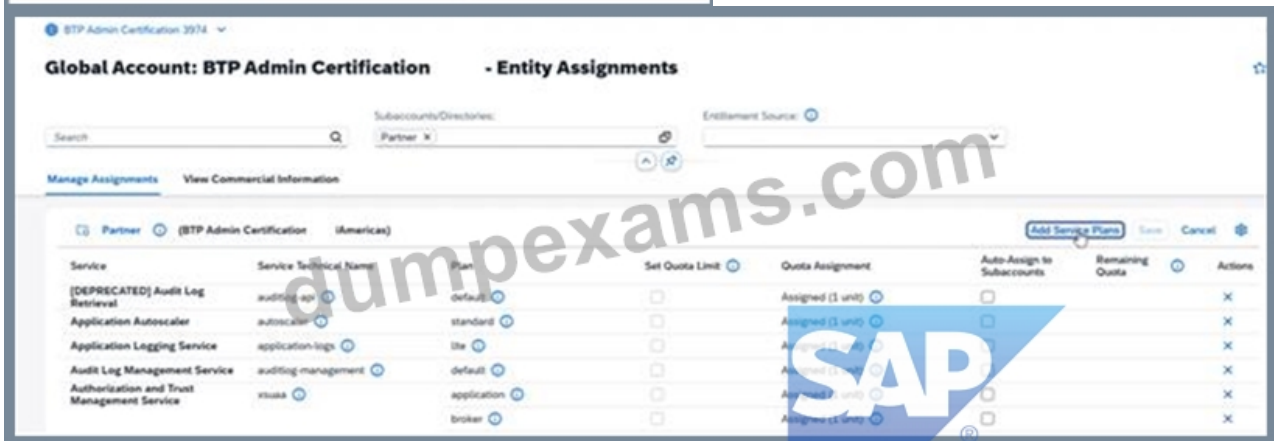

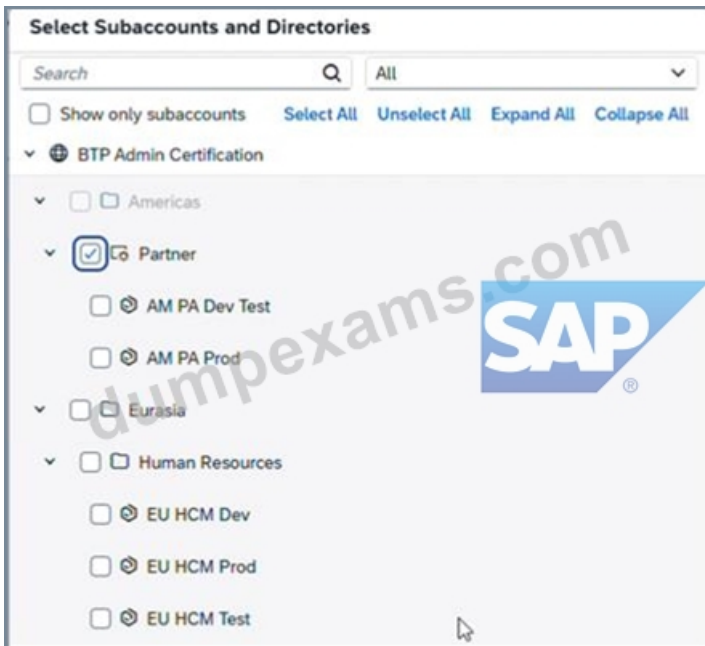

What to verify

After enabling, the Partner directory should allow entitlement assignment and management.

Step 4 - Start Adding a Service Plan

What to do

In the Entitlements page of the Partner directory, click Configure Entitlements or Add Service Plans.

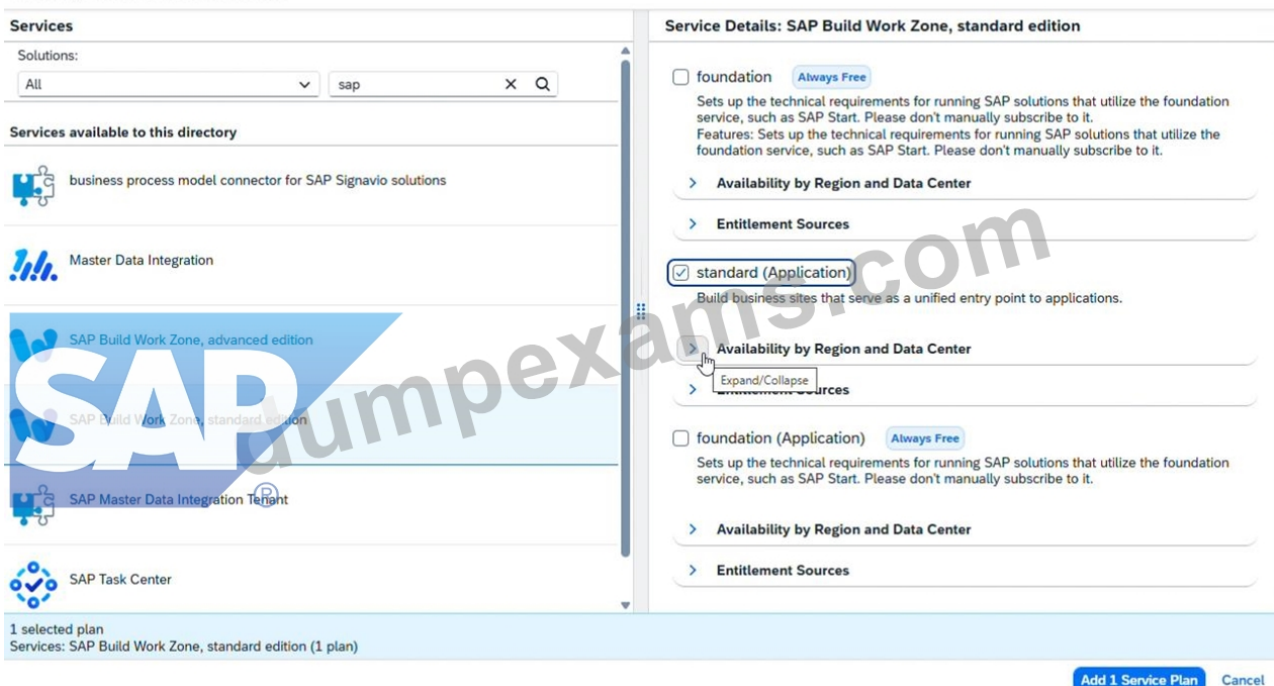

Explanation:

This opens the service catalog where you can select the service and plan to add.

What to verify

You should see the list of available services and plans.

Directory Partner: Add Service Plans

Step 5 - Find the Required Service

What to do

Search for or scroll to:

SAP Build Work Zone, standard edition

Select that service.

Explanation:

You must choose the exact service named in the task. Be careful not to select a different SAP Build service by mistake.

What to verify

The selected service should be:

SAP Build Work Zone, standard edition

Step 6 - Select the Correct Service Plan

What to do

Under the selected service, choose the service plan:

standard (Application)

Add the plan to the entitlement configuration.

Explanation:

This task requires the standard (Application) service plan specifically.

Do not choose another plan if more than one is listed.

What to verify

The selected plan should read exactly:

standard (Application)

Step 7 - Save the Entitlement Changes

What to do

Click Add, Save, or Confirm depending on the screen.

Then click Save for the entitlement configuration.

Explanation:

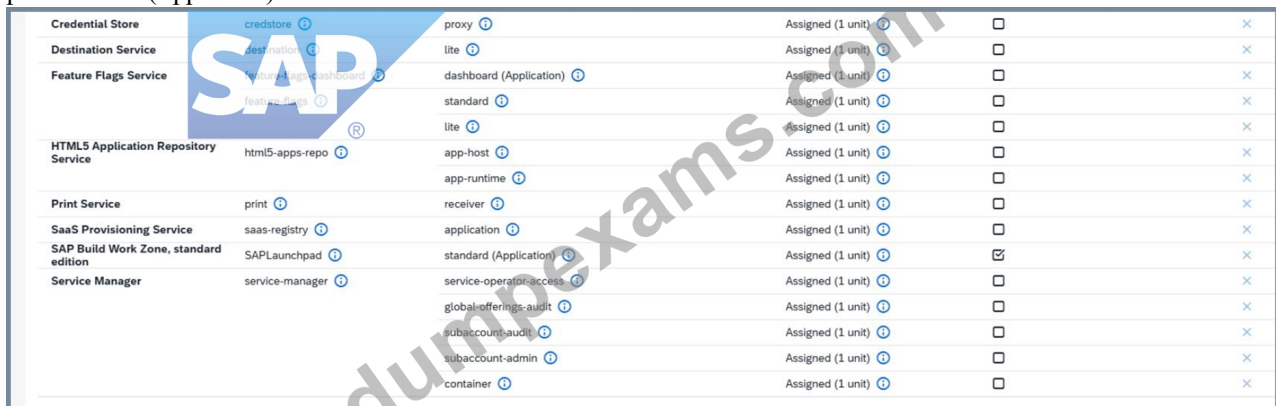

This commits the new service plan entitlement to the Partner directory.

What to verify

After saving, the entitlements list for Partner should include:

SAP Build Work Zone, standard edition

plan: standard (Application)

Credential Store	credstore	proxy	Assigned (1 unit)	<input type="checkbox"/>	×
Destination Service	destination	lite	Assigned (1 unit)	<input type="checkbox"/>	×
Feature Flags Service	featureflagsdashboard	dashboard (Application)	Assigned (1 unit)	<input type="checkbox"/>	×
		standard	Assigned (1 unit)	<input type="checkbox"/>	×
		lite	Assigned (1 unit)	<input type="checkbox"/>	×
HTML5 Application Repository Service	html5-apps-repo	app-host	Assigned (1 unit)	<input type="checkbox"/>	×
		app-runtime	Assigned (1 unit)	<input type="checkbox"/>	×
		receiver	Assigned (1 unit)	<input type="checkbox"/>	×
Print Service	print	application	Assigned (1 unit)	<input type="checkbox"/>	×
SaaS Provisioning Service	saas-registry	application	Assigned (1 unit)	<input type="checkbox"/>	×
SAP Build Work Zone, standard edition	SAPLaunchpad	standard (Application)	Assigned (1 unit)	<input checked="" type="checkbox"/>	×
Service Manager	service-manager	service-operator-access	Assigned (1 unit)	<input type="checkbox"/>	×
		global-offerings-audit	Assigned (1 unit)	<input type="checkbox"/>	×
		subaccount-audit	Assigned (1 unit)	<input type="checkbox"/>	×
		subaccount-admin	Assigned (1 unit)	<input type="checkbox"/>	×
		container	Assigned (1 unit)	<input type="checkbox"/>	×

Final Expected Result for Task 1

Inside the Partner directory:

Entitlement management is enabled

The service SAP Build Work Zone, standard edition is entitled

The plan standard (Application) is added

Common Mistakes to Avoid

1. Working in the wrong level

Do this in:

Partner directory

Not in:

Global Account

Subaccount

Another directory

2. Forgetting to enable entitlement management first

If entitlement management is not enabled for the directory, you may not be able to add the service plan properly.

3. Choosing the wrong service

Be sure you select:

SAP Build Work Zone, standard edition

Not another SAP Build service.

4. Choosing the wrong plan

You must select:

standard (Application)

NEW QUESTION # 11

SIMULATION

Enable a Cloud Foundry Environment

Task 2: Enable and Configure a Cloud Foundry Environment

In your SAP BTP cockpit, in the EU HCM Dev subaccount, enable the Cloud Foundry environment in the cf-eu10-004 landscape. Set the instance name to cf-eu-hcm-dev and the org name to btpops#####-eu-hcm-dev.

In the EU HCM Dev subaccount, create a space with the name activity-recording.

In the EU HCM Dev subaccount, create a space quota with the name half-org-quot a. Halve the available org quota for memory, routes, service, and instance memory for an unlimited number of app instances. Assign the space quota to activity-recording.

Answer:

Explanation:

See the Explanation below for complete solution.

Explanation:

Before you start

Log in to SAP BTP Cockpit.

Open the correct Global Account.

Go to Directories.

Open Human Resources.

Open the EU HCM Dev subaccount.

This matters because the task must be completed specifically in EU HCM Dev. SAP documents that Cloud Foundry is enabled at subaccount level, and the system creates a Cloud Foundry org linked to that subaccount.

Part 1 - Enable the Cloud Foundry environment

Step 1 - Open the subaccount overview

In EU HCM Dev, go to Overview.

Explanation:

SAP Help describes the cockpit flow for enabling Cloud Foundry from the subaccount Overview page.

What to verify

You should see a Cloud Foundry section on the overview page.

Step 2 - Start enabling Cloud Foundry

In the Cloud Foundry section, click Enable Cloud Foundry.

Explanation:

This starts creation of the Cloud Foundry organization for the subaccount. SAP notes that when you enable Cloud Foundry in a subaccount, the system automatically creates a Cloud Foundry org for it.

Step 3 - Enter the required Cloud Foundry values

In the enablement dialog, enter:

Landscape: cf-eu10-004

Instance Name: cf-eu-hcm-dev

Org Name: btpops#####-eu-hcm-dev

Then confirm by clicking Create or Enable.

Explanation:

The task gives you the exact landscape and naming values to use. SAP documentation shows that enabling Cloud Foundry in the cockpit requires naming the Cloud Foundry instance and org.

What to verify

After the process completes, the subaccount should show Cloud Foundry as enabled, with the org created for EU HCM Dev.

Enable Cloud Foundry

1
Basic Info

Enter basic info for your environment instance.

Environment: * Can't find what you're looking for?

Plan: *

Landscape: *

Instance Name: ⓘ

Org Name: ⓘ

i Cloud Foundry API endpoints may differ between subaccounts in the same region. The API endpoint for this subaccount is shown in the Cloud Foundry environment instance details.

Subaccount: EU HCM Dev - Overview

BTP Admin Certification / Eurasia / Human Resources / EU HCM Dev

General Cloud Foundry Environment Entitlements

[Manage environment instance](#)

[Disable Cloud Foundry](#)

Spaces (0)

Name	Applications	Service Instances
No spaces defined in this subaccount.		

Part 2 - Create the space

Step 4 - Open Spaces

In EU HCM Dev, after Cloud Foundry is enabled, open:

Cloud Foundry

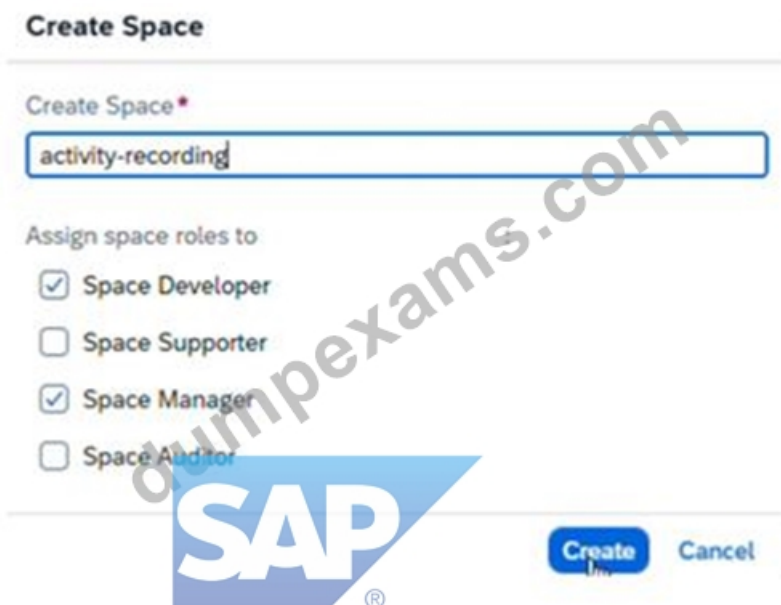

Spaces

Explanation:

SAP Help shows that spaces are created from the Spaces area after Cloud Foundry is enabled in the subaccount.

Step 5 - Create the space
 Click Create Space.
 Enter:
 Space Name: activity-recording
 Confirm by clicking Create.

Explanation:
 This creates the required Cloud Foundry space inside the org for EU HCM Dev. SAP's cockpit documentation and setup guides show this as the standard next step after enabling the environment.

What to verify

You should now see:

activity-recording

in the list of Cloud Foundry spaces.

Part 3 - Create the space quota

Step 6 - Open Cloud Foundry Space Quotas

In EU HCM Dev, open:

Cloud Foundry

Space Quotas

Explanation:

SAP Help states that, in the Cloud Foundry environment, the quotas allocated to a subaccount can be further distributed by creating space quota plans, and these are managed from the Cloud Foundry Space Quotas area.

Step 7 - Create a new space quota

Click Create Space Quota or New Space Quota.

Enter the quota name:

half-org-quota

Explanation:

This creates a quota plan that you will assign to the required space. SAP Help describes creating space quota plans in the subaccount and then assigning them to spaces.

Step 8 - Set quota values to half of the org quota

In the quota form, set the values to half of the available org quota for:

Memory

Routes

Services

Instance Memory

For App Instances, set:

Unlimited

Then save the quota.

Create Space Quota

i You are allowed to add a value above the org quota, but the org quota is the consumable limit you can reach.
To assign the "Unlimited" value, use -1.

Name: * half-org-quota

Space Memory (MB): * 512
Org Quota: 1024 MB (1GB)

Routes: * 5
Org Quota: 10

Service Instances: * 250
Org Quota: 500

Memory per Instance (MB): * 8192
Org Quota: 16384 MB (16GB)

App Instances: * -1
Org Quota: Unlimited

Allow Paid Services: OFF

SAP

Create Cancel

Explanation:

The simulation asks you to halve the available org quota for those four dimensions. SAP Help confirms that space quotas are used to limit resource consumption inside the org by defining values such as memory, routes, and service instances, and that these plans can then be assigned to spaces.

How to calculate "half"

Use the current org quota values shown in the Cloud Foundry quota screens and divide each by 2 before entering it.

Examples:

If org memory = 2 GB, enter 1 GB

If routes = 20, enter 10

If services = 200, enter 100

If instance memory = 2 GB, enter 1 GB

What to verify

The new quota plan should exist as:

half-org-quota

with the reduced values saved.

Subaccount: EU HCM Dev - Space Quotas

Space Quotas Quota Assignments

Part 4 - Assign the quota to the space

Step 9 - Assign the quota to activity-recording

Open the newly created quota:

half-org-quota

Choose Assign Spaces or Assign to Spaces

Select:

activity-recording

Save the assignment

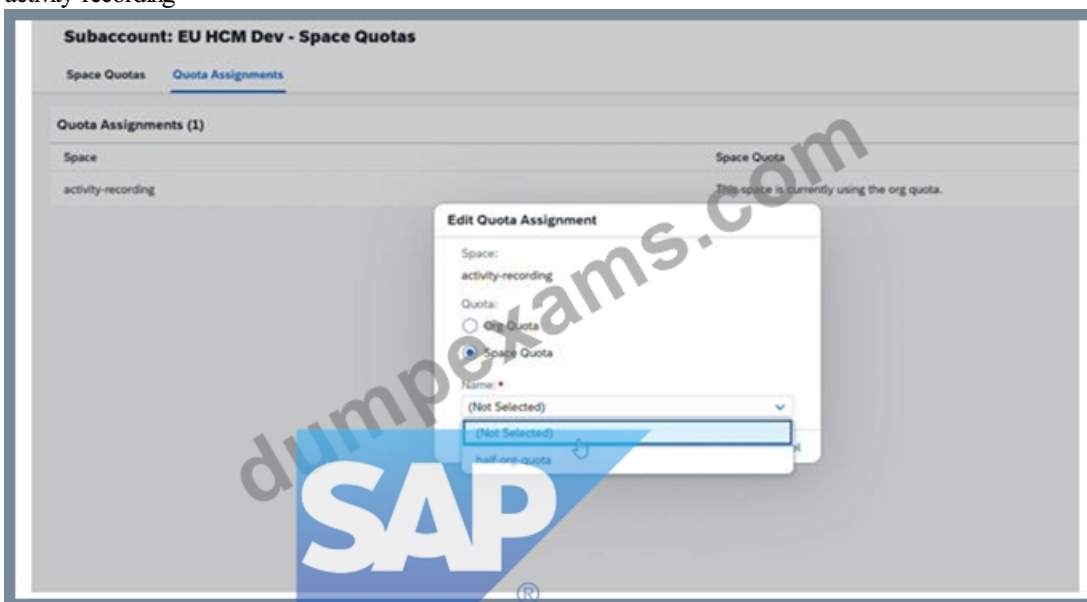

Explanation:

SAP Help states that after creating a space quota, you assign it to one or more spaces from the space quota management flow.

What to verify

The quota half-org-quota should now be assigned to:

activity-recording

Edit Quota Assignment

Space:
activity-recording

Quota:
 Org Quota
 Space Quota

Name: *

Final expected result

Inside EU HCM Dev:

Cloud Foundry is enabled

landscape is cf-eu10-004

instance name is cf-eu-hcm-dev

org name is btpops#####-eu-hcm-dev

space activity-recording exists

space quota half-org-quota exists

memory, routes, services, and instance memory are each set to half of the available org quota app instances are unlimited quota half-org-quota is assigned to activity-recording Common mistakes to avoid Enabling Cloud Foundry in the wrong subaccount; it must be EU HCM Dev.

Using the wrong landscape; the task explicitly requires cf-eu10-004.

Typing the wrong org name; use exactly btpops#####-eu-hcm-dev.

Forgetting to create the space before assigning the quota.

Entering full org quota instead of half.

Limiting app instances to a number instead of leaving them unlimited.

Creating the quota but not assigning it to activity-recording.

NEW QUESTION # 12

SIMULATION

Create Directories and Subaccounts

In a global account for SAP Business Technology Platform (BTP), create a hierarchy of subaccounts using directories.

Task 1: Create Directories

In your SAP BTP cockpit, create the directory Americas (Description: Americas Accounts) with your global account as the parent.

Create the directory Eurasia (Description: Eurasia Accounts) with your global account as the parent.

Create the directory Partner (Description: Partner Accounts) with the Americas directory as the parent. Add the label access with value external.

Create the directory Human Resources (Description: Human Resources Accounts) with the Eurasia directory as the parent. Add the label access with value internal.

Answer:

Explanation:

See the Explanation below for complete solution

Explanation:

Task 1: Create Directories

You need to create these directories:

Americas

Eurasia

Partner under Americas with label access=external

Human Resources under Eurasia with label access=internal

Before You Start

Log in to the SAP BTP Cockpit.

Make sure you are inside the correct Global Account.

Open the left-side navigation menu.

Why this is important:

All directories in this task must be created inside the correct global account hierarchy. If you create them in the wrong location, the simulation result will be incorrect.

Step 1 - Create Directory Americas

What to do

In the SAP BTP Cockpit, select your Global Account.

In the left navigation menu, click Directories.

Click Create or Create Directory.

Fill the fields as follows:

Name: Americas

Description: Americas Accounts

Parent: your Global Account

Click Create.

Create Directory

Display Name *	Description
<input type="text" value="Americas"/>	<input type="text" value="Americas Accounts"/>
Parent *	
<input type="text" value="BTP Admin Certification xxxxx"/>	

> **Advanced**

Cockpit supports multi-level directories in your account structure. You can add your new directory directly to the root global account or to an existing directory by choosing the location under **Parent**.

Explanation:

This creates a top-level directory directly under the global account.

It will later be used as the parent for the Partner directory.

What to verify

After creation, you should see:

Americas

listed under the directories of the global account.

Step 2 - Create Directory Eurasia

What to do

Stay in Directories.

Click Create Directory again.

Fill the fields:

Name: Eurasia

Description: Eurasia Accounts

Parent: your Global Account

Click Create.

Create Directory

Display Name* Description

Parent*

> **Advanced**

Cockpit supports multi-level directories in your account structure.

You can add your new directory directly to the root global account or to an existing directory by choosing the location under **Parent**.

Explanation:

This creates another top-level directory, parallel to Americas.

What to verify

You should now see both:

Americas

Eurasia

under the global account.

Step 3 - Create Directory Partner under Americas

What to do

In the Directories area, select Americas.

Click Create Directory.

Enter:

Name: Partner

Description: Partner Accounts

Parent: Americas

Locate the Labels section.

Add a new label:

Key: access

Value: external

Click Create.

Name	Type	Environment	Provider	Region	Changed On
BTP Admin Certification XXXX	Global Account				March 25, 2026, 5:11:2...
Americas	Directory				March 26, 2026, 3:27:5...
Eurasia	Directory				March 26, 2026, 3:26...

Edit

Go to Overview

More Info

Create Directory

Create Subaccount

Select Parent

Search

Show only directories I can create in Expand All Collapse All

▼ BTP Admin Certification xxxx

- Americas
- Eurasia

Select Cancel

Create Directory

Display Name * Description

Parent *

▼ **Advanced**

Enable entitlement management Enable user management

Add labels to this directory.

Name: Values:

Create Cancel

Explanation:

This creates Partner as a child directory under Americas.

The label is required and must be entered exactly:

access = external

This label helps classify the directory.

What to verify

Under Americas, you should now see:

Partner

and the directory should contain the label:

access=external

Step 4 - Create Directory Human Resources under Eurasia

What to do

Go back to the Directories list.

Select Eurasia.

Click Create Directory.

Enter:

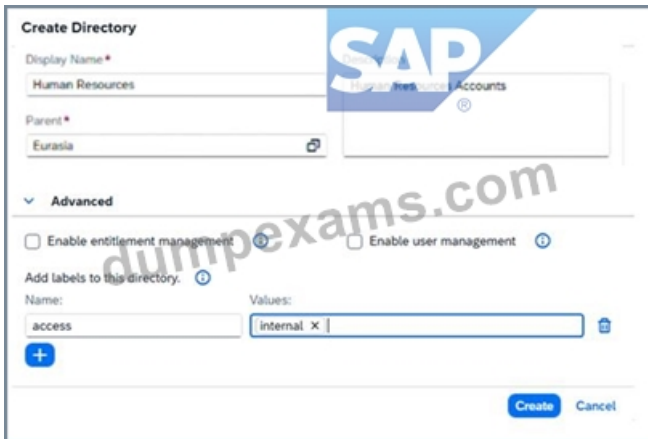

Name: Human Resources

Description: Human Resources Accounts

Parent: Eurasia

In the Labels section, add:

Key: access
Value: internal
Click Create.

Explanation:

This creates Human Resources as a child directory under Eurasia.

The required label is:

access = internal

What to verify

Under Eurasia, you should now see:

Human Resources

and the label should be:

access=internal

Final Expected Directory Structure

After completing Task 1, your structure must be exactly like this:

Global Account

Americas

Partner

Label: access=external

Eurasia

Human Resources

Label: access=internal

Name	Type	Environment	Provider	Region	Labels	Changed On
STP Admin Certification: XXXX	Global Account					March 20, 2026, 6:56:2...
Americas	Directory					March 22, 2026, 4:25:1...
Partner	Directory				1 label	March 22, 2026, 4:29:2...
Human Resources	Directory				1 label	March 22, 2026, 4:26:0...

Important Checks Before Moving On

Verify all of the following:

Americas exists

Eurasia exists

Partner is under Americas

Human Resources is under Eurasia

Partner has label access=external

Human Resources has label access=internal

All names and descriptions are entered exactly as required

Common Mistakes to Avoid

1. Wrong parent

Partner must be created under Americas

Human Resources must be created under Eurasia

2. Wrong label key or value

Use exactly:

access → external

access → internal

3. Spelling errors

Be careful with:

Americas

Eurasia
Partner
Human Resources

4. Creating all directories directly under the global account
Only Americas and Eurasia are direct children of the global account.
Partner and Human Resources must be child directories.

NEW QUESTION # 13

SIMULATION

Establish Shared Services

Task 1: Create a Shared Services Directory and Subaccounts

In your SAP BTP cockpit, create the directory Shared Services (Description: Shared Accounts) with your global account as the parent.

In the Shared Services directory, create the subaccount SH Dev (Description: Shared Services Development) with subdomain `btppops#####-sh-dev` in the region Amazon Web Services (AWS) → Europe (Frankfurt) `cf-eu10`.

In the Shared Services directory, create the subaccount SH Ops (Description: Shared Services Operations) with subdomain `btppops#####-sh-ops` in the region Amazon Web Services (AWS) → Europe (Frankfurt) `cf-eu10`.

Answer:

Explanation:

See the Explanation below for complete solution.

Explanation:

Before You Start

Log in to the SAP BTP Cockpit.

Open the correct Global Account.

Make sure you are working in the correct global account before creating anything.

Why this matters:

The new directory and both subaccounts must be created inside the correct global account hierarchy.

Part A - Create the Shared Services Directory

Step 1 - Open Directories

What to do

In the SAP BTP Cockpit, open your Global Account.

In the left navigation menu, click Directories.

Explanation:

This is where you create and manage directory structures under the global account.

What to verify

You should now see the list of existing directories.

Step 2 - Create the Directory Shared Services

What to do

Click Create or Create Directory.

Enter the following values:

Name: Shared Services

Description: Shared Accounts

Parent: your Global Account

Click Create.

Create Directory

Display Name*

Description

Parent*

> **Advanced**

Cockpit supports multi-level directories in your account structure.
 You can add your new directory directly to the root global account or to an existing directory by choosing the location under **Parent**.

Explanation:

This creates a new top-level directory directly under the global account.

It will be used to hold the shared-services subaccounts.

What to verify

You should now see:

Shared Services

under the global account.

Part B - Create the SH Dev Subaccount

Step 3 - Open the Shared Services Directory

What to do

In the directory list, select Shared Services.

Explanation:

Both required subaccounts must be created inside this directory.

What to verify

You should now be inside the Shared Services directory.

Step 4 - Open Subaccounts

What to do

Inside Shared Services, open Subaccounts.

Click Create → Subaccount.

Explanation:

This opens the subaccount creation screen.

Step 5 - Create SH Dev

What to do

Enter the following:

Display Name / Name: SH Dev

Description: Shared Services Development

Subdomain: btpops####-sh-dev

Set the region as:

Cloud Provider: Amazon Web Services (AWS)

Region: Europe (Frankfurt)

Technical Region / Environment: cf-eu10

Then click Create.

Explanation:

This creates the shared services development subaccount in the required AWS Frankfurt region.

What to verify

After creation, you should see:

SH Dev

inside the Shared Services directory.

Create Subaccount

Display Name *	SH Dev	Description	Shared Services Development
Region *	Europe (Frankfurt) - AWS		
Subdomain * ⓘ	btpops xxxx sh-dev	Parent *	Shared Services

> **Advanced**

Cockpit supports multi-level directories in your account structure. You can add your new subaccount directly to the root global account or to an existing directory by choosing the location under **Parent**.

Create
Cancel

Part C - Create the SH Ops Subaccount

Step 6 - Start a New Subaccount

What to do

Still inside Shared Services, click Create → Subaccount again.

Explanation:

This opens the form for the second required subaccount.

Step 7 - Create SH Ops

What to do

Enter the following:

Display Name / Name: SH Ops

Description: Shared Services Operations

Subdomain: btpops#####-sh-ops

Set the region as:

Cloud Provider: Amazon Web Services (AWS)

Region: Europe (Frankfurt)

Technical Region / Environment: cf-eu10

Then click Create.

Create Subaccount

Display Name *

Description

Region *

Subdomain *

Parent *

> **Advanced**

Cockpit supports multi-level directories in your account structure. You can add your new subaccount directly to the root global account or to an existing directory by choosing the location under Parent.

Create **Cancel**

Explanation:

This creates the shared services operations subaccount in the same required region.

What to verify

After creation, you should see:

SH Ops

inside the Shared Services directory.

Final Expected Result for Task 1

You should now have:

Directory

Shared Services

Description: Shared Accounts

Parent: Global Account

Subaccounts inside Shared Services

SH Dev

Description: Shared Services Development

Subdomain: btpops#####-sh-dev

Region: AWS → Europe (Frankfurt) cf-eu10

SH Ops

Description: Shared Services Operations

Subdomain: btpops#####-sh-ops

Region: AWS → Europe (Frankfurt) cf-eu10

Name	Type	Environment	Provider	Region	Labels	Changed On
Global Account	Global Account					March 25, 2026, 5:11:2...
Americas	Directory					March 26, 2026, 3:27:5...
Partner	Directory (Managed)				1 label	March 26, 2026, 3:50:1...
AM PA Dev Test	Subaccount	Multi-Environment	Microsoft Azure	US West (WA)		March 26, 2026, 3:35:3...
AM PA Prod	Subaccount	Multi-Environment	Microsoft Azure	US West (WA)		March 26, 2026, 3:39:3...
Europe	Directory					March 26, 2026, 3:28:2...
Human Resources	Directory				1 label	March 26, 2026, 3:43:0...
EU HCM Dev	Subaccount	Multi-Environment	Amazon Web Services (AWS)	Europe (Frankfurt) - AWS		March 26, 2026, 3:43:4...
EU HCM Prod	Subaccount	Multi-Environment	Amazon Web Services (AWS)	Europe (Frankfurt) - AWS		March 26, 2026, 3:48:3...
EU HCM Test	Subaccount	Multi-Environment	Amazon Web Services (AWS)	Europe (Frankfurt) - AWS		March 26, 2026, 3:46:5...
Shared Services	Directory					March 26, 2026, 4:14:2...
SH Dev	Subaccount	Multi-Environment	Amazon Web Services (AWS)	Europe (Frankfurt) - AWS		March 26, 2026, 4:15:5...
SH Ops	Subaccount	Multi-Environment	Amazon Web Services (AWS)	Europe (Frankfurt) - AWS		March 26, 2026, 4:17:0...

Common Mistakes to Avoid

1. Creating the directory in the wrong place

Shared Services must be created with:

parent = Global Account

2. Creating the subaccounts outside the directory

Both subaccounts must be created inside:

Shared Services

3. Wrong subdomain values

Use exactly:

bt pops#####-sh-dev

bt pops#####-sh-ops

Only replace ##### with your global account number.

4. Wrong region

Both subaccounts must use:

Amazon Web Services (AWS)

Europe (Frankfurt)

cf-eu10

5. Mixing up SH Dev and SH Ops

Be careful:

SH Dev = Shared Services Development

SH Ops = Shared Services Operations

NEW QUESTION # 14

.....

IT exam become more important than ever in today's highly competitive world, these things mean a different future.
