According the data which is provided and tested by our loyal customers, our pass rate of the JN0-253 Exam Questions is high as 98% to 100%. It is hard to find such high pass rate in the market. And the quality of the JN0-253 training guide won't let you down.

Juniper Mist AI, Associate (JNCIA-MistAI) Sample Questions (Q58-Q63):

NEW QUESTION # 58

Which three categories of alert types are available in Juniper Mist? (Choose three.)

- A. Infrastructure
- B. Site
- C. Marvis
- D. Users
- E. Security

Answer: A,C,E

Explanation:

Alerts represent network and device issues that are ongoing. Juniper Mist™ categorizes them as follows:

* Infrastructure Alerts-Repeated events involving servers and protocols that can potentially affect a large number of clients. For example, an event during which a Domain Name System (DNS), Dynamic Host Configuration Protocol (DHCP), or RADIUS server is unreachable can affect many clients.

Similarly, if a power supply on a switch is in alarm state, a large number of clients and a large amount of traffic could be affected.

* Marvis Alerts-Repeated events that Marvis tracks on the Marvis Actions dashboard. For example, if an access point (AP) regularly fails health checks, you'll see a Marvis alert for it.

* Security Alerts-Repeated events that could dramatically affect network security. For example, these alerts appear if a rogue AP is detected and clients start connecting to it.

* Certificate Alerts-Notification for expired, and soon-to-expire, user-added digital certificates. These include RadSec (configured at Organization > Settings > RadSec Certificates and AP RadSec certificate), SSO (configured at Organization > Settings > Single Sign-On), and PSK Portal IDP certificates (configured at Organization > Client Onboarding). Certificate alerts appear on the Alerts page and begin 30 days before the certificate's expiry date, then the notification repeats 15, 7, 3, and 1 day before expiration unless the certificate is renewed. .

NEW QUESTION # 59

Which statement correctly describes Juniper Mist organization IDs?

- A. They are in CSV format.
- B. They are created manually.
- C. They are read-only.
- D. They can be edited.

Answer: C

Explanation:

In the Juniper Mist Cloud platform, each organization is automatically assigned a unique Organization ID upon creation. This ID serves as a permanent, system-generated identifier used for API authentication, integration, and cross-service communication.

According to the Juniper Mist Cloud Administration and API Integration Guide:

"Organization IDs are automatically generated by the Mist Cloud at the time of organization creation and are read-only system values that cannot be edited or modified by administrators." This ensures that every organization is uniquely identifiable across Mist's distributed cloud infrastructure. The Organization ID remains consistent even if the organization name or configuration changes.

Therefore, the correct answer is D. They are read-only.

NEW QUESTION # 60

You want to change the default language for your Juniper Mist portal.
What will accomplish this task?

- A. Use the Change Language drop-down list of the Juniper Mist portal.
- B. Select your ranked language choice from the Alerts page.
- C. Input your primary language in the My Accounts page.
- D. Define your language using Organization templates.

Answer: A

Explanation:

The Juniper Mist Cloud portal provides a user-friendly interface that supports multiple languages to enhance accessibility for global users. The language preference determines the display language for menus, dashboards, and configuration pages across the Mist UI. According to the Juniper Mist Cloud Administration Guide, the portal's language can be modified as follows:

"Users can change the display language of the Mist portal using the Change Language drop-down list located in the upper-right corner of the interface." This option allows users to immediately switch the UI language without affecting other users in the organization or requiring administrative permissions. The change is applied per user profile and is stored for future sessions.

Other listed options are invalid:

- * A: The Alerts page does not include language settings.
- * B: The My Account page shows personal info but not display language options.
- * C: Organization templates are unrelated to UI preferences.

Therefore, the correct answer is D. Use the Change Language drop-down list of the Juniper Mist portal.

NEW QUESTION # 61

What does the "Exceeded" status mean for a subscription?

- A. The subscription exceeds the number of maximum allowable APs.
- B. The subscription is nearing its expiration date.
- C. The allowed usage within the subscription has been surpassed.
- D. The subscription has been cancelled.

Answer: C

Explanation:

The "Exceeded" status for a subscription means that the allowed usage defined within the subscription has been surpassed.

This typically refers to exceeding limits such as the number of devices, data usage, or other metrics specified in the subscription plan. Exceeding these limits may require action such as upgrading the subscription plan to accommodate the additional usage.

NEW QUESTION # 62

Which two statements are correct after you request the subscription renewal using e-mail? (Choose two.)

- A. Juniper Mist sends a welcome package with promotional materials.
- B. Juniper Mist processes the order and sends an activation code.
- C. Juniper Mist sends a cancellation notice.
- D. Juniper Mist e-mails the support request for the selected subscriptions.

Answer: B,D

Explanation:

When a customer requests a subscription renewal for Juniper Mist services via e-mail, the process is handled through a coordinated workflow between the Juniper Mist Cloud licensing system and Juniper Support. The renewal request ensures that existing service entitlements—such as Wireless Assurance, Wired Assurance, WAN Assurance, Marvis AI, or Premium Analytics—continue without interruption.

According to the Juniper Mist Cloud Licensing and Subscription Management Guide, the renewal workflow is described as follows: "When a renewal request is submitted via e-mail, Juniper Mist support receives and validates the request, initiates processing for the selected subscriptions, and issues a new activation code once the renewal is completed." Here's what happens after the renewal

* C. Once processed, Juniper Mist generates and delivers an activation code via e-mail that must be entered into the Mist portal to activate the renewed subscription(s).

* A:No promotional materials or physical packages are sent.

Therefore, the correct answers are B. Juniper Mist e-mails the support request for the selected subscriptions and C. Juniper Mist processes the order and sends an activation code.

NEW QUESTION # 63

To ensure your success, you require Juniper JN0-253 Exam Questions that provide comprehensive and relevant information for a fully prepared approach to the Mist AI, Associate (JNCIA-MistAI) (JN0-253) exam.
