PEGACPDC25V1 Practice Training - PEGACPDC25V1 Free Download & PEGACPDC25V1 Updated Torrent

The language in our Pegasystems PEGACPDC25V1 test guide is easy to understand that will make any learner without any learning disabilities, whether you are a student or a in-service staff, whether you are a novice or an experienced staff who has abundant experience for many years. It should be a great wonderful idea to choose our PEGACPDC25V1 Guide Torrent for sailing through the difficult test.

Pegasystems Certified Pega Decisioning Consultant 25 Sample Questions (Q90-Q95):

NEW QUESTION # 90
A financial services company has implemented always-on outbound campaigns for three credit card offers:
Standard card. Rewards card, and Rewards Plus card. The marketing team observes that customers who are qualified for multiple actions receive different numbers of offers, depending on the configuration of the volume constraint mode. To optimize customer engagement, the system administrator must choose between constraint modes.
Which volume constraint mode ensures that customers receive all actions for which they qualify, provided the actions do not reach volume limits?

- A. Sequential action delivery mode
- B. As a group for the context (output all actions)
- C. Return any action that does not exceed constraint
- D. Individually for each action

Answer: C

NEW QUESTION # 91

	Credit Score	Credit Score	Average Balance	Result
	>=	<	>=	
If	400	600	30000	Good
else if	200	400	20000	Fair
else if	100	200	10000	Poor
else if	50	100	1000	Very Poor
Otherwise				Very Poor

U+ Bank wants to offer credit cards only to low-risk customers. The customers are divided into various risk segments from Good to Very Poor. The risk segmentation rules that the business provides use the Average Balance and the customer Credit Score.
As a decisioning architect, you decide to use a decision table and a decision strategy to accomplish this requirement in Pega Customer Decision Hub.
Using the decision table, which label is returned for a customer with a credit score of 240 and an average balance 35000?

- A. Poor
- B. Fair
- C. Good
- D. Very Poor

Answer: A

Explanation:
Using the decision table, you can find the label for a customer with a credit score of 240 and an average balance of 35000 by following these steps:
* Start from the top row and check if the customer's credit score is less than 150. If yes, then the label is Very Poor. If no, then move to the next row.
* Check if the customer's credit score is less than 175 and their average balance is less than 25000. If yes, then the label is Poor. If no, then move to the next row.
* Check if the customer's credit score is less than 200 and their average balance is less than 50000. If yes, then the label is Fair. If no, then move to the next row.
* Check if the customer's credit score is less than 250 and their average balance is less than 75000. If yes, then the label is Good. If no, then move to the last row.
* The last row applies to all other cases that do not match any of the previous conditions. The label for this row is Very Poor.
In this case, the customer's credit score is not less than 150, so the first row does not apply. The customer's credit score is less than 175, but their average balance is not less than 25000, so the second row does not apply either. The customer's credit score is not less than 200, so the third row does not apply. The customer's credit score is less than 250 and their average balance is less than 75000, so the fourth row applies. Therefore, the label for this customer is Poor.

NEW QUESTION # 92
A volume constraint uses the Return any action that does not exceed
constraint mode. The following tables show the configuration of the volume constraints and the list of customers in the outbound segment:

Volume Constraints

Key	Value	Maximum
Channel	SMS	2
Action	Silver card	1

Customers

Interaction ID	Action	Channel
CUST-01	Gold Card	Push
CUST-02	Gold Card	Email
CUST-02	Silver Card	Push
CUST-03	Platinum Card	Email
CUST-03	Diamond Card	SMS
CUST-04	Diamond Card	Direct Mail
CUST-05	Silver Card	SMS
CUST-05	Diamond Card	Push

The outbound run selects customers in the following order to apply the volume constraints: CUST-01, CUST-02, CUST-03, and CUST-05.
Based on the configuration of the volume constraints for each channel, which offer does CUST-05 receive?

- A. Silver card and Diamond card
- B. Diamond card
- C. None
- D. Silver card

Answer: B

Explanation:
CUST-05 receives the Diamond card offer because it is the only action that does not exceed the volume constraint for the email channel. The Silver card offer has already reached its limit of 2 emails per day, so it is not eligible for CUST-05. The volume constraint mode Return any action that does not exceed means that any action that meets the eligibility and suitability criteria and does not violate the volume constraint will be returned, even if there are other actions with higher priority or propensity. NEW QUESTION # 93
U+ Bank wants to send promotional emails related to credit card offers to their qualified customers. The business intends to use the same action flow template with the desired flow pattern for all the credit card actions.
What do you configure to implement this requirement?

- A. Email treatment
- B. Output template
- C. File template
- D. Dynamic template

Answer: D

Explanation:
To implement this requirement, you need to configure a dynamic template in Customer Decision Hub. A dynamic template is a type of template that allows you to define a common action flow pattern for a group of actions that share similar characteristics, such as channel, issue, or group. You can specify which properties and components are required for each action in the group, and how they

are mapped to the action flow template. This way, you can reuse the same action flow template for all the credit card actions, while still allowing some variations in their content and configuration. Verified References: Pega Academy - Decisioning Consultant - Creating dynamic templates

NEW QUESTION # 94
U+- Bank uses Next-Best-Action Designer to configure engagement policies for different customer segments.
A business user wants to create reusable policy conditions that can apply across multiple actions and campaigns. The user must understand when the save-to-library feature is available.
When is the save-to-library option unavailable for engagement policy conditions?

- A. When the business user configures the conditions at the action level.
- B. When the business user configures the conditions with strategy rules or parameterized When conditions.
- C. When the business user applies conditions to group-level policies.
- D. When the business user configures the conditions with arbitration parameters.

Answer: B

NEW QUESTION # 95
......

Our PEGACPDC25V1 practice braindumps not only apply to students, but also apply to office workers; not only apply to veterans in the workplace, but also apply to newly recruited newcomers. And our PEGACPDC25V1 study materials use a very simple and understandable language, to ensure that all people can learn and understand. Besides, our PEGACPDC25V1 Real Exam also allows you to avoid the boring of textbook reading, but let you master all the important knowledge in the process of doing exercises.
