

# EAEP2201 Exam Assessment, EAEP2201 New Practice Questions

What's more, part of that GetValidTest EAEP2201 dumps now are free: [https://drive.google.com/open?id=1M1zrPLgars\\_V49lhGs9jSsYcA\\_txt2g-](https://drive.google.com/open?id=1M1zrPLgars_V49lhGs9jSsYcA_txt2g-)

Our EAEP2201 practice questions are carefully compiled by our professional experts to be sold all over the world. So the content should be easy to be understood. The difficult questions of the EAEP2201 exam materials will have vivid explanations. So you will have a better understanding after you carefully see the explanations. At the same time, our EAEP2201 Real Exam just needs to cost you a few spare time. After about twenty to thirty hours' practice, you can completely master all knowledge.

Our Esri EAEP2201 training materials are compiled by professional experts. All the necessary points have been mentioned in our Enterprise Administration Professional 2201 EAEP2201 practice engine particularly. About some tough questions or important points, they left notes under them. Besides, our experts will concern about changes happened in Enterprise Administration Professional 2201 EAEP2201 study prep all the time.

## Using EAEP2201 Exam Assessment - Get Rid Of Enterprise Administration Professional 2201

The most notable feature of our EAEP2201 learning quiz is that they provide you with the most practical solutions to help you learn the exam points of effortlessly and easily, then mastering the core information of the certification course outline. Their quality of our EAEP2201 Study Guide is much higher than the quality of any other materials, and questions and answers of EAEP2201 training materials contain information from the best available sources.

Esri EAEP2201 Certification Exam is designed for professionals who are seeking to demonstrate their expertise in administering and managing enterprise GIS deployments. EAEP2201 exam covers a wide range of topics that are essential for effective administration of GIS systems, including database management, security measures, server configuration, and performance optimization. It is a comprehensive exam that requires a thorough understanding of Esri software and technologies, as well as industry best practices.

## Esri Enterprise Administration Professional 2201 Sample Questions (Q42-Q47):

### NEW QUESTION # 42

A single Linux machine deployment of ArcGIS Enterprise has a home partition of 20 GB, a /data partition of 150 GB, and an /opt partition of 75 GB.

Where should the configuration store and directories be located?

- A. /opt
- B. /data
- C. /home

**Answer: B**

Explanation:

The configuration store and server directories for ArcGIS Enterprise should be placed in a partition with ample disk space and stable read/write performance, as these directories store logs, cache, uploads, and critical site configuration information.

In this scenario:

- \* The /home partition (20 GB) is insufficient for growth and operational overhead.
- \* The /opt partition (75 GB) is moderately sized but still smaller than the /data partition.
- \* The /data partition (150 GB) provides the most space, making it the best choice to ensure scalability and system reliability.

Best practice from ArcGIS Enterprise documentation recommends placing server directories and configuration stores on high-capacity partitions like /data when available.

#### NEW QUESTION # 43

A GIS administrator needs to change the ownership of a shared update group to a different user. The administrator receives an error message: "Unable to reassign the group at this time." What is causing this error?

- A. The sharing settings on the group are configured incorrectly
- B. The user does not have the correct privileges
- C. It is not possible to reassign ownership of shared update groups

**Answer: C**

#### NEW QUESTION # 44

An organization must limit the users who can publish services that reference data in a user-managed database.

At the same time, all users must be able to access and edit the data in that user-managed data store.

How should the database be registered?

- A. As a data store item in the ArcGIS Enterprise portal
- B. As an ArcGIS-managed data store in Server Manager
- C. As a relational data store in ArcGIS Data Store

**Answer: A**

Explanation:

Registering the database as a data store item in the ArcGIS Enterprise portal allows administrators to control who can publish services referencing the data. By sharing the data store item with specific groups or individuals, administrators can restrict publishing capabilities to authorized users. At the same time, all users can be granted appropriate permissions to access and edit the data directly in the user-managed database, independent of the publishing privileges.

Registering the database as an ArcGIS-managed data store in Server Manager does not provide the same level of control over publishing permissions. Registering it as a relational data store in ArcGIS Data Store is intended for managed data storage and does not apply to user-managed databases.

Reference Source: ArcGIS Enterprise documentation on registering user-managed data stores and controlling access.

#### NEW QUESTION # 45

A client has an internet-accessible ArcGIS Enterprise deployment with the Web Adaptors in the DMZ, and the remaining components are on an internal network behind a firewall. A user on the internet must access a web map in that environment.

Which ports must be open in the firewall between the DMZ and the internal network?

- A. 6443 and 7443
- B. 2443 and 6443
- C. 443 and 6443
- D. 80 and 443

**Answer: A**

Explanation:

Web Adaptors in the DMZ must forward requests to internal components (Portal and Server). These internal services operate over

HTTPS via ports:

- \* 7443 for Portal for ArcGIS
- \* 6443 for ArcGIS Server

Therefore, the firewall must allow traffic over ports 6443 and 7443 from the Web Adaptors (DMZ) to the respective internal services.

From ArcGIS Enterprise security documentation:

"When using Web Adaptors in the DMZ, make sure ports 6443 and 7443 are open between the Web Adaptors and the internal ArcGIS Server and Portal components respectively."

- \* Option B is partially correct but leaves out Portal (7443).
  - \* Option C is for HTTP/HTTPS access from the public, not internal communications.
  - \* Option D includes the Data Store admin port (2443), which isn't required here.
- Reference: ArcGIS Enterprise - Firewalls, Ports, and DMZ Configuration

### NEW QUESTION # 46

A client wants to perform incremental webgisdr backups daily and full backups weekly. They store all data in the relational ArcGIS Data Store, with no tile or map caches.

Which action is required to enable incremental backups?

- **A. Enable point-in-time recovery on ArcGIS Data Store**
- B. Decrease the max connections during backups
- C. Increase the heap size of ArcGIS Data Store

**Answer: A**

Explanation:

To perform incremental backups using the webgisdr tool, point-in-time recovery must be enabled on the relational data store. This creates transaction logs needed for differential backups and aligns with best practices for enterprise-level backup strategies.

From Esri documentation:

"Incremental backups can only be used with a relational data store when point-in-time recovery is enabled.

This enables transaction log capture needed for delta backups."

\* Option A is unrelated to backup functionality.

\* Option C is not required unless performance tuning is needed.

Reference: ArcGIS Enterprise - Enabling Point-in-Time Recovery in ArcGIS Data Store for Incremental Backups

### NEW QUESTION # 47

.....

As we all know, sometimes the right choice can avoid the waste of time, getting twice the result with half the effort. Especially for EAEP2201 study materials, only by finding the right ones can you reduce the pressure and help yourself to succeed. If you haven't found the right materials yet, please don't worry. Maybe our EAEP2201 Study Materials can give you a leg up which is our company's flagship product designed for the EAEP2201 exam.
