## BCS Practitioner Certificate in Business Analysis Practice v5.0 Sample Questions (Q67-Q72):

### NEW QUESTION # 67

Bessant Co. manufactures and sells clothing. The company is every profitable and the IT director would like to invest some of these profits into improving the technical infrastructure of the company, which would help the organic growth of the company. However, the finance director would like to use the profits to acquire one of its competitors.

Shelly is the business analyst on this project and she recognises that the IT and finance director do not agree on the future direction of the business. One prefers organic growth and the other, growth by acquisition.

What technique COULD Shelly use to improve her understating of these two different perspectives?

- A. The power/ interest grid
- B. POPIT model.
- C. CATWOE.
- D. SWOT analysis

**Answer: C**

Explanation:

CATWOE is a technique that helps to understand different perspectives of a situation by analyzing six elements: Customers, Actors, Transformation process, Worldview, Owner, and Environmental constraints. Shelly could use CATWOE to improve her understanding of the IT and finance director's views on the future direction of the business, by identifying who are the customers, actors, owners, and so on for each option (organic growth or acquisition), and how they differ. Option A is the correct answer.

### NEW QUESTION # 68

Bluesky Travel is an independent travel agency specialising in luxury bespoke holidays, which is introducing a new booking process. So far, the following key changes have been made:

- 1) The new Commercial Off The Shelf (COTS) software package for making bookings has been installed and is working
- 2) Data is being migrated from the old computer system to the COTS software package
- 3) The IT department has documented the configuration of the COTS system
- 4) The legal department has confirmed that the new COTS system is compliant with company policies.

In taking a holistic approach, which of the following areas of the POPII Model have NOT yet been addressed by the changes identified?

- A. Process and people
- B. People and technology
- **C. Organisation and process.**
- D. Organisation and information.

**Answer: C**

Explanation:

The elements of the POPII model that have not yet been addressed by the changes identified are organisation and process. This is because there is no mention of how the new booking process will affect the organisational structure, roles, responsibilities, and culture of the company, or how the new COTS software package will integrate with the existing business processes and workflows. These elements are important to consider when introducing a new system or technology, as they may require changes or adaptations to ensure alignment and compatibility. Option A is the correct answer.

### NEW QUESTION # 69

AlpineTrails is a company that specialises in offering tailored walking holidays. The company was set up by two people, who each own 50% of the business. AlpineTrails books hotels, transport and equipment to create bespoke holidays for AlpineTrails customers. An agreement was recently reached with WalkNation, a national walking organisation, for AlpineTrails to provide a number of special holidays for its members. These will be branded as WalkNation Holidays. AlpineTrails will be responsible for organising the holidays but WalkNation will undertake the marketing and booking of these special holidays for its members. As well as customers, which THREE stakeholder groups are represented in this scenario?

- **A. Owner**
- B. Competitor
- C. Manager.
- **D. Partner**
- **E. Supplier**

**Answer: A,D,E**

Explanation:

A stakeholder is any person or group who has an interest in or influence over an organisation or project. Stakeholders can be classified into different categories based on their relationship with the organisation or project. One possible classification is the stakeholder wheel, which identifies six generic stakeholder categories: owner, partner, supplier, customer, regulator and competitor. Therefore, options A, D and E are correct answers, as they represent three stakeholder groups that are involved in the scenario.

Owner refers to the person or group who owns or controls the organisation or project. In this case, it is the two people who each own 50% of AlpineTrails. Partner refers to the person or group who collaborates or cooperates with the organisation or project to achieve mutual benefits. In this case, it is WalkNation, who has agreed to work with AlpineTrails to provide special holidays for its members. Supplier refers to the person or group who provides goods or services to the organisation or project. In this case, it is the hotels, transport and equipment providers that AlpineTrails books for its customers. Option D is not a correct answer, as manager is not one of the generic stakeholder categories defined in the stakeholder wheel. Manager refers to the person or group who oversees or coordinates the activities of the organisation or project. In this case, it could be either one of the owners of AlpineTrails or someone appointed by them. Option E is not a correct answer, as competitor is not represented in this scenario. Competitor refers to the person or group who offers similar or alternative goods or services to the same market as the organisation or project. In this case, it could be another company that specialises in offering tailored walking holidays.

### NEW QUESTION # 70

On joining a new company, Sara spent time reviewing the company's organisation chart. She was particularly interested in the sponsor of the project she is joining. What is Sara LIKELY to have learnt about the sponsor from this? Select the TWO that apply.

- A. The scope of their responsibilities
- B. Their span of control
- C. The culture within their team
- D. Their position in the company hierarchy
- E. Their preferred management style

**Answer: B,D**

Explanation:

An organisation chart is a diagram that shows the structure and relationships of an organisation. It helps to identify who are the members, roles, levels and units of an organisation and how they are connected or related. Therefore, options A and B are correct answers, as they are the information that Sara is likely to have learnt about the sponsor from the organisation chart. Option A is a correct answer, as their position in the company hierarchy is the information that Sara is likely to have learnt about the sponsor from the organisation chart. Their position in the company hierarchy is the level or rank of the sponsor within the organisation's structure. It helps to indicate their authority, status and influence within the organisation. Option B is a correct answer, as their span of control is the information that Sara is likely to have learnt about the sponsor from the organisation chart. Their span of control is the number of people or units that report directly to the sponsor within the organisation's structure. It helps to indicate their responsibility, workload and management style within the organisation. Option C is not a correct answer, as their culture within their team is not the information that Sara is likely to have learnt about the sponsor from the organisation chart. Their culture within their team is the shared values, beliefs, norms and behaviours of the sponsor and their team members within the organisation. It helps to indicate their motivation, satisfaction and performance within the organisation. Option D is not a correct answer, as their scope of responsibilities is not the information that Sara is likely to have learnt about the sponsor from the organisation chart. Their scope of responsibilities is the range or extent of tasks or activities that the sponsor has to perform or oversee within the organisation. It helps to indicate their objectives, outcomes and deliverables within the organisation. Option E is not a correct answer, as their preferred management style is not the information that Sara is likely to have learnt about the sponsor from the organisation chart. Their preferred management style is the way or approach that the sponsor uses to lead or direct their team members within the organisation. It helps to indicate their communication, delegation and feedback skills within the organisation.

### NEW QUESTION # 71

A business analyst has been carrying out investigations into a problem situation. However, it is clear to the business analyst that, even after a number of interviews with individual stakeholders, some stakeholder's views still conflict.

Which investigation technique SHOULD be used to resolve the conflict and gain a consensus?

- A. Questionnaire
- B. Observation
- C. Workshop
- D. Scenario analysis.

**Answer: C**

Explanation:

A workshop is a technique for conducting group discussions and activities with stakeholders to elicit, analyse, validate and prioritise their views and needs. It helps to facilitate effective communication and collaboration among stakeholders and resolve conflicts or issues. Therefore, option C is the correct answer, as a workshop would help the business analyst to resolve the conflict and gain a

consensus among stakeholders who have different views after individual interviews. A workshop would help to bring together the conflicting stakeholders in one place and time and enable them to share and compare their views openly and constructively. A workshop would help to identify and address the sources and reasons of the conflict and find common ground and mutual understanding among stakeholders. A workshop would help to generate and evaluate different options or solutions that satisfy all or most of the stakeholder views and agree on the best one for further development and implementation. Option A is not a correct answer, as scenario analysis is not a technique for resolving conflict and gaining consensus among stakeholders who have different views after individual interviews. Scenario analysis is a technique for exploring how different scenarios or situations could affect the outcomes or impacts of an organisation or project. It helps to test the feasibility and desirability of different options or solutions under various circumstances or assumptions. Option B is not a correct answer, as questionnaire is not a technique for resolving conflict and gaining consensus among stakeholders who have different views after individual interviews. Questionnaire is a technique for collecting information from stakeholders by asking them predefined questions in written form. It helps to elicit quantitative or qualitative data from a large number of stakeholders in an efficient and consistent way. Option C is not a correct answer, as observation is not a technique for resolving conflict and gaining consensus among stakeholders who have different views after individual interviews. Observation is a technique for gathering information from stakeholders by watching them perform their tasks or activities in their natural environment. It helps to analyse how stakeholders work in practice and identify their implicit or tacit needs.

## NEW QUESTION # 72

.....

You will notice the above features in the BCS BAPv5 Web-based format too. But the difference is that it is suitable for all operating systems: Macs, Linux, iOS, Androids, and Windows. There is no need to go through time-taking installations or agitating plugins to use this format. It will lead to your convenience while preparing for the BCS BAPv5 Certification test. Above all, it operates on all browsers: Mozilla, Safari, Opera, Google Chrome, and Internet Explorer.
