Microsoft Power BI Data Analyst Sample Questions (Q174-Q179):

NEW QUESTION # 174
You have an app workspace that contains a dashboard and four reports. All the reports are generated from a single dataset that contains sales data for your company.
The reports display the data configured as shown in the following table.
You need to ensure that the users of the reports can locate the correct report by using natural language queries.
What should you do?

- A. From the properties of the dataset, create four Featured Q&A Questions.
- B. From the properties of the dataset, modify the Q&A and Cortana settings.
- C. From the Format settings of the reports, modify the Page Information.
- D. From the properties of the workspace, modify the Language Settings.

Answer: B

NEW QUESTION # 175
You have two Azure SQL databases that contain the same tables and columns.
For each database, you create a query that retrieves data from a table named Customers.
You need to combine the Customer tables into a single table. The solution must minimize the size of the data model and support scheduled refresh in powerbi.com.
What should you do? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

Box 1: Append Queries as New.
There are two primary ways of combining queries: merging and appending.
* When you have one or more columns that you'd like to add to another query, you merge the queries.
* When you have additional rows of data that you'd like to add to an existing query, you append the query.
Box 2: Disable loading the query to the data model
For every query that loads into model memory will be consumed. and Memory is our asset in the Model, less memory consumption leads to better performance in most of the cases. The best approach is to disable loading.

NEW QUESTION # 176
You create a Power BI workspace named Workspace1.
You publish a semantic model and a report to Workspace1.
You need to configure Workspace1 to meet the following requirements:
- Provide access to a group named Sales.
- Ensure that Sales can invite other users to Workspace1.
- Follow the principle of least privilege.
Which role should you assign to Sales?

- A. Member
- B. Viewer
- C. Admin
- D. Contributor

Answer: A

NEW QUESTION # 177
You have the following three versions of an Azure SQL database:
* Test
* Production
* Development
You have a dataset that uses the development database as a data source.
You need to configure the dataset so that you can easily change the data source between the development, test, and production database servers from powerbi.com.
Which should you do?

- A. Set the data source privacy level to Organizational and use the ReplaceValue Power Query M function.
- B. Create a parameter and update the queries to use the parameter.
- C. Create a query for each database server and hide the development tables.

- D. Create a JSON file that contains the database server names. Import the JSON file to the dataset.

Answer: B

NEW QUESTION # 178

You need to minimize me size of the dataset. The solution must meet the report requirements What should you do?

- A. Group the Categories table by the CategorylD column.
- B. Change lite OrderlD column in the Orders table to the text data type.
