Top Snowflake DAA-C01 Questions - DAA-C01 Latest Exam Price

Our team of experts updates actual SnowPro Advanced: Data Analyst Certification Exam (DAA-C01) questions regularly so you can prepare for the SnowPro Advanced: Data Analyst Certification Exam (DAA-C01) exam according to the latest syllabus. Additionally, we also offer up to 1 year of free SnowPro Advanced: Data Analyst Certification Exam (DAA-C01) exam questions updates. We have a 24/7 customer service team available for your assistance if you get stuck somewhere. Buy Snowflake DAA-

Snowflake SnowPro Advanced: Data Analyst Certification Exam Sample Questions (Q77-Q82):

NEW QUESTION # 77
What is the primary benefit of using User-Defined Functions (UDFs) in SQL for data analysis?

- A. They enable customization and extension of SQL functionalities for specific data operations.
- B. UDFs hinder query optimization.
- C. UDFs can only be used with Materialized views.
- D. UDFs restrict data analysis to predefined operations.

Answer: A

Explanation:
UDFs allow customization and extension of SQL functionalities, enabling specific data operations beyond predefined limits.

NEW QUESTION # 78
How do Snowsight dashboards facilitate the presentation of data for business use analyses?

- A. Snowsight limits data representation options, hindering analyses.
- B. They enable diverse data representation for effective analyses.
- C. Snowsight doesn't support visual data representation.
- D. Snowsight dashboards are exclusively text-based, limiting analyses.

Answer: B

Explanation:
Snowsight dashboards enable diverse data representation for effective analyses in business use cases.

NEW QUESTION # 79
You are tasked with identifying potential data sources for a new marketing analytics dashboard. The dashboard needs to provide insights into customer behavior across various touchpoints. Which of the following would be the MOST appropriate data sources to consider?

- A. Social media activity data ingested via a third-party API and stored in a relational database.
- B. Salesforce data containing customer interactions and sales opportunities.
- C. Website clickstream data stored in AWS S3 buckets in Parquet format.
- D. IoT sensor data containing temperature readings.
- E. Database containing HR employee data.

Answer: A,B,C

Explanation:
Options A, B, and C are the most relevant data sources for a marketing analytics dashboard focused on customer behavior. Website clickstream data (A) provides insights into user interactions on the website. Social media activity data (B) offers insights into customer sentiment and engagement. Salesforce data (C) provides information about customer interactions and sales opportunities. HR employee data (D) and IoT sensor data (E) are less relevant to customer behavior and marketing analytics.

NEW QUESTION # 80
You are tasked with creating a data pipeline that ingests data from various sources, including a Snowflake Marketplace data share, and prepares it for analysis. The pipeline involves several transformations and enrichments. Which of the following methods offer the BEST approach to manage data lineage and auditability within this pipeline, considering the shared data from the Marketplace?

- A. Rely solely on Snowflake's query history and table metadata to track data lineage.
- B. Create a series of temporary tables at each stage of the pipeline to store intermediate results and track data lineage.

- C. Use Snowflake's 'SYSTEM$GET_PREDECESSORS' and functions combined with a metadata repository to capture and visualize data lineage.
- D. Replicate the data share's tables into your own database and track changes on the replicated tables.
- E. Implement a custom logging system that records each transformation step and data source, including the data share details.

Answer: C

Explanation:
Option C is the best approach. Snowflake's built-in functions like 'SYSTEM$GET_PREDECESSORS' and allow you to programmatically trace the dependencies and data flow within your Snowflake environment, including data accessed from shares. Combining this information with a metadata repository provides a robust and auditable data lineage solution. Option A is insufficient as it doesn't provide a structured and easily navigable lineage. Option B is viable but requires significant manual effort to maintain and scale. Option D creates unnecessary storage overhead and doesn't inherently improve data lineage tracking. Option E is not recommended as replicating shared data goes against the purpose of data sharing and can lead to synchronization issues.

NEW QUESTION # 81
You have a table named 'ORDERS with a 'ORDER DATE column stored as VARCHAR. The column contains dates in the format 'YYYY-MM-DD HH24:Ml:SS.FF3'. You need to calculate the number of orders placed in January 2023. Which of the following SQL statements will achieve this most efficiently and accurately, considering potential time zone differences configured at the user or account level?

- A. ▢
- B. ▢
- C. ▢
- D. ▢
- E. ▢

Answer: B

Explanation:
Option E is the most robust because it explicitly handles the VARCHAR to TIMESTAMP conversion, incorporates timezone conversion from UTC to the session's timezone, and then extracts the DATE part for accurate filtering. This accounts for potential timezone discrepancies that might affect date boundaries. Options A and B rely on string manipulation, which is prone to errors and not recommended for date operations. Option C lacks time zone considerations, which can lead to issues. Option D is less efficient because MONTH() and YEAR() function needs to be applied, and it also lacks timezone conversion consideration.

NEW QUESTION # 82
......

Though there are three versions of the DAA-C01 training braindumps: the PDF, Software and APP online. I like the Software version the most. This version of our DAA-C01 training quiz is suitable for the computers with the Windows system. It is a software application which can be installed and it stimulates the real exam's environment and atmosphere. It builds the users' confidence and the users can practice and learn our DAA-C01 learning guide at any time.

Top DAA-C01 Questions: https://www.dumpstillvalid.com/DAA-C01-prep4sure-review.html

To cater for the different needs of our customers, we designed three kinds of Snowflake Top DAA-C01 Questions Top DAA-C01 Questions - SnowPro Advanced: Data Analyst Certification Exam latest torrent for you, and we are trying to sort out more valuable versions in the future, Passing the Snowflake DAA-C01 exam has never been faster or easier, now with DumpCollection DAA-C01 questions and answers, you absolutely can pass your exam on the first try, So if you think time is very important for you, please try to use our DAA-C01 study materials, it will help you save your time.
