P.S. Free 2026 CWNP CWSP-208 dumps are available on Google Drive shared by It-Tests: <https://drive.google.com/open?id=1tudxBnqxukusuZFt-nFzz3X7EYUF8Kmd>

To give you an idea about the top features of It-Tests CWNP exam questions, a free demo of It-Tests Certified Wireless Security Professional (CWSP) (CWSP-208) exam dumps is being offered free of cost. Just download It-Tests CWSP-208 Exam Questions demo and checks out the top features of It-Tests CWSP-208 exam dumps.

## CWNP CWSP-208 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>• Vulnerabilities, Threats, and Attacks: This section of the exam evaluates a Network Infrastructure Engineer in identifying and mitigating vulnerabilities and threats within WLAN systems. Candidates are expected to use reliable information sources like CVE databases to assess risks, apply remediations, and implement quarantine protocols. The domain also focuses on detecting and responding to attacks such as eavesdropping and phishing. It includes penetration testing, log analysis, and using monitoring tools like SIEM systems or WIPS</li><li>• WIDS. Additionally, it covers risk analysis procedures, including asset management, risk ratings, and loss calculations to support the development of informed risk management plans.</li></ul>

Topic 2	<ul style="list-style-type: none"> <li>• <b>Security Lifecycle Management:</b> This section of the exam assesses the performance of a Network Infrastructure Engineer in overseeing the full security lifecycle—from identifying new technologies to ongoing monitoring and auditing. It examines the ability to assess risks associated with new WLAN implementations, apply suitable protections, and perform compliance checks using tools like SIEM. Candidates must also demonstrate effective change management, maintenance strategies, and the use of audit tools to detect vulnerabilities and generate insightful security reports. The evaluation includes tasks such as conducting user interviews, reviewing access controls, performing scans, and reporting findings in alignment with organizational objectives.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>• <b>WLAN Security Design and Architecture:</b> This part of the exam focuses on the abilities of a Wireless Security Analyst in selecting and deploying appropriate WLAN security solutions in line with established policies. It includes implementing authentication mechanisms like WPA2, WPA3, 802.1X</li> <li>• EAP, and guest access strategies, as well as choosing the right encryption methods, such as AES or VPNs. The section further assesses knowledge of wireless monitoring systems, understanding of AKM processes, and the ability to set up wired security systems like VLANs, firewalls, and ACLs to support wireless infrastructures. Candidates are also tested on their ability to manage secure client onboarding, configure NAC, and implement roaming technologies such as 802.11r. The domain finishes by evaluating practices for protecting public networks, avoiding common configuration errors, and mitigating risks tied to weak security protocols.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>• <b>Security Policy:</b> This section of the exam measures the skills of a Wireless Security Analyst and covers how WLAN security requirements are defined and aligned with organizational needs. It emphasizes evaluating regulatory and technical policies, involving stakeholders, and reviewing infrastructure and client devices. It also assesses how well high-level security policies are written, approved, and maintained throughout their lifecycle, including training initiatives to ensure ongoing stakeholder awareness and compliance.</li> </ul>

## Accurate CWSP-208 Exam Online & Leading Offer in Qualification Exams & Complete CWNP Certified Wireless Security Professional (CWSP)

You can try a free demo to check the desktop Certified Wireless Security Professional (CWSP) (CWSP-208) practice exam software before buying. The CWNP CWSP-208 practice test, which is the very best self-assessment tool is customizable. And you can change its time and number of questions. All the formats of It-Tests are designed and revised as per the feedback of more than thousands of experts in this field. Thus It-Tests reduce your chances of failure in the actual Certified Wireless Security Professional (CWSP) (CWSP-208) exam. So this product helps in reducing your tension and gaining more focus on your preparation only.

### CWNP Certified Wireless Security Professional (CWSP) Sample Questions (Q27-Q32):

#### NEW QUESTION # 27

What elements should be addressed by a WLAN security policy? (Choose 2)

- A. Social engineering recognition and mitigation techniques
- B. How to prevent non-IT employees from learning about and reading the user security policy
- C. End-user training for password selection and acceptable network use
- D. The exact passwords to be used for administration interfaces on infrastructure devices
- E. Enabling encryption to prevent MAC addresses from being sent in clear text

**Answer: A,C**

Explanation:

A strong WLAN security policy should encompass both technical controls and user education.

C). Educating users about secure password creation and acceptable use policies helps reduce risks due to weak authentication and misuse.

E). Social engineering is a common attack vector, and educating users to recognize and report such attempts is critical.

Incorrect:

- A). MAC addresses are always transmitted in the clear, even with encryption.
- B). Policies should be shared with users to promote compliance and awareness.
- D). Passwords for administrative systems should not be disclosed in public documentation or policy documents.

### NEW QUESTION # 28

Given: You view a protocol analyzer capture decode with the following protocol frames listed in the following order (excluding the ACK frames):

- 1) 802.11 Probe Request and 802.11 Probe Response
- 2) 802.11 Auth and another 802.11 Auth
- 2) 802.11 Assoc Req and 802.11 Assoc Rsp
- 4) EAPOL-Start
- 5) EAP Request and EAP Response
- 6) EAP Request and EAP Response
- 7) EAP Request and EAP Response
- 8) EAP Request and EAP Response
- 9) EAP Request and EAP Response
- 10) EAP Success
- 19) EAPOL-Key (4 frames in a row)

What are you seeing in the capture file? (Choose 4)

- A. WPA2-Personal authentication
- B. Wi-Fi Protected Setup with PIN
- C. 802.1X with Dynamic WEP
- D. Active Scanning
- E. 802.11 Open System authentication
- F. 4-Way Handshake
- G. WPA2-Enterprise authentication

**Answer: D,E,F,G**

Explanation:

A). WPA2-Enterprise authentication: The multiple EAP Request/Response exchanges followed by an EAP Success and a 4-Way Handshake (EAPOL-Key frames) indicate 802.1X authentication, characteristic of WPA2-Enterprise.

C). 802.11 Open System authentication: Two Auth frames (request and response) without encryption negotiation signify Open System Authentication - a default in RSN setups.

F). Active Scanning: Begins with Probe Request and Probe Response - part of an active scan process.

G). 4-Way Handshake: Identified by four sequential EAPOL-Key frames, completing the authentication process in WPA2.

### NEW QUESTION # 29

In order to acquire credentials of a valid user on a public hot-spot network, what attacks may be conducted?

Choose the single completely correct answer.

- A. MAC denial of service and/or physical theft
- B. RF DoS and/or physical theft
- C. Authentication cracking and/or RF DoS
- D. Social engineering and/or eavesdropping
- E. Code injection and/or XSS

**Answer: D**

Explanation:

Comprehensive Detailed Explanation:

On public Wi-Fi hotspots (typically unsecured), attackers often perform:

Eavesdropping: By passively listening to unencrypted traffic, an attacker can capture credentials or sensitive data.

Social engineering: Users may be tricked into entering their credentials on a spoofed login page or disclosing them directly through phishing or manipulation.

These are the most effective and common methods for credential theft in open network environments.

Incorrect:

B & C. Physical theft is not network-based and not relevant to hotspot-based credential acquisition.

D). Authentication cracking is not applicable to open networks with captive portals.

E). Code injection/XSS may happen in web apps but are not directly methods for acquiring hotspot credentials.

### NEW QUESTION # 30

Which of the following security attacks cannot be detected by a WIPS solution of any kind? (Choose 2)

- A. Social engineering
- B. Rogue APs
- C. Eavesdropping
- D. DoS

**Answer: A,C**

Explanation:

Wireless Intrusion Prevention Systems (WIPS) are excellent for detecting on-air threats such as rogue APs, DoS attacks, spoofing, and misconfigured devices. However, WIPS cannot detect:

C). Eavesdropping - Passive listening on wireless transmissions cannot be detected because no signal is transmitted by the attacker.

D). Social engineering - Human-based attacks like phishing or pretexting fall outside the scope of wireless monitoring.

Incorrect:

A). Rogue APs can be detected via MAC address comparison, frame analysis, and signal triangulation.

B). DoS attacks, such as deauth floods or RF jamming, can be detected with appropriate WIPS sensors.

### NEW QUESTION # 31

Given: The Aircrack-ng WLAN software tool can capture and transmit modified 802.11 frames over the wireless network. It comes pre-installed on Kali Linux and some other Linux distributions.

What are three uses for such a tool? (Choose 3)

- A. Probing the RADIUS server and authenticator to expose the RADIUS shared secret
- B. Transmitting a deauthentication frame to disconnect a user from the AP.
- C. Auditing the configuration and functionality of a WIPS by simulating common attack sequences
- D. Cracking the authentication or encryption processes implemented poorly in some WLANs

**Answer: B,C,D**

Explanation:

Aircrack-ng is a versatile toolset commonly used for WLAN penetration testing and security auditing. Its capabilities include:

A). Injecting deauth frames to simulate or test disconnection scenarios.

B). Testing WIPS responsiveness by simulating common attack frames.

D). Performing dictionary and brute-force attacks against weakly protected networks (e.g., WPA2-PSK with a weak passphrase).

Incorrect:

C). Aircrack-ng does not probe or test RADIUS shared secrets.

## NEW QUESTION # 32

.....

If you are worry about the coming CWSP-208 study materials, our study materials will help you solve your problem. In order to promise the high quality of our CWSP-208 study materials, our company has outstanding technical staff, and has perfect service system after sale. More importantly, our good CWSP-208 guide questions and perfect after sale service are appreciated by our local and international customers. If you want to pass your practice exam, we believe that our learning engine will be your indispensable choices. More and more people have bought our CWSP-208 Guide questions in the past years.
