The earlier you pass exams and get certification with our SAFe-RTE Latest Braindumps, the earlier you get further promotion and better benefits. Sometimes opportunity knocks but once. Timing is everything.

## Scaled Agile SAFe Release Train Engineer Sample Questions (Q85-Q90):

### NEW QUESTION # 85

What are two outputs of Iteration Planning? (Choose two.)

- A. Iteration goals
- B. Team Backlog
- C. PI Objectives
- D. Program Backlog

- E. Iteration backlog

**Answer: A,E**

Explanation:

The outputs of Iteration Planning within the SAFe framework are crucial for guiding the work of Agile teams during an iteration. Two primary outputs of this process are:

\* Iteration Goals: These are the objectives that the team commits to achieving during the iteration. They provide a clear direction and purpose for the iteration, aligning the team's efforts with the larger goals of the Agile Release Train (ART).

\* Iteration Backlog: This is the set of stories, including enablers, that the team plans to deliver by the end of the iteration. Each item in the iteration backlog has defined acceptance criteria and an estimate, which are recorded in the team backlog.

Together, these outputs ensure that the team has a clear understanding of what needs to be accomplished and the work items that they have committed to delivering. This alignment is essential for maintaining the flow of value through the ART and achieving the broader objectives of the program increment (PI)<sup>1</sup>.

#### NEW QUESTION # 86

What is one way Kanbans are used in SAFe?

- A. To manage runway cadence
- B. To manage queue length
- C. To manage Program Increment (PI) Objectives

**Answer: B**

Explanation:

Kanban is a visual management tool used in SAFe to help Agile teams visualize their workflow and manage the status of work items at various stages of development. One of the primary ways Kanban is utilized within SAFe is to manage Work-In-Progress (WIP) limits. By doing so, teams can effectively control the queue length, ensuring that work items are processed in a timely manner and that the flow of work is optimized for efficiency<sup>2</sup>. This method aligns with the Lean-Agile principles of SAFe, which emphasize the importance of visualizing work, limiting WIP, and achieving a sustainable pace for the team's work<sup>3</sup>.

#### NEW QUESTION # 87

Which two behaviors should a Scrum Master represent as a coach? (Choose two.)

- A. Encourage the team to learn from their mistakes
- B. Provide subject matter expertise
- C. Focus on deadlines and technical options
- D. Set long-term goals for the team
- E. Lay out the team's plan for the iteration

**Answer: A,D**

#### NEW QUESTION # 88

What is a characteristic of an effective Scrum Master?

- A. Understands customer needs
- B. As a technical expert
- C. Removes all conflict
- D. Gives open, honest opinions

**Answer: B**

#### NEW QUESTION # 89

When looking at a program board at the end of program increment (PI) planning, what does it mean when a feature is placed in a team's swim lane with no strings?

- A. That the feature can be completed by that team independently
- B. That the team has been assigned, but the feature's dependencies have not been identified yet
- C. That the team has not broken the feature into stories yet and has not identified dependencies
- D. That it has dependencies on teams in other Agile release trains (ARTs) or Solution Trains

**Answer: A**

## NEW QUESTION # 90

.....

Thousands of SAFe-RTE certification holders provide helpful input to SureTorrent. It helps us to keep our SAFe-RTE exam dumps preparation material polished, updated, and error-free.
