BAPv5

Option D :
Manager.

Option E :
Competitor.

Correct Answer: A,B,C

Explanation/Reference:

A stakeholder is any person or group who has an interest in or influence over an organisation or project. Stakeholders can be classified into different categories based on their relationship with the organisation or project. One possible classification is the stakeholder wheel, which identifies six generic stakeholder categories: owner, partner, supplier, customer, regulator and competitor. Therefore, options A, B and C are correct answers, as they represent three stakeholder groups that are involved in the scenario. Owner refers to the person or group who owns or controls the organisation or project. In this case, it is the two people who each own 50% of AlpineTrails. Partner refers to the person or group who collaborates or cooperates with the organisation or project to achieve mutual benefits. In this case, it is WalkNation, who has agreed to work with AlpineTrails to provide special holidays for its members. Supplier refers to the person or group who provides goods or services to the organisation or project. In this case, it is the hotels, transport and equipment providers that AlpineTrails books for its customers. Option D is not a correct answer, as manager is not one of the generic stakeholder categories defined in the stakeholder wheel. Manager refers to the person or group who oversees or coordinates the activities of the organisation or project. In this case, it could be either one of the owners of AlpineTrails or someone appointed by them. Option E is not a correct answer, as competitor is not represented in this scenario. Competitor refers to the person or group who offers similar or alternative goods or services to the same market as the organisation or project. In this case, it could be another company that specialises in offering tailored walking holidays.

QUESTION: 6

Paul has been struggling to make his farm profitable for a number of years. Recently, an energy firm has asked him if it can survey his land in order to determine if there is natural gas deep under his fields. If there is, they will pay him for the extracted gas. Paul has discussed this request with his business partner, explaining that he would like to explore the possibility as he feels that any subsequent extraction process is safe, will cause minimal damage to the farm, and will return the farm to profitability. Paul's business partner disagrees, believing that the process for extracting the gas is dangerous, that the machinery will spoil the

BCS Practitioner Certificate in Business Analysis Practice v5.0 Sample Questions (Q11-Q16):

NEW QUESTION # 11

You have been asked to explain divergent and convergent thinking to a colleague How would you describe the purpose of both divergent and convergent thinking to them Select the BEST TWO answers

- A. Convergent thinking define the action to be taken, broadly
- B. Divergent thinking creatively considering multiple solutions to the problem
- C. Divergent thinking generate ideas.
- D. Convergent thinking review ideas for way forward
- E. Convergent thinking define the solution in detail

Answer: C,D

Explanation:

Explanation

Divergent thinking and convergent thinking are two types of thinking processes that can be used to solve problems creatively and effectively. Therefore, options A and B are correct answers, as they describe the purpose of both divergent and convergent thinking respectively. Option A describes the purpose of divergent thinking, which is to generate ideas. Divergent thinking involves exploring multiple possible solutions to a problem without judging or evaluating them. It helps to stimulate creativity and innovation by expanding the range and diversity of ideas. Option B describes the purpose of convergent thinking, which is to review ideas for way forward. Convergent thinking involves analysing and evaluating multiple possible solutions to a problem and selecting the best one for further development and implementation. It helps to ensure feasibility and suitability by narrowing down the range and diversity of ideas. Option C describes an aspect of divergent thinking, which is creatively considering multiple solutions to the problem, but not its purpose. The purpose of divergent thinking is to generate ideas, not just consider them creatively. Option D describes an aspect of convergent thinking, which is defining the solution in detail, but not its purpose. The purpose of convergent thinking is to review ideas for way forward, not just define them in detail. Option E describes an aspect of convergent thinking, which is defining the action to be taken, broadly, but not its purpose. The purpose of convergent thinking is to review ideas for way forward, not just define the action to be taken, broadly.

NEW QUESTION # 12

Maria and Nelly own a small jewellery shop and are considering whether they should renew the lease on their shop for another year. They are both thinking about alternative business ventures as they never intended to run the jewellery shop indefinitely. They source their jewellery products from an overseas manufacturer and market them in luxury presentation boxes, made by local craftsmen. They employ Maria's son, Darren, in the school holidays to make up the boxes and keep the stockroom full. Which of the following CATWOE categories CANNOT be identified from this scenario?

- A. Owner
- **B. Environment**
- C. Actor
- D. Transformation

Answer: B

Explanation:

Explanation

CATWOE is a technique for exploring stakeholder business perspectives by identifying six elements:

Customer, Actor, Transformation, Worldview, Owner and Environment. It helps to understand how different stakeholders perceive a business situation or problem and what they expect from a solution. Therefore, option D is the correct answer, as environment is the element that cannot be identified from this scenario.

Environment is the element that describes the external factors or constraints that affect a stakeholder's perspective or limit their options. It helps to explain what factors or constraints are beyond the stakeholder's control or influence. There is no information in this scenario that indicates what external factors or constraints affect Maria and Nelly's perspective or limit their options. Option A is not a correct answer, as transformation is the element that can be identified from this scenario. Transformation is the element that describes what changes or processes take place in a business situation or problem or its solution. It helps to identify what inputs are converted into outputs in a business situation or problem or its solution. An example of transformation in this scenario is sourcing jewellery products from an overseas manufacturer and marketing them in luxury presentation boxes made by local craftsmen. Option B is not a correct answer, as actor is the element that can be identified from this scenario. Actor is the element that describes who carries out or performs a business situation or problem or its solution. It helps to identify who are responsible for implementing or delivering a business situation or problem or its solution. An example of actor in this scenario is Darren, who makes up the boxes and keeps the stockroom full. Option C is not a correct answer, as owner is the element that can be identified from this scenario. Owner is the element that describes who has the authority or power to start or stop a business situation or problem or its solution. It helps to identify who are the decision makers or influencers of a business situation or problem or its solution. An example of owner in this scenario is Maria and Nelly, who own the jewellery shop and are considering whether to renew the lease.

NEW QUESTION # 13

The directors of Swift Despatch believe they might be able to improve their service and reduce costs by opening a distribution centre in Coventry. A team has been created to investigate this further, including representatives of logistics, property and marketing. Yasmin has been asked to advise on how the Business Case should be progressed at this point.

What SHOULD she advise?

- A. It is too early to work on the Business Case
- B. Confirm with the directors the costs and benefits
- **C. Create a high level Business Case**
- D. Create a detailed Business Case

Answer: C

Explanation:

Explanation

A high level Business Case is a document that provides a preliminary rationale and justification for a proposed business change or solution. It helps to establish the feasibility and desirability of the project and secure initial approval and funding for further investigation and development. Therefore, option A is the correct answer, as creating a high level Business Case would be the best activity to undertake at this point for introducing a new procurement system. A high level Business Case would help to define the problem or opportunity that motivates the project, identify and compare different procurement solutions based on their expected benefits, costs, risks and impacts, and recommend the preferred option for further analysis and evaluation. A high level Business Case would provide a solid foundation for proceeding with the project and preparing a detailed Business Case later on. Option B is not a correct answer, as creating a detailed Business Case would not be an appropriate activity to undertake at this point for

introducing a new procurement system. A detailed Business Case is a document that provides a comprehensive rationale and justification for a proposed business change or solution. It helps to confirm the viability and worthiness of the project and secure final approval and funding for implementation and delivery. A detailed Business Case would require conducting extensive research and analysis on the preferred procurement solution and presenting its definitive benefits, costs, risks and impacts. A detailed Business Case would be premature and unnecessary at this point, as it would depend on the outcome of the high level Business Case first. Option C is not a correct answer, as it is too early to work on the Business Case would not be an appropriate activity to undertake at this point for introducing a new procurement system. Working on the Business Case is an essential activity for any project that involves significant business change or investment. It helps to provide evidence and support for the project and ensure its alignment with the organisation's strategy and objectives. Working on the Business Case would not be too early at this point, as it would help to establish the feasibility and desirability of the project and secure initial approval and funding for further investigation and development. Option D is not a correct answer, as confirming with the directors the costs and benefits would not be an appropriate activity to undertake at this point for introducing a new procurement system. Confirming with the directors the costs and benefits would require preparing a high level Business Case first to estimate and compare the financial implications of different options and recommend the best one for further development and implementation. Confirming with the directors the costs and benefits without preparing a high level Business Case first would risk providing inaccurate or incomplete information that may not reflect the value or feasibility of the project.

NEW QUESTION # 14

A large consultancy organization has assigned its BA, Girby, to a client called MetalCor, a manufacture of component for washing machines and fridge freezers. The management team of MetalCor need some help in understanding the problems they are experiencing with their production line. Recently, Reproduction has dipped to a record low and more parts are being return as fully. Production line staff blame each other and the more staff Girby speaker to, the more issue she identifies. She having difficulty keeping track of the arising themes and how they relate to each other.

Which of the following would enable Girby to model the arising themes and how they relate to each other?

- A. Mind map
- B. Business activity model
- C. Business process model
- D. Rich picture.

Answer: A

Explanation:

Explanation

A mind map is a technique for organising and visualising information in a hierarchical and associative way. It helps to generate, structure and classify ideas and concepts and show how they are related or connected.

Therefore, option A is the correct answer, as a mind map would enable Girby to model the arising themes and how they relate to each other. A mind map would help to identify the main theme or problem (declining production) and the sub-themes or causes (staff blaming each other, more parts being faulty etc.) and arrange them in a tree-like structure. A mind map would help to use colours, symbols, images and keywords to represent and emphasise the themes and their relationships. A mind map would help to analyse and evaluate the themes and their relationships and identify any patterns or gaps that may exist. Option B is not a correct answer, as a business activity model is not a technique for modelling the arising themes and how they relate to each other. A business activity model is a technique for modelling business activities within an organisation or project at a high level of abstraction. It helps to understand what an organisation does, how it does it, who does it, where it does it and why it does it. Option C is not a correct answer, as a rich picture is not a technique for modelling the arising themes and how they relate to each other. A rich picture is a technique for drawing a holistic view of a complex situation or problem using informal symbols and images. It helps to capture the main elements and aspects of a situation or problem and how they interact or influence each other. Option D is not a correct answer, as a business process model is not a technique for modelling the arising themes and how they relate to each other. A business process model is a technique for modelling business processes within an organisation or project at a low level of abstraction. It helps to understand how business processes are performed or delivered in terms of inputs, outputs, activities, tasks, roles, rules, events etc.

NEW QUESTION # 15

Imran is the chief executive of FairCrops, a producer of ethically and sustainably sourced coffee and cocoa products. He is a true advocate of the FairCrops brand and has seen the positive impact of its approach in the South American regions in which It operates. He believed that there is a market for customers who want to ensure the products they consume have been purchased for

FairCrops provide their products via an exclusive contract with Donald, the owner of Rest House; a small chain of coffee shops. Ronaldo is a supplier to FairCrops. The prices he receives means he can provide for Ins family and enhance his crop yield through the advice and training provided by Alan, the FairCrops local representative and support officer From Inrnan's perspective, which of the following is a CORRECT partial CATWOE analysis of this situation?

- Answer: A**

A partial CATWOE analysis of this situation from Inran's perspective would identify Donald as the customer, Alan as the actor, and Inran as the owner. Donald is the customer because he is the beneficiary of FairCrops' products and services. Alan is the actor because he is the one who implements FairCrops' approach in the South American regions. Inran is the owner because he is the chief executive of FairCrops and has the authority to make decisions about its direction and purpose. Option A is the correct answer.
