受験生の皆様にもっと多くの助けを差し上げるために、JpshikenのGAQMのCASPO-001トレーニング資料はイン

ターネットでああなたの緊張を解消することができます。CASPO-001 勉強資料は公式GAQMのCASPO-001試験トレーニング授業、GAQMのCASPO-001 自習ガイド、GAQMのCASPO-001 の試験と実践やGAQMのCASPO-001オンラインテストなどに含まれています。Jpshiken がデザインしたGAQMのCASPO-001模擬トレーニングパッケージはあなたが楽に試験に合格することを助けます。Jpshikenの勉強資料を手に入れたら、指示に従えばCASPO-001認定試験に受かることはたやすくなります。

GAQM Certified Agile Scrum Product Owner (CASPO) 認定 CASPO-001 試験問題 (Q34-Q39):

質問 # 34

Must the Product Owner be present at the Sprint Retrospective? (Choose the best answer)

- **A. It is mandatory. The Sprint Retrospective is an opportunity for the Scrum Team to assess its performance and improve itself.**
- B. It is not allowed. The Sprint Retrospective is an opportunity for the Scrum Team to inspect itself.
- C. It is optional. Attendance is only required when the Product Owner gets invited by the Scrum Master.

正解: A

解説:

The Sprint Retrospective involves the entire Scrum Team-Product Owner, Scrum Master, and Developers- to inspect and improve. The Scrum Guide states: "The Scrum Team inspects how the last Sprint went with regards to individuals, interactions, processes, tools, and their Definition of Done." The Product Owner's presence is mandatory because they are part of the team, contributing to discussions on collaboration and process (e.g., backlog refinement).

* A: Optional attendance contradicts the team-wide focus.

* C: Exclusion is incorrect; it's not just for Developers.

質問 # 35

Which statement is least accurate when providing a definition of "Done"? (Choose the best answer)

- A. It is the exit criteria to determine whether a Product Backlog item is complete
- B. It becomes more complete over time
- **C. It is defined by the Scrum Master**
- D. It may vary depending on the project

正解: C

解説:

The Definition of "Done" is a team or organizational standard, not the Scrum Master's sole responsibility. The Scrum Guide states: "If it is not an organizational standard, the Scrum Team must create a Definition of Done appropriate for the product."

* A: Accurate-it defines completion.

* B: True-it can differ by context or product.

* C: Least accurate-the Scrum Team or organization defines it, not just the Scrum Master.

質問 # 36

Why would the Product Owner concern themselves with technical debt? (Choose the best answer)

- **A. The total cost of ownership (TCO) of the product will be impacted if technical debt is present and grows**
- B. They wouldn't, it is an issue for Developers
- C. The Scrum Master is responsible for technical debt management

正解: A

解説:

Technical debt affects product value, a Product Owner's core concern. The Scrum Guide doesn't explicitly mention technical debt, but the Product Owner's accountability for "maximizing the value of the product" implies considering factors like TCO, which rises with debt due to rework or maintenance costs.

* A: Correct-debt impacts long-term value and cost.

* B: The Scrum Master facilitates, not manages debt.

質問 # 37

The purpose of a Sprint Retrospective is for the Scrum Team to: (Choose the best answer)

- A. Demonstrate completed User Stories to the Product Owner
- B. The Product Owner
- **C. Inspect how the last Sprint went and plan improvements for the next Sprint**
- D. Review stories planned for the next Sprint and provide estimates

正解: C

解説:

The Sprint Retrospective is a key Scrum event focused on continuous improvement. The Scrum Guide defines its purpose explicitly as an opportunity for the Scrum Team (Product Owner, Scrum Master, and Developers) to reflect on the past Sprint and identify actionable ways to enhance their effectiveness and quality in the next Sprint. Option C - "Inspect how the last Sprint went and plan improvements for the next Sprint" - accurately captures this intent, aligning with Scrum's empirical pillars of inspection and adaptation. Let's evaluate all options:

* A (Review stories planned for the next Sprint and provide estimates): This pertains to Sprint Planning or Product Backlog refinement, not the Retrospective. The Retrospective focuses on past performance, not future planning of specific stories or estimation.

* B (Demonstrate completed User Stories to the Product Owner): This describes the Sprint Review, where the Increment is showcased to stakeholders, not the Retrospective, which is an internal team event.

* C: Correct - the Retrospective is about inspecting the last Sprint (e.g., processes, interactions, tools) and adapting by planning improvements, making it the best answer.

質問 # 38

During a Sprint Retrospective, for what is the Scrum Master responsible? (Choose the best answer)

- A. Prioritizing the resulting action items.
- **B. Participating as a Scrum Team member and facilitating as requested or needed.**
- C. Acting as a scribe to capture the Developers' answers.
- D. Summarizing and reporting the discussions to management.

正解: B

解説:

The Scrum Guide describes the Sprint Retrospective as an event where the Scrum Team inspects itself and plans improvements, with the Scrum Master playing a dual role: "The Scrum Master participates as a peer team member in the Sprint Retrospective... and ensures that the event takes place and is positive and productive." Option C captures this - participating as a team member and facilitating when needed. Option A (scribe) is too narrow and not required. Option B (prioritizing) is a team decision, not the Scrum Master's alone. Option D (reporting to management) violates Scrum's team autonomy. Thus, C is correct.

質問 # 39
