Which object should you define to balance the load across multiple carriers?

- A. Incompatibility
- B. Transportation allocation
- C. Business share
- D. Condition

Answer: B

Explanation:

Freight Order Management

NEW QUESTION # 64

In a buyer's consolidation scenario, which of the following ratios of export forwarding orders to import forwarding orders is valid? Please choose the correct answer.

- A. N export forwarding orders to 1 import forwarding order
- B. 1 export forwarding order to N import forwarding orders
- C. N export forwarding orders to N import forwarding orders
- D. 1 export forwarding order to 1 import forwarding order

Answer: A

NEW QUESTION # 65

Messages that have been forwarded to the Postprocessing Desktop can also be restarted from the monitor for processed XML messages. Determine whether this statement is true or false.

- A. true
- B. false

Answer: B

NEW QUESTION # 66

You want to perform carrier selection for a freight order created in SAP S/4HANA Supply Chain for transportation management. Which of the following can you use as decision criteria? Note: There are 2 correct answers to this question.

- A. Priority from transportation lane
- B. Costs from shipment cost document
- C. Priority from carrier selection settings
- D. Costs from charge management

Answer: A,C

Explanation:

In SAP S/4HANA Transportation Management, carrier selection for a freight order is based on specific decision criteria defined in the system. According to the SAP documentation:

* Priority from transportation lane (B): Transportation lanes define carrier priorities (e.g., ranking carriers based on preference or agreements), which are used as a criterion during carrier selection.

* Priority from carrier selection settings (C): Carrier selection settings in the planning profile or SAP Fiori app allow users to define priorities for carriers, influencing the selection process.

The other options are incorrect:

* Costs from charge management (A): While costs are considered, they are derived from freight agreements or rate tables, not directly from charge management during carrier selection.

* Costs from shipment cost document (D): Shipment cost documents are used in SAP ERP (LE-TRA), not in SAP S/4HANA TM, where freight settlement documents are used instead.
