SAP C-CPI-2506 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">SAP Event Mesh: This section of the exam measures the skills of Solution Architects and centers on using SAP Event Mesh to support event-driven integration. It highlights the importance of asynchronous communication, event publishing, and subscription models, allowing organizations to build scalable and decoupled systems.
Topic 2	<ul style="list-style-type: none">SAP Integration Suite Overview: This section of the exam measures the skills of Integration Consultants and covers the foundational concepts of the SAP Integration Suite. It provides an understanding of the suite's capabilities, its role in connecting applications, and its relevance in modern cloud-based integration scenarios.

Topic 3	<ul style="list-style-type: none"> Managing APIs: This section of the exam measures the skills of Solution Architects and focuses on managing APIs within the SAP ecosystem. It covers topics such as API provisioning, lifecycle management, security policies, and monitoring, ensuring candidates can handle APIs effectively for enterprise integration needs.
Topic 4	<ul style="list-style-type: none"> Implementing Cloud Integration: This section of the exam measures the skills of Integration Consultants and examines how cloud integration flows are designed and deployed. It emphasizes creating integration scenarios, handling connectivity, and applying best practices to build efficient, secure, and reliable integration processes in SAP's cloud environment.

Test SAP C-CPI-2506 Questions Pdf, C-CPI-2506 Premium Files

The SAP Certified Associate - Integration Developer (C-CPI-2506) practice questions give you a feeling of a real exam which boost confidence. Practice under real SAP Certified Associate - Integration Developer (C-CPI-2506) exam situations is an excellent way to learn more about the complexity of the SAP Certified Associate - Integration Developer (C-CPI-2506) exam dumps. You can learn from your SAP Certified Associate - Integration Developer (C-CPI-2506) practice test mistakes and overcome them before the actual SAP Certified Associate - Integration Developer (C-CPI-2506) exam. The software keeps track of the previous SAP Certified Associate - Integration Developer (C-CPI-2506) practice exam attempts and shows the changes of each attempt.

SAP Certified Associate - Integration Developer Sample Questions (Q46-Q51):

NEW QUESTION # 46

Which architectural pattern in an event-driven architecture allows direct communication between two parties without an intermediary?

- A. Point-to-Point
- B. Event Sourcing
- C. Message Queue
- D. Publish-Subscribe

Answer: A

Explanation:

References

In an event-driven architecture (EDA), several messaging patterns exist:

Point-to-Point # Enables direct communication between exactly two parties (sender and receiver) without intermediaries.

Publish-Subscribe # Multiple consumers subscribe to events; requires a broker/intermediary (like Event Mesh).

Message Queue # Relies on a queue as an intermediary between producer and consumer.

Event Sourcing # Refers to storing state changes as events, not a communication pattern.

Therefore, the only pattern allowing direct communication without an intermediary is Point-to-Point.

NEW QUESTION # 47

What are target endpoints of an API? Note: There are 3 correct answers to this question.

- A. API proxy
- B. API provider
- C. URL of original API

- D. API consumer
- E. Resources

Answer: A,B,C

Explanation:

The target endpoints of an API are the API provider, the API proxy, and the URL of the original API. The API provider is the system or application that exposes the interface and functionality of the API. The API proxy is the intermediary component that mediates the requests and responses between the API consumer and the API provider. The URL of the original API is the address that identifies the location and resource of the API. Reference: Integration Software | SAP Integration Suite, Modernize Integration with SAP Integration Suite | openSAP

NEW QUESTION # 48

You use an outbound HTTP adapter with basic authentication. In SAP Integration Suite, Monitor Integrations Manage Security, where must you set up and store a user and password?

- A. Keystore
- B. Access policies
- C. PGP Keys
- **D. Security Material**

Answer: D

Explanation:

To use basic authentication for outbound HTTP connections, you must store the user and password as credentials in the security material of SAP Integration Suite. Credentials are a type of security artifact that can be used to authenticate against external systems. You can create and manage credentials in the Monitor Integrations Manage Security Security Material section of SAP Integration Suite. Reference: Setting Up Outbound HTTP Connections with Basic Authentication | SAP Help Portal, Security Artifact Renewal for HTTPS-Based Communication | SAP Help Portal

NEW QUESTION # 49

You want to set up Exchange Properties in an integration flow. Besides a Content Modifier, what can you use?

- A. Python scripting
- B. XML scripting
- **C. Groovy SDK scripting**
- D. Batch scripting

Answer: C

Explanation:

The Groovy SDK scripting can be used to set up Exchange Properties in an integration flow. The Groovy SDK scripting allows you to access and manipulate message headers, properties, and payloads using Groovy scripts. You can use the setProperty method to set an Exchange Property with a name and a value. Reference: Modernize Integration with SAP Integration Suite | openSAP

NEW QUESTION # 50

Which SAP offering manages integrations across hybrid and multcloud environments?

- A. SAP process Orchestration manages integrations across hybrid and multcloud environments.
- B. SAP Business Technology Platform manages integrations across hybrid and multcloud environments.
- C. SAP Cloud Platform Integration manages integrations across hybrid and multcloud environments.
- **D. SAP Integration Suite manages integrations across hybrid and multcloud environments.**

Answer: D

Explanation:

SAP Integration Suite is the strategic integration platform-as-a-service (iPaaS) from SAP. It provides a comprehensive set of integration capabilities for hybrid and multcloud landscapes.

It connects on-premise SAP systems, cloud SAP solutions (e.g., S/4HANA Cloud, SuccessFactors, Ariba), and third-party applications.

It offers capabilities like Cloud Integration, API Management, Event Mesh, Open Connectors, and Integration Advisor to support various integration patterns.

SAP explicitly positions Integration Suite as the solution to manage end-to-end integrations across heterogeneous and distributed IT landscapes.

Other options:

SAP Cloud Platform Integration was the older name of Cloud Integration (now part of Integration Suite).

SAP Process Orchestration is the legacy on-premise middleware and not designed for multicloud/hybrid environments.

SAP BTP is the overall platform; integration is only one capability within it.

NEW QUESTION # 51

.....

Our C-CPI-2506 study prep has a pass rate of 98% to 100% because of the high test hit rate. So our C-CPI-2506 study materials are not only effective but also useful.
