Passing the exam demonstrates that you have the knowledge and skills required to secure email communications using the Cisco Email Security Appliance and can be a valuable asset for your career growth.

## Cisco Securing Email with Cisco Email Security Appliance Sample Questions (Q140-Q145):

**NEW QUESTION # 140**

**DRAG DROP**

Drag and drop the AsyncOS methods for performing DMARC verification from the left into the correct order on the right.  
Select and Place:

AsyncOS performs DMARC verification on the message.	step 1
A listener configured on AsyncOS receives an SMTP connection.	step 2
AsyncOS performs SPF and DKIM verification on the message.	step 3
AsyncOS fetches the DMARC record for the sender domain from the DNS.	step 4

**Answer:**

Explanation:

AsyncOS performs DMARC verification on the message.	A listener configured on AsyncOS receives an SMTP connection.
A listener configured on AsyncOS receives an SMTP connection.	AsyncOS performs SPF and DKIM verification on the message.
AsyncOS performs SPF and DKIM verification on the message.	AsyncOS fetches the DMARC record for the sender domain from the DNS.
AsyncOS fetches the DMARC record for the sender domain from the DNS.	AsyncOS performs DMARC verification on the message.

#### NEW QUESTION # 141

Which two configurations are used on multiple LDAP servers to connect with Cisco ESA? (Choose two.)

- A. active-standby
- B. SLA monitor
- C. active-active
- D. failover
- E. load balancing

**Answer: D,E**

Explanation:

Load balancing and failover are two configurations that can be used on multiple LDAP servers to connect with Cisco ESA. Load balancing means that Cisco ESA will distribute the LDAP queries among the available LDAP servers in a round-robin fashion, improving the performance and efficiency of the LDAP queries. Failover means that Cisco ESA will switch to another LDAP server if the current one is unavailable or unresponsive, ensuring the continuity and reliability of the LDAP queries.

Reference:

You can enter multiple host names to configure the LDAP servers for failover or load-balancing. Separate multiple entries with commas.

#### NEW QUESTION # 142

Which scenario prevents a message from being sent to the quarantine as an action in the scan behavior on Cisco ESA?

- A. More than one email pipeline is defined.
- B. A policy quarantine is missing.
- C. The "modify the message subject" is already set.
- D. The "add custom header" action is performed first.

**Answer: B**

Explanation:

A policy quarantine is a type of quarantine that allows Cisco ESA to store messages that match certain criteria, such as virus, spam, or DLP verdicts, for further review or release by an administrator or an end user.

A scenario that prevents a message from being sent to the quarantine as an action in the scan behavior on Cisco ESA is when a policy quarantine is missing, which means that no policy quarantine has been created or enabled on Cisco ESA.

The other options do not prevent a message from being sent to the quarantine as an action in the scan behavior on Cisco ESA.

#### NEW QUESTION # 143

To comply with a recent audit, an engineer must configure anti-virus message handling options on the incoming mail policies to attach warnings to the subject of an email.

What should be configured to meet this requirement for known viral emails?

- **A. Encrypted Messages**
- B. Unscannable Messages
- C. Positively Identified Messages
- D. Virus Infected Messages

**Answer: A**

#### NEW QUESTION # 144

Which Cisco ESA security service is configured only through an outgoing mail policy?

- A. Outbreak Filters
- B. AMP
- C. antivirus
- **D. DLP**

**Answer: D**

Explanation:

DLP (Data Loss Prevention) is a security service that is configured only through an outgoing mail policy on Cisco ESA. DLP allows Cisco ESA to scan outgoing messages for sensitive or confidential data, such as credit card numbers, social security numbers, health records, etc., and apply appropriate actions, such as encrypt, quarantine, notify, etc., to prevent data leakage or loss.
