Topic 7	• Identity and Access Management: This section explores authentication methods and technologies, authorization and access control models, and the identity management lifecycle.

ServiceNow Certified Implementation Specialist - Strategic Portfolio Management Sample Questions (Q98-Q103):

NEW QUESTION # 98
Depending on the execution type selected for a particular project, one of these dashboards will also be available:

- A. PMO Dashboard
- B. Project Summary - Waterfall Dashboard
- C. Timecard Dashboard
- D. User Manager Dashboard

Answer: B

Explanation:
Explanation
According to the Project Summary - Waterfall Dashboard document, depending on the execution type selected for a particular project, the Project Summary - Waterfall Dashboard will also be available. This dashboard provides a comprehensive view of the project status, progress, and performance using various widgets. The other options are not correct, as they are not dashboards that are dependent on the execution type of the project. The Timecard Dashboard is a dashboard that displays the time worked by users on various tasks. The User Manager Dashboard is a dashboard that displays the user management activities and statistics. The PMO Dashboard is a dashboard that displays the portfolio and project performance and health.

NEW QUESTION # 99
What is the default table that stores the idea categories that a user can select from when submitting an idea?

- A. im_category
- B. im_idea_core
- C. im_module
- D. dmn_demand

Answer: A

Explanation:
Explanation
According to the Category Configuration document, the default table that stores the idea categories that a user can select from when submitting an idea is im_category. This table contains the predefined categories for ideas, such as Business Process, Customer Service, or IT Service. The other options are not correct, as they are not the tables that store the idea categories. The dmn_demand table stores the demand records that are created from the approved ideas. The im_module table stores the idea modules that are used to group ideas by different criteria. The im_idea_core table stores the core fields of the idea records.

NEW QUESTION # 100
Which role provides edit access so users can generate capacity planning in Portfolio Planning Workspace?

- A. sn_align_ws.spw_capacity_user
- B. sn_align_ws.spw_capacity_read
- C. sn_align_ws.spw_financial_user
- D. sn_align_core.ap_read_only

Answer: A

NEW QUESTION # 101
Where do you define 'Roles' requested via resource plans?

- A. Roles under system security.
- B. No need to define it differently, they are same as system roles.
- C. Under skill management modules.
- D. Resource roles under resource management.

Answer: D

Explanation:
Explanation
According to the Assigning Resource Roles document, you define 'Roles' requested via resource plans under resource roles in the Resource Management application. Resource roles are the roles that users can request or allocate for resource plans. The other options are not correct, as they are not the places where you define
'Roles' requested via resource plans. The system roles are the roles that grant access to various applications and modules in the system. The roles under system security are the roles that control the security settings and permissions for the system. The skill management modules are the modules that manage the skills and skill levels of users and groups.

NEW QUESTION # 102
What is the default offset duration used to automatically calculate the red/yellow/green task status?

- A. 24 hours
- B. 5 days
- C. 0 days
- D. 3 days

Answer: D
