Free PDF Quiz SAP - Authoritative Latest Braindumps C-SIGDA-2403 Ebook

The only aim of our company is to help each customer pass their exam as well as getting the important certification in a short time. If you want to pass your exam and get the C-SIGDA-2403 certification which is crucial for you successfully, I highly recommend that

you should choose the C-SIGDA-2403 study materials from our company so that you can get a good understanding of the exam that you are going to prepare for. We believe that if you decide to buy the C-SIGDA-2403 Study Materials from our company, you will pass your exam and get the certification in a more relaxed way than other people.

SAP Certified Associate - Process Data Analyst - SAP Signavio Sample Questions (Q27-Q32):

NEW QUESTION # 27
What is a core capability of the transaction code analysis?

- A. It can show the various ways processes are executed in reality across the entire organization.
- B. It can check the number of transaction codes used on average for each process step and by company code.
- C. It can check the number of transaction codes used on average for one end-to-end process.
- D. It can show the average ways processes are executed in a particular company code.

Answer: B

NEW QUESTION # 28
What elements are part of the official BPMN 2.0 notation?Note: There are 2correct answers to this question.

- A. Pool
- B. Lane
- C. Stakeholders
- D. Additional Participant

Answer: A,B

Explanation:
In the official Business Process Model and Notation (BPMN) 2.0, both "Lane" and "Pool" are integral components. A "Lane" is a sub-division within a "Pool" and is used to organize and categorize activities within a business process, often by function or role. A "Pool," on the other hand, represents a participant within a process and encapsulates a set of activities performed by that participant. These elements are fundamental in BPMN for illustrating the flow of processes across various roles and organizations, thereby promoting clarity and efficiency in business process modeling. "Additional Participant" and "Stakeholders" are not standard terminology within the BPMN 2.0 specification for defining specific elements of a process diagram.References:BPMN 2.0 Specification

NEW QUESTION # 29
Which of the following areas are part of the lifecycle of a business process?Note: There are 3 correct answ-ers to this que-stion.

- A. Process Analysis
- B. Process Documentation
- C. Process Risk Management
- D. Process Execution
- E. Process Approvals

Answer: A,B,D

NEW QUESTION # 30
Which of the following is essential information that an Event Log must contain? Note: There are 3 correct answers to this question.

- A. Activity name
- B. Timestamp
- C. Customer ID
- D. Variant ID
- E. Unique Case ID

Answer: A,B,E

Explanation:
An event log is the foundation of Process Mining, providing the raw data needed to reconstruct process flows.
The SAP Signavio documentation specifies the mandatory components of an event log:
* Option B (Unique Case ID):A unique identifier for each process instance (case) is essential to track individual process executions and correlate events within the same case.
* Option D (Timestamp):Timestamps indicate when each event occurred, enabling the sequencing of activities and calculation of metrics like cycle time or delays.
* Option E (Activity name):The name of each activity (e.g., "Order Created") describes the specific action performed, allowing Process Mining to map out the process flow.
* Option A (Customer ID)is incorrect as it is an optional attribute, not a mandatory component of an event log, though it may be included for specific analyses.
Reference:SAP Signavio Process Intelligence ETL Guide, section on "Event Log Requirements"; SAP Certified Associate - Process Data Analyst Study Guide, Chapter 5: Event Log Structure.

NEW QUESTION # 31
What are the benefits of running a syntax check of your process?Note: There are 2 correct answ-ers to this que-stion.

- A. It ensures consistency of the process model.
- B. It verifies that the used BPMN elements are set correctly.
- C. It ensures the correct order of tasks.
- D. It shows all bottlenecks in a process.

Answer: A,B

NEW QUESTION # 32

......
