Updates to SAP C-ACDET-2506 Exam Questions Are Free For 1 year

Our product's passing rate is 99% which means that you almost can pass the test with no doubts. The reasons why our C-ACDET-2506 study materials' passing rate is so high are varied. Firstly, our test bank includes two forms and they are the PDF test questions which are selected by the senior lecturer, published authors and professional experts and the practice test software which can test your mastery degree of our C-ACDET-2506 Study Materials at any time. The two forms cover the syllabus of the entire test. Our questions and answers include all the questions which may appear in the exam and all the approaches to answer the questions. So we provide the strong backing to help clients to help them pass the test.

SAP C-ACDET-2506 Exam Syllabus Topics:

Topic	Details
Topic 1	• Project Overview, Roles and Responsibilities: This section of the exam measures the skills of an SAP Cloud Consultant and covers the fundamental understanding of SAP Activate methodology within the context of a cloud implementation project. Candidates are expected to be familiar with the project lifecycle, including phases such as Prepare, Explore, Realize, Deploy, and Run. This part also focuses on identifying key roles and responsibilities within a cloud project team, ensuring clarity in collaboration between consultants, clients, and SAP. It checks whether the consultant understands governance, stakeholder management, and the high-level structure of cloud deployment using SAP best practices.
Topic 2	• Deploy and Migration: This part of the exam assesses the expertise of an SAP Deployment Specialist and focuses on the final deployment of the configured solution and the data migration process. Candidates should demonstrate a solid grasp of how to move configurations from a testing environment into production while minimizing disruption. It also includes knowledge of tools and strategies used for data extraction.

Topic 3	• Field Configuration: This domain evaluates the knowledge of an SAP Deployment Specialist and focuses on customizing and configuring business fields in the SAP system according to client-specific needs. This includes adjusting system settings for master data, transaction data, and other essential field-level controls to support business processes effectively. The section tests the candidate's ability to use configuration tools, apply SAP standard templates, and ensure that the field configurations align with the desired operational workflows of the business. It also touches upon validation, testing, and documenting the configuration changes made during the implementation.

After you purchase C-ACDET-2506 exam certification training information, we will provide one year free renewal service.

SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite Sample Questions (Q16-Q21):

NEW QUESTION # 16
During the configuration of a new custom field, after it's been saved but before the field has been Published, you realize that you set the wrong type of the field.
What is the next step you should take to resolve the issue?

- A. Change the field Type by selecting the intended type in the dropdown and Save
- B. Mark the field as Hidden, and create a new field with a slightly different name and the intended field Type
- C. Delete the field and create a new field with the same name and the intended field type
- D. Clear and recreate the field with same field name and the intended field type

Answer: C

NEW QUESTION # 17
A French translation of a custom field label needs to be updated. Where do you update it?

- A. AML & Translations Upload
- B. Customization Manager - Views
- C. Layout tab
- D. Field Configuration + Label

Answer: A

Explanation:
SAP Ariba handles translations for custom field labels, help tips, and validation messages through the AML & Translations Upload mechanism. Administrators export the translation JSON or spreadsheet file, update the French (or other language) entries, and then re-import the updated file to apply translations.
Field Configuration + Label (C) sets the base language label but does not manage translations for other languages. The Customization Manager Views and Layout tabs are unrelated to translation management.
This method centralizes translation management and supports multiple languages consistently across the application.

NEW QUESTION # 18
Which data elements are shared in a Suite-Integrated Environment? (Select 3 correct answers)

- A. Exception Types
- B. User Group mapping
- C. Users
- D. Supplier Catalogs
- E. Suppliers

Answer: B,C,E

Explanation:
In a Suite-Integrated SAP Ariba environment, master data elements such as Suppliers, Users, and User Group mappings are shared across sourcing and procurement modules, enabling unified access and data consistency. Supplier Catalogs and Exception Types are not typically shared master data in this context. This integration supports seamless workflows and consistent security roles, enhancing usability and governance.

NEW QUESTION # 19

Which scenarios are applicable when moving templates from the test site to the production site by Intelligent Configuration Manager (ICM)? (Select 2 correct answers)

- A. Published templates with flex master data references in the test site are migrated to the production site during the first migration attempt.
- B. New templates that successfully migrated to the production site are in Draft state.
- C. Draft templates on the source site are skipped.
- D. Batch imports are available for templates when migrating configuration bundles.

Answer: B,C

Explanation:
ICM only migrates published templates; draft templates are skipped (A). When templates are imported into production, they arrive in draft state by default to allow review and publishing before use (C). Batch imports for templates (B) are not supported; migration is typically handled per template. Flex master data references require manual migration steps and are not migrated automatically during the initial template transfer (D).

NEW QUESTION # 20

The customer wants to have a field to hold Contract Storage Locations and the address. Those locations are loaded from an external system, and the user should be able to search for storage locations.
What should be used to hold the valid storage locations?

- A. Create a new field of type Text, with a custom Validation where the available Storage Locations are listed.
- B. You should load a new Enumeration Type and call it Storage Location and load the location addresses. Create a new field of type Enumeration with a custom filter to only Enumerations of type show Storage Locations.
- C. You should create a new Fl ex Master Data (FMD) Template with appropriate attributes and call it Storage Location. Once the template is published and sample data loaded, you can create a custom field and select the type Storage Location
- D. Create a new field of type Date, where each date entry is tied to a unique Storage Location and its corresponding address, allowing users to select locations based on historical data entries.

Answer: C

NEW QUESTION # 21

......

C-ACDET-2506 practice test can be your optimum selection and useful tool to deal with the urgent challenge. With over a decade's striving, our C-ACDET-2506 training materials have become the most widely-lauded and much-anticipated products in industry. We will look to build up R&D capacity by modernizing innovation mechanisms and fostering a strong pool of professionals. Therefore, rest assured of full technical support from our professional elites in planning and designing C-ACDET-2506 Practice Test.
