SAP Certified Associate - SAP S/4HANA Cloud Private Edition, Extended Warehouse Management Sample Questions (Q37-Q42):

NEW QUESTION # 37

You define new SAP Extended Warehouse Management (SAP EWM) delivery document types for inbound delivery processes. Which additional customizing step is required in SAP EWM?

- A. Map an SAP ERP document type to the delivery document type
- B. Define a document category for the inbound process.
- C. Define a delivery item type for the inbound process.
- D. Create a new system profile for the field control.

Answer: A

Explanation:

When defining new delivery document types for inbound processes in SAP EWM, an essential customizing step is:

- * C. Map an SAP ERP document type to the delivery document type:
 - * This ensures that the delivery document type in SAP ERP is correctly linked to the corresponding delivery document type in SAP EWM.
 - * Mapping is critical for seamless integration and data consistency between ERP and EWM systems.

Incorrect Options:

- * A: System profiles for field control do not need to be newly created for delivery document types.
- * B: Document categories are predefined and do not need customization.
- * D: Delivery item types are relevant but not directly required for document type definition.

References:

- * SAP Help Portal: Delivery Document Type Customization
- * SAP EWM Documentation: ERP-EWM Integration for Inbound Deliveries

NEW QUESTION # 38

How can you determine the labor activities to calculate the planned duration for activities in the warehouse? Note: There are 2 correct answers to this question.

- A. As a standard step
- **B. Directly**
- C. Using a work step sequence
- **D. Using a decision service in BRFplus**

Answer: B,D**NEW QUESTION # 39**

Which objects can you add to the warehouse cockpit? Note: There are 2 correct answers to this question.

- **A. Calculated measurement services**
- B. Basic measurement services
- **C. Tailored measurement services**
- D. Alerts from alert management

Answer: A,C

Explanation:

Warehouse Cockpit Configuration

- * The warehouse cockpit is a customizable dashboard to monitor KPIs and warehouse activities.
- * Calculated Measurement Services (B): Derived from key data to calculate metrics for the cockpit.
- * Tailored Measurement Services (C): Custom-defined services based on specific operational needs.

Excluded Options

- * Alerts from Alert Management (A): Alerts are not cockpit components; they are part of exception handling.
- * Basic Measurement Services (D): These are foundational but not directly addable to the cockpit.

SAP S/4HANA Cloud Private Edition Reference

- * Refer to Configuring the Warehouse Cockpit in SAP EWM documentation.

NEW QUESTION # 40

Which of the following are types of data contained in SAP S/4HANA Cloud? Note: There are 3 correct answers to this question.

- **A. Master**
- B. Configuration
- C. Business
- **D. Organization**
- **E. Transaction**

Answer: A,D,E

Explanation:

Comprehensive and Detailed In-Depth Explanation:

SAP S/4HANA Cloud, including EWM, manages various data types. Option A ("Transaction") is correct for operational data (e.g., warehouse tasks), option C ("Master") is correct for foundational data (e.g., material master), and option D ("Organization") is correct for structural data (e.g., warehouse number), all integral to EWM and configured via master data and transaction processing. Option B (configuration) is a setup activity, not a data type, and option E (business) is too vague.

NEW QUESTION # 41

Which of the following can you include in a storage type search sequence for stock removal? Note: There are 2 correct answers to this question.

- A. A list of storage bin types
- B. A list of storage type groups
- **C. A list of storage sections**
- **D. A list of storage types**

Answer: C,D

Explanation:

Comprehensive and Detailed In-Depth Explanation:

The storage type search sequence in SAP EWM defines the order for stock removal (e.g., picking). Option C ("A list of storage sections") is correct as sections within a storage type can be prioritized, and option D ("A list of storage types") is correct because multiple storage types (e.g., high rack, picking area) are sequenced, both configured in SPRO: SCM Extended Warehouse Management > Goods Issue Process > Strategies > Define Storage Type Search Sequence. Option A (storage type groups) is used for putaway, not removal, and option B (bin types) is too granular for this sequence.

NEW QUESTION # 42

.....

To obtain the SAP certificate is a wonderful and rapid way to advance your position in your career. In order to reach this goal of passing the C-S4EWM-2023 exam, you need more external assistance to help yourself.
