

# Quiz 2026 Accurate CompTIA CV0-004: CompTIA Cloud+ (CV0-004) Certification Exam Fresh Dumps

P.S. Free 2026 CompTIA CV0-004 dumps are available on Google Drive shared by VerifiedDumps:  
<https://drive.google.com/open?id=1ghJ1VTyDMTkU9FU5vVMYfHwBkphpRbXS>

The CV0-004 exam is the right way to learn new in-demand skills and upgrade knowledge. After passing the CompTIA Cloud+ (CV0-004) Certification Exam (CV0-004) exam the successful candidates can gain multiple personal and professional benefits with the real CompTIA CV0-004 Exam Questions. Validation of skills, more career opportunities, increases in salary, and increases in the chances of promotion are some prominent benefits of the CompTIA CV0-004 certification exam.

All points of questions are correlated with the newest and essential knowledge. The second one of CV0-004 test guide is emphasis on difficult and hard-to-understand points. Experts left notes for your reference, and we believe with their notes things will be easier. In addition, the new supplementary will be sent to your mailbox if you place order this time with beneficial discounts at intervals. So our CV0-004 Exam Questions mean more intellectual choice than other practice materials.

## CompTIA CV0-004 Fresh Dumps: CompTIA Cloud+ (CV0-004) Certification Exam - VerifiedDumps Spend your Little Time and Energy to prepare

The CompTIA Cloud+ (CV0-004) Certification Exam certification has become very popular to survive in today's difficult job market in the technology industry. Every year, hundreds of CompTIA aspirants attempt the CV0-004 exam since passing it results in well-paying jobs, salary hikes, skills validation, and promotions. Lack of Real CV0-004 Exam Questions is their main obstacle during CV0-004 certification test preparation.

## CompTIA Cloud+ (CV0-004) Certification Exam Sample Questions (Q105-Q110):

### NEW QUESTION # 105

A project stakeholder has asked the project manager to provide the performance data of a project. Which of the following should the project manager send to the stakeholder?

- A. Dashboard
- B. Milestone chart
- C. Issue log
- D. WBS

**Answer: A**

Explanation:

A dashboard provides visual, real-time performance data such as KPIs, budget usage, and progress toward deliverables. This helps stakeholders quickly interpret project health. Milestones only show schedule checkpoints, and issue logs track problems, not overall performance.

### NEW QUESTION # 106

A cloud engineer needs to migrate an application from on premises to a public cloud. Due to timing constraints, the application cannot be changed prior to migration. Which of the following migration strategies is best approach for this use case?

- A. Rehost
- B. Refactor
- C. Retire
- D. Rearchitect

**Answer: A**

Explanation:

Rehosting, often referred to as "lift-and-shift," is the process of migrating an application or workload to the cloud without modifying it. This approach is suitable when there are timing constraints that prevent making changes to the application prior to migration. Rehosting can be the quickest migration strategy since it involves moving the existing applications to the cloud with minimal changes.

### NEW QUESTION # 107

A project manager must determine how ideas from the organization and results from the review committee should move through the enterprise for a new project. Which of the following does the project manager need to do?

- A. Identify the stakeholders
- B. Plan a kickoff meeting
- C. Establish communication channels
- D. Develop a responsibility assignment matrix

**Answer: C**

Explanation:

The correct step is to establish communication channels that ensure proper flow of information from idea origination through review and approval. Kickoff meetings occur later, while RACI matrices and stakeholder identification are planning tools -- not communication flow structures.

### NEW QUESTION # 108

#### SIMULATION 5

A company has decided to scale its e-commerce application from its corporate datacenter to a commercial cloud provider to meet an anticipated increase in demand during an upcoming holiday.

The majority of the application load takes place on the application server under normal conditions. For this reason, the company decides to deploy additional application servers into a commercial cloud provider using the on-premises orchestration engine that installs and configures common software and network configurations.

The remote computing environment is connected to the on-premises datacenter via a site-to-site IPSec tunnel. The external DNS provider has been configured to use weighted round-robin routing to load balance connections from the Internet.

During testing, the company discovers that only 20% of connections completed successfully.

#### INSTRUCTIONS

Review the network architecture and supporting documents and fulfill these requirements:

Part 1:

Analyze the configuration of the following components: DNS, Firewall 1, Firewall 2, Router 1,

Router 2, VPN and Orchestrator Server.

Identify the problematic device(s).

Part 2:

Identify the correct options to provide adequate configuration for hybrid cloud architecture.

If at any time you would like to bring back the initial state of the simulation, please click the Reset All button.

Part 1:

Cloud Hybrid Network Diagram

Part 2:

Only select a maximum of TWO options from the multiple choice question. (Choose two.)

□

**Answer:**

Explanation:

Part 1: Router 2

The problematic device is Router 2, which has an incorrect configuration for the IPsec tunnel.

The IPsec tunnel is a secure connection between the on-premises datacenter and the cloud provider, which allows the traffic to flow between the two networks. The IPsec tunnel requires both endpoints to have matching parameters, such as the IP addresses, the pre-shared key (PSK), the encryption and authentication algorithms, and the security associations (SAs).

According to the network diagram and the configuration files, Router 2 has a different PSK and a different address space than Router 1. Router 2 has a PSK of "1234567890", while Router 1 has a PSK of "0987654321". Router 2 has an address space of 10.0.0.0/8, while Router 1 has an address space of 192.168.0.0/16. These mismatches prevent the IPsec tunnel from establishing and encrypting the traffic between the two networks.

The other devices do not have any obvious errors in their configuration. The DNS provider has two CNAME records that point to the application servers in the cloud provider, with different weights to balance the load. The firewall rules allow the traffic from and to the application servers on port 80 and port 443, as well as the traffic from and to the VPN server on port 500 and port 4500. The orchestration server has a script that installs and configures the application servers in the cloud provider, using the DHCP server to assign IP addresses.

Part 2:

The correct options to provide adequate configuration for hybrid cloud architecture are:

- Update the PSK (Pre-shared key) in Router 2.
- Change the Address Space on Router 2.

These options will fix the IPsec tunnel configuration and allow the traffic to flow between the on-premises datacenter and the cloud provider. The PSK should match the one on Router 1, which is "0987654321". The address space should also match the one on Router 1, which is 192.168.0.0/16.

**NEW QUESTION # 109**

A cloud solution needs to be replaced without interruptions. The replacement process can be completed in phases, but the cost should be kept as low as possible. Which of the following is the best strategy to implement?

- A. Canary
- B. Blue-green
- C. Rolling
- D. In-place

**Answer: C**

Explanation:

A rolling strategy is the best to implement when needing to replace a cloud solution without interruptions and keeping costs low. This approach updates or replaces parts of the system gradually with minimal downtime and allows for a phased implementation.

**NEW QUESTION # 110**

.....

After clients pay for our CV0-004 exam torrent successfully, they will receive the mails sent by our system in 5-10 minutes. Then the client can click the links and download and then you can use our CV0-004 questions torrent to learn. Because time is very important for the people who prepare for the exam, the client can download immediately after paying is the great advantage of our CV0-004 Guide Torrent.

**New CV0-004 Braindumps Free:** <https://www.verifiedumps.com/CV0-004-valid-exam-braindumps.html>

The first format is New CV0-004 Braindumps Free - CompTIA Cloud+ (CV0-004) Certification Exam PDF dumps which is printable and portable, You can get good training tools about the CompTIA CV0-004 certification exam on our website, CompTIA CV0-004 Fresh Dumps That's why we allow our clients to trust us and share their personal details to get any kind of help regarding their queries, CompTIA CV0-004 Fresh Dumps It not only means that your efforts are valid, but also means that your ability has been improved.
