Note: There are 2 correct answers to this question

- A. Group currency
- B. Scoping
- C. Fiscal year variant
- D. Configuration activities

Answer: A,C

Explanation:

Fiscal year variant and group currency are activities that are applied to the entire system and cannot be changed after confirmation in SAP Central Business Configuration. These activities are part of the system provisioning step, which is the first step in the implementation process. Once the system provisioning is completed and confirmed, the system is locked for these activities and any changes would require a new system provisioning. Scoping and configuration activities, on the other hand, are not applied to the entire system and can be changed later on in the project experience step, which is the second step in the implementation process. Scoping and configuration activities allow the user to adapt the preconfiguration content to their company's needs and extend the configuration for areas not equipped with preconfiguration content. NEW QUESTION # 36

What provides a foundation for the SAP Cloud ERP where integrations and extensions live?

- A. SAP ABAP Environment
- B. SAP Business Accelerator Hub
- C. SAP Business Technology Platform
- D. SAP Discovery Center

Answer: C

Explanation:

SAP Business Technology Platform (BTP) provides a foundation for the SAP Cloud ERP where integrations and extensions live. SAP BTP is a cloud-based platform that offers a range of services and capabilities to extend, integrate, and orchestrate SAP and non-SAP applications. SAP BTP enables customers and partners to build extensions that are decoupled from the core SAP S/4HANA Cloud system, ensuring lifecycle stability and avoiding modification of SAP code. SAP BTP also leverages the huge library of free integration packages and extension templates available on the SAP Business Accelerator Hub, which can be consumed and customized according to the customer's needs. All services are listed in the SAP Discovery Center, where customers can explore, try, and buy SAP BTP services.

SAP ABAP Environment, SAP Discovery Center, and SAP Business Accelerator Hub are not the foundation for the SAP Cloud ERP, but rather components or tools that are related to SAP BTP. SAP ABAP Environment is a service on SAP BTP that allows customers and partners to develop and run ABAP code in the cloud. SAP Discovery Center is a portal that showcases the available services and solutions on SAP BTP and guides customers through the end-to-end journey of discovering, trying, buying, and implementing them.

SAP Business Accelerator Hub is a repository of ready-to-use integration packages and extension templates that can be deployed on SAP BTP to accelerate the implementation of SAP S/4HANA Cloud.
