

JN0-481 Reliable Test Review | JN0-481 Practice Test Online

P.S. Free & New JN0-481 dumps are available on Google Drive shared by It-Tests: <https://drive.google.com/open?id=1ViNvvY8t55YgzakfEgO0mBguCMWhctYI>

There are several pages we have set a special module to answer the normal question on our JN0-481 exam braindumps that most candidates may pay great attention to. If you come across questions about our JN0-481 training materials, you can browser the module. Also, we have a chat window below the web page. You can write down your questions on the JN0-481 Study Guide and send to our online workers. You will soon get a feedback and we will give you the most professional guidance.

The JN0-481 exam questions by experts based on the calendar year of all kinds of exam after analysis, it is concluded that conforms to the exam thesis focus in the development trend, and summarize all kind of difficulties you will face, highlight the user review must master the knowledge content. Our Data Center, Specialist (JNCIS-DC) study question has high quality. So there is all effective and central practice for you to prepare for your test. With our professional ability, we can accord to the necessary testing points to edit JN0-481 Exam Questions. It points to the exam heart to solve your difficulty.

JN0-481 Practice Test Online, Free JN0-481 Download Pdf

In the learning process, many people are blind and inefficient for without valid JN0-481 exam torrent and they often overlook some important knowledge points which may occupy a large proportion in the Juniper JN0-481 exam, and such a situation eventually lead them to fail the exam. While we can provide absolutely high quality guarantee for our Data Center, Specialist (JNCIS-DC) JN0-481 practice materials, for all of our learning materials are finalized after being approved by industry experts.

Juniper Data Center, Specialist (JNCIS-DC) Sample Questions (Q75-Q80):

NEW QUESTION # 75

Within Managed Devices in the Juniper Apstra UI, you notice that several devices have the OOS- Quarantined status. The devices cannot be added to any blueprint. Which action would solve this problem?

- A. Fix the hardware issues with the quarantined devices.
- **B. Acknowledge the device.**
- C. Install the agent, even though connectivity is established.
- D. Upload a new pristine configuration.

Answer: B

Explanation:

When an agent installation is successful, devices are placed into the Out of Service Quarantined (OOS-QUARANTINED) state using the Juniper Apstra UI. This state means that the device is not yet managed by Apstra and has not been assigned to any blueprint. The device configuration at this point is called Pristine Config. To make the device ready for use in a blueprint, you need to acknowledge the device, which is a manual action that confirms the device identity and ownership. Acknowledging the device changes its status to Out of Service Ready (OOS- READY).

NEW QUESTION # 76

Which two statements are correct about the graph query output shown in the exhibit? (Choose two.)

□

- **A. The switch in the output is a Juniper device.**
- **B. The output shows a LAG connection.**
- C. The interface has tags assigned to it.
- D. The interface has an IP address assigned to it.

Answer: A,B

Explanation:

The graph query output shown in the exhibit is a JSON representation of an interface node and its properties in the Apstra graph database. Based on the output, we can infer the following statements:

The output shows a LAG connection. This is true because the interface node has a property called `lag_mode` which is set to `lacp_active`, indicating that the interface is part of a link aggregation group (LAG) that uses the Link Aggregation Control Protocol (LACP) to negotiate the link state and parameters.

The switch in the output is a Juniper device. This is true because the interface node has a property called `if_name` which is set to `ae`, indicating that the interface name follows the Juniper naming convention for aggregated Ethernet interfaces.

The interface has an IP address assigned to it. This is false because the interface node has properties called `ipv4_addr` and `ipv6_addr` which are both set to null, indicating that the interface does not have any IPv4 or IPv6 address configured.

The interface has tags assigned to it. This is false because the interface node has a property called `tags` which is set to null, indicating that the interface does not have any tags associated with it.

NEW QUESTION # 77

Referring to the exhibit, how many broadcast domains will an Ethernet frame pass through when traversing the IP fabric from Server A to Server B?

□

- A. 0
- B. 1
- **C. 2**
- D. 3

Answer: C

Explanation:

Referring to the exhibit, the image shows a simplified diagram of an IP fabric network connecting two servers, labeled as Server A and Server B. The IP fabric is a network architecture that uses a Clos topology to provide high bandwidth, low latency, and scalability for data center networks.

The IP fabric consists of spine and leaf devices that use BGP as the routing protocol and VXLAN as the overlay technology.

A broadcast domain is a logical portion of a network where any device can directly transmit broadcast frames to other devices at the data link layer (OSI Layer 2). A broadcast frame is a frame that has a destination MAC address of all ones (FF:FF:FF:FF:FF:FF), which means that it is intended for all devices in the same broadcast domain. A broadcast domain is usually bounded by a router, which does not forward broadcast frames to other networks.

In the exhibit, there are two broadcast domains that an Ethernet frame will pass through when traversing the IP fabric from Server A to Server B. The first broadcast domain is the one that contains Server A and the leaf device that it is connected to. The second

broadcast domain is the one that contains Server B and the leaf device that it is connected to. The IP fabric itself is not a broadcast domain, because it uses IP routing and VXLAN encapsulation to transport the Ethernet frames over the Layer 3 network.

NEW QUESTION # 78

In Juniper Apstra, which statement is correct?

- A. VMware anomaly detection requires a vCenter server configured under External Systems
- B. VMware anomaly detection is on by default.
- C. VMware anomaly detection requires an Apstra server running on VMware.
- D. VMware anomaly detection requires a VMware hypervisor with exports enabled.

Answer: A

Explanation:

VMware anomaly detection is a feature of Apstra that provides visibility and validation of the virtual network settings and the physical network settings in a VMware vSphere environment. To enable this feature, Apstra requires a connection to a vCenter server that manages the ESX/ESXi hosts and the VMs connected to the Apstra-managed leaf switches. The vCenter server must be configured under External Systems in the Apstra web interface, and the vCenter integration must be staged and committed in the blueprint. This allows Apstra to collect information about VMs, ESX/ESXi hosts, port groups, and VDS, and to flag any inconsistencies or mismatches that might affect VM connectivity.

NEW QUESTION # 79

What is the purpose of an interface map in Juniper Apstra?

- A. An interface map associates a logical device with a device profile.
- B. An interface map specifies the connections between racks in a template.
- C. An interface map specifies the number of ports and the port speeds of a logical device
- D. An interface map specifies a connection between the interfaces of two devices.

Answer: D

Explanation:

An interface map is a configuration template that maps interfaces between logical devices and physical hardware devices (represented with device profiles) while adhering to vendor specifications. An interface map specifies a connection between the interfaces of two devices, such as a leaf and a spine, a leaf and a server, or a leaf and an external gateway. An interface map can also specify port transformations, such as breaking out a 40 GbE port into four 10 GbE ports, or disabling unused ports. An interface map can be used to achieve the intended network configuration rendering and to enable features such as LAG, ESI-LAG, or MLAG.

NEW QUESTION # 80

.....

Our JN0-481 guide materials are high quality and high accuracy rate products. It is all about the superior concreteness and precision of the JN0-481 exam questions that helps. Every page and every points of knowledge have been written from professional experts who are proficient in this line and are being accounting for this line over ten years. And they know every detail about our JN0-481 learning prep and can help you pass the exam for sure.

JN0-481 Practice Test Online: <https://www.it-tests.com/JN0-481.html>

If you work hard using our top-rated, updated, and excellent Juniper JN0-481 pdf questions, nothing can refrain you from getting the Data Center, Specialist (JNCIS-DC) (JN0-481) certificate on the maiden endeavor, Passing the JN0-481 exam means you might get the chance of higher salary, greater social state and satisfying promotion chance, Juniper JN0-481 Reliable Test Review 24x7 Customer Support on Live Chat and Email.

I'll even throw in a few comparisons to other tools like Adobe Edge Reflow CC JN0-481 where applicable, Mac OS X comes with dozens of utilities and applications—many of which can be easily cataloged, such as Internet and media tools.

JN0-481 Reliable Test Review 100% Pass | Latest Data Center, Specialist

(JNCIS-DC) Practice Test Online Pass for sure

If you work hard using our top-rated, updated, and excellent Juniper JN0-481 PDF Questions, nothing can refrain you from getting the Data Center, Specialist (JNCIS-DC) (JN0-481) certificate on the maiden endeavor.

Passing the JN0-481 exam means you might get the chance of higher salary, greater social state and satisfying promotion chance, 24x7 Customer Support on Live Chat and Email.

Get the most updated Data Center, Specialist (JNCIS-DC) exam dumps, questions and answers Study JN0-481 Material and practice test from It-Tests, Itcert-online.com helps millions of candidates pass the exams and get the certifications.
