Then you don't have to spend extra time searching for information when you're facing other exams later, just choose us again. As long as you face problems with the exam, our company is confident to help you solve. Give our Terraform-Associate-004 practice quiz a choice is to give you a chance to succeed. We are very willing to go hand in hand with you on the way to preparing for Terraform-Associate-004 exam.

>> Test Terraform-Associate-004 Online <<

Prepares you for the format of your Terraform-Associate-004 exam dumps

To know well your level of Terraform-Associate-004 Exam Preparation, we offer you the online test engine version which is an exam simulation to help you in knowing your weak point in Terraform-Associate-004 practice test and therefore provide an opportunity to fulfill your deficiencies prior to HashiCorp real exam. Once there are latest versions released, we will send it to your email immediately.

HashiCorp Certified: Terraform Associate (004) (HCTA0-004) Sample Questions (Q159-Q164):

NEW QUESTION # 159

You cannot install third party plugins using terraform init.

- A. False
- B. True

Answer: A

Explanation:

You can install third party plugins using terraform init, as long as you specify the plugin directory in your configuration or as a command-line argument. You can also use the terraform providers mirror command to create a local mirror of providers from any

source.

NEW QUESTION # 160

What task does the terraform import command perform?

- **A. Imports existing resources into Terraform's state file.**
- B. Imports a new Terraform module into Terraform's state file.
- C. Imports resources from one Terraform state file to another.
- D. Imports provider configuration from one state file to another.
- E. Imports all infrastructure from the configured cloud provider.

Answer: A

Explanation:

Rationale for Correct Answer (B):

terraform import allows Terraform to associate existing resources (created outside of Terraform or by another tool) with a Terraform configuration by writing them into the state file. After import, Terraform can manage those resources.

Analysis of Incorrect Options:

A . From one state file to another: Incorrect, import does not transfer between state files.

C . Importing a module: Incorrect, modules are defined in configuration, not imported.

D . Import all infrastructure: Incorrect, import is per-resource, not bulk.

E . Provider configuration transfer: Incorrect, provider configs are in .tf files, not imported with this command.

Key Concept:

The terraform import command bridges existing resources with Terraform state management.

Reference:

Terraform Exam Objective - Implement and Maintain State.

NEW QUESTION # 161

You have never used Terraform before and would like to test it out using a shared team account for a cloud provider. The shared team account already contains 15 virtual machines (VM). You develop a Terraform configuration containing one VM. perform terraform apply, and see that your VM was created successfully.

What should you do to delete the newly-created VM with Terraform?

- A. Delete the VM using the cloud provider console and terraform apply to apply the changes to the Terraform state file.
- B. Delete the Terraform state file and execute terraform apply.
- **C. The Terraform state file only contains the one new VM. Execute terraform destroy.**
- D. The Terraform state file contains all 16 VMs in the team account. Execute terraform destroy and select the newly-created VM.

Answer: C

Explanation:

This is the best way to delete the newly-created VM with Terraform, as it will only affect the resource that was created by your configuration and state file. The other options are either incorrect or inefficient.

NEW QUESTION # 162

Terraform installs its providers during which phase?

- A. All of the above
- B. Plan
- C. Refresh
- **D. Init**

Answer: D

Explanation:

Terraform installs providers during the terraform init phase.

Providers are downloaded and installed when running terraform init.

A (terraform plan) is incorrect because terraform plan only calculates changes but does not install providers.
C (terraform refresh) is incorrect because terraform refresh only updates the state but does not install providers.
Official Terraform Documentation Reference:
Provider Installation - HashiCorp Documentation

NEW QUESTION # 163

Which of the following can you do with terraform plan? (Pick 2 correct responses)

- A. Schedule Terraform to run at a planned time in the future.
- B. Execute a plan in a different workspace.
- C. Save a generated execution plan to apply later.
- D. View the execution plan and check if the changes match your expectations.

Answer: C,D

Explanation:

Rationale for Correct Answers:

B). View the execution plan: Correct - terraform plan shows what Terraform intends to do (create, update, or destroy).

C). Save a generated execution plan: Correct - using terraform plan -out=planfile lets you save the plan to apply later with terraform apply planfile.

Analysis of Incorrect Options:

A). Schedule runs in the future: Incorrect, Terraform does not provide scheduling; external tools (like cron, CI /CD) are required.

D). Execute a plan in a different workspace: Incorrect, execution happens in the current workspace; switching workspaces must be done before running the plan.

Key Concept:

terraform plan is used for previewing and optionally saving an execution plan for controlled and predictable infrastructure changes.

Reference: Terraform Exam Objective - Understand Terraform Basics and CLI.

NEW QUESTION # 164

.....

In the process of using the Terraform-Associate-004 study training materials, once users have any questions about our study materials, the user can directly by E-mail us, our products have a dedicated customer service staff to answer for the user, they are 24 hours service for you, we are very welcome to contact us by E-mail and put forward valuable opinion for us. Our Terraform-Associate-004 Latest Questions already have three different kinds of learning materials, what is the most suitable Terraform-Associate-004 test guide for you? You can just follow the instructions for Terraform-Associate-004 study guide on the web or ask our services about it.
