If you buy and use the C_S4CPB_2502 study materials from our company, we believe that our study materials will make study more interesting and colorful, and it will be very easy for a lot of people to pass their exam and get the related certification if they choose our C_S4CPB_2502 study materials and take it into consideration seriously. Now we are willing to introduce the C_S4CPB_2502 Study Materials from our company to you in order to let you have a deep understanding of our study materials. We believe that you will benefit a lot from our C_S4CPB_2502 study materials.

SAP Certified Associate - Implementation Consultant - SAP S/4HANA Cloud Public Edition Sample Questions (Q27-Q32):

NEW QUESTION # 27

What are some characteristics of the SAP S/4HANA Migration Cockpit? Note: There are 2 correct answers to this question.

- A. Combining the local and remote schema approaches into one migration project
- B. **Mapping source values to SAP S/4HANA target values**
- C. **Guidance and simulation of the migration process**
- D. Extensibility using the Legacy System Migration Workbench

Answer: B,C

Explanation:

The SAP S/4HANA Migration Cockpit is a tool that facilitates the transfer of business data from a source system to SAP S/4HANA. It uses migration objects to identify and transfer the relevant data for a specific business object. The SAP S/4HANA Migration Cockpit has the following characteristics1:

- * It allows mapping source values to SAP S/4HANA target values, as well as converting values that are migrated from source fields to target fields. This ensures data consistency and quality in the target system
- * It provides guidance and simulation of the migration process, as well as error handling and monitoring. This helps to reduce the complexity and risk of data migration, and to ensure a smooth and successful data transfer.
- * It does not support extensibility using the Legacy System Migration Workbench (LSMW), which is a tool for data migration from legacy systems to SAP systems. The SAP S/4HANA Migration Cockpit has its own extensibility framework, the SAP S/4HANA Migration Object Modeler, which allows creating and enhancing migration objects2.
- * It does not combine the local and remote schema approaches into one migration project. The SAP S/4HANA Migration Cockpit offers three options for transferring data to SAP S/4HANA: using files, using staging tables, or using direct transfer from an SAP system1. Each option requires a separate migration project and has its own advantages and limitations3.

NEW QUESTION # 28

Which activities does the consultant do before the first Fit-to-Standard workshop? Note: There are 2 correct answers to this question.

- A. **Deactivate scope items that are NOT part of the Statement of Work/Digital Discovery Assessment.**
- B. **Review the integration requirements collected from the Digital Discovery Assessment.**
- C. Upload customer master data in the Starter system using migration templates.
- D. Evaluate the L2 Business-Driven Configuration Questionnaire responses.

Answer: A,B

Explanation:

Before the first Fit-to-Standard workshop, the consultant should do the following activities:

- * Deactivate scope items that are NOT part of the Statement of Work/Digital Discovery Assessment. This is to ensure that the Starter system reflects the agreed scope of the project and does not include any unnecessary or out-of-scope items. The consultant can use the Scope Item Management app to deactivate scope items1.
- * Review the integration requirements collected from the Digital Discovery Assessment. This is to understand the customer's integration needs and prepare for the integration topics that will be discussed in the Fit-to-Standard workshop. The consultant can

use the Integration Solution Advisor tool to review the integration requirements and the recommended integration scenarios2.

The consultant should NOT do the following activities before the first Fit-to-Standard workshop:

* Upload customer master data in the Starter system using migration templates. This is not required before the first Fit-to-Standard workshop, as the customer master data is not relevant for the process validation. The consultant should upload the customer master data in the Quality system after the Fit-to- Standard workshop, using the SAP S/4HANA Migration Cockpit3.

* Evaluate the L2 Business-Driven Configuration Questionnaire responses. This is not required before the first Fit-to-Standard workshop, as the L2 Business-Driven Configuration Questionnaire is not available at this stage. The consultant should evaluate the L2 Business-Driven Configuration Questionnaire responses after the Fit-to-Standard workshop, using the SAP Activate Methodology.

NEW QUESTION # 29

What is the correct release code for the second feature delivery in February 2025?

- A. 2025.2
- **B. 2502.2**
- C. 0
- D. 2025.2.2

Answer: B

NEW QUESTION # 30

What does a partner line of business configuration expert reference when identifying business processes to cover in the Fit-to-Standard workshops?

- A. SAP Signavio Journey Modeler
- B. Digital Discovery Assessment
- C. Business Driven Configuration Questionnaire
- **D. SAP Signavio Process Collaboration Hub**

Answer: D

Explanation:

A partner line of business configuration expert plays a crucial role in preparing for Fit-to-Standard workshops, which are pivotal in aligning SAP S/4HANA Cloud Public Edition's capabilities with the customer's business requirements. To identify and select relevant business processes for discussion in these workshops, the expert would reference:

* SAP Signavio Process Collaboration Hub: This tool serves as a comprehensive repository and collaboration platform for business process documentation and best practices. It provides detailed insights into various business processes, including their steps, variations, and best practices, as established in the SAP ecosystem. By referencing the SAP Signavio Process Collaboration Hub, a line of business configuration expert can identify relevant standard business processes that SAP S/4HANA Cloud supports, which should be covered during the Fit-to-Standard workshops. This ensures that the workshops focus on processes critical to the customer's operations and that any gaps or customization needs are identified early in the implementation phase.

NEW QUESTION # 31

Where can you find packaged integration content if there is no SAP Best Practices content available?

- A. SAP Extensibility Explorer
- B. SAP Fiori Apps Reference Library
- **C. SAP Business Accelerator Hub**
- D. SAP BTP Cockpit

Answer: C

Explanation:

If there is no SAP Best Practices content available for a specific integration scenario, you can find packaged integration content in the SAP Business Accelerator Hub. The SAP Business Accelerator Hub is a central repository of integration content for SAP and non-SAP applications, such as APIs, events, integration flows, and adapters. You can browse, discover, and download the integration content that suits your needs and import it into your SAP Integration Suite tenant. You can also use the SAP Business Accelerator Hub to request new integration content or provide feedback on existing content.
