

Cisco 300-710 Exam Questions [2026]-Achieve Highest Scores

P.S. Free & New 300-710 dumps are available on Google Drive shared by Lead2PassExam: https://drive.google.com/open?id=16v9_3Clk6oycnNfPY_j9UCKNIO3E3WwE

It is not hard to know that 300-710 study materials not only have better quality than any other study materials, but also have more protection. On the one hand, we can guarantee that you will pass the exam easily if you learn our 300-710 study materials; on the other hand, once you didn't pass the exam for any reason, we guarantee that your property will not be lost. Our 300-710 Study Materials have a high quality which is mainly reflected in the pass rate. Our product can promise a higher pass rate than other study materials.

How much Securing Networks with Cisco Firepower (300-710 SNCF) Exam Cost

The cost of this exam is USD \$300 but prices for Cisco examinations differ according to level and currency. Also exam vouchers can be used for discounts. To find out the cost of your test, click here and choose your country. To learn about prices and locations, visit the CCIE Lab Exam page

Cisco 300-710 exam is designed to test one's knowledge and skills in securing networks with Cisco Firepower. 300-710 exam is intended for network security engineers and administrators who are responsible for implementing and managing network security policies and procedures using Cisco Firepower Next-Generation Firewall (NGFW), Intrusion Prevention System (IPS), and Advanced Malware Protection (AMP) technologies.

Cisco 300-710 Exam covers various topics, including network security concepts, Firepower Threat Defense architecture, deployment, and management. 300-710 exam also covers topics such as network access control, Firepower Threat Defense policy configuration, intrusion prevention system, and advanced malware protection. With this certification, candidates can demonstrate their expertise in Cisco Firepower solutions and gain recognition for their skills.

100% Pass 2026 Cisco Professional 300-710 Valid Test Syllabus

With 300-710 practice test questions you can not only streamline your exam Cisco 300-710 exam preparation process but also feel confident to pass the challenging 300-710 Exam easily. One of the top features of Cisco 300-710 valid dumps is their availability in different formats.

Cisco Securing Networks with Cisco Firepower Sample Questions (Q197-Q202):

NEW QUESTION # 197

An administrator is creating interface objects to better segment their network but is having trouble adding interfaces to the objects. What is the reason for this failure?

- A. The interfaces are being used for NAT for multiple networks.
- B. The administrator is adding an interface that is in multiple zones.
- C. The administrator is adding interfaces of multiple types.
- **D. The interfaces belong to multiple interface groups.**

Answer: D

Explanation:

<https://www.cisco.com/c/en/us/td/docs/security/firepower/620/configuration/guide/fpmc-config-guide-v62/reusa>

"All interfaces in an interface object must be of the same type: all inline, passive, switched, routed, or ASA FirePOWER. After you create an interface object, you cannot change the type of interfaces it contains."

NEW QUESTION # 198

An organization must be able to ingest NetFlow traffic from their Cisco FTD device to Cisco Stealthwatch for behavioral analysis. What must be configured on the Cisco FTD to meet this requirement?

- A. variable set object for NetFlow
- **B. flexconfig object for NetFlow**
- C. interface object to export NetFlow
- D. security intelligence object for NetFlow

Answer: B

Explanation:

Step 4. Configure the Netflow Destination

In order to configure the Netflow Destination, navigate to Objects > FlexConfig > FlexConfig Objects

<https://www.cisco.com/c/en/us/support/docs/quality-of-service-qos/netflow/216126-configure-netflow-secure-event-logging-o.html#anc14>

NEW QUESTION # 199

A network engineer is deploying a pair of Cisco Secure Firewall Threat Defense devices managed by Cisco Secure Firewall Management Center for High Availability Internet access is a high priority for the business and therefore they have invested in internet circuits from two different ISPs. The requirement from the customer is that Internet access must be available to their user's oven if one of the ISPs is down. Which two features must be deployed to achieve this requirement? (Choose two.)

- A. Redundant interfaces
- B. EtherChannel interfaces
- **C. Route Tracking**
- D. BGP
- **E. SLA Monitor**

Answer: C,E

Explanation:

To ensure high availability of internet access when deploying a pair of Cisco Secure Firewall Threat Defense (FTD) devices managed by Cisco Secure Firewall Management Center (FMC), the following features must be deployed:

* Route Tracking: This feature monitors the reachability of a specified target (such as an external IP address) through the configured routes. If the route to the target is lost, the FTD can dynamically adjust the routing to use an alternate path, ensuring continuous internet access.

* SLA Monitor: Service Level Agreement (SLA) monitoring works alongside route tracking to continuously verify the status and performance of the internet links. If the SLA for one of the ISP links fails (indicating the link is down or underperforming), the FTD can switch traffic to the secondary ISP link.

Steps to configure:

* In FMC, navigate to Devices > Device Management.

* Select the FTD device and configure route tracking to monitor the ISP links.

* Configure SLA monitors to continuously check the health and performance of the internet circuits.

These configurations ensure that internet access remains available to users even if one of the ISPs goes down.

NEW QUESTION # 200

A network engineer implements a new Cisco Firepower device on the network to take advantage of its intrusion detection functionality. There is a requirement to analyze the traffic going across the device, alert on any malicious traffic, and appear as a bump in the wire. How should this be implemented?

- A. Configure a bridge group in transparent mode.
- B. Enable routing on the Cisco Firepower
- C. Specify the BVI IP address as the default gateway for connected devices.
- D. Add an IP address to the physical Cisco Firepower interfaces.

Answer: A

Explanation:

Traditionally, a firewall is a routed hop and acts as a default gateway for hosts that connect to one of its screened subnets. A transparent firewall, on the other hand, is a Layer 2 firewall that acts like a "bump in the wire," or a "stealth firewall," and is not seen as a router hop to connected devices. However, like any other firewall, access control between interfaces is controlled, and all of the usual firewall checks are in place. Layer 2 connectivity is achieved by using a "bridge group" where you group together the inside and outside interfaces for a network, and the ASA uses bridging techniques to pass traffic between the interfaces. Each bridge group includes a Bridge Virtual Interface (BVI) to which you assign an IP address on the network. You can have multiple bridge groups for multiple networks. In transparent mode, these bridge groups cannot communicate with each other.

NEW QUESTION # 201

The event dashboard within the Cisco FMC has been inundated with low priority intrusion drop events, which are overshadowing high priority events. An engineer has been tasked with reviewing the policies and reducing the low priority events. Which action should be configured to accomplish this task?

- A. generate events
- B. drop packet
- C. drop connection
- D. drop and generate

Answer: D

NEW QUESTION # 202

.....

Do you want to pass 300-710 exam and get the related certification within the minimum time and effort? If you would like to give me a positive answer, you really should keep a close eye on our website since you can find the best study material in here--our 300-710 training materials. We have helped millions of thousands of candidates to prepare for the 300-710 Exam and all of them have got a fruitful outcome, I wish you could be one of the beneficiaries of our training materials in the near future. The advantages of our 300-710 test prep are more than you can imagine.
