In order to meet the demand of most of the IT employees, BraindumpQuiz's IT experts team use their experience and knowledge to study the past few years Cisco certification 300-610 exam questions. Finally, BraindumpQuiz's latest Cisco 300-610 simulation test, exercise questions and answers have come out. Our Cisco 300-610 simulation test questions have 95% similarity answers with real exam questions and answers, which can help you 100% pass the exam. If you do not pass the exam, BraindumpQuiz will full refund to you. You can also free online download the part of BraindumpQuiz's Cisco Certification 300-610 Exam practice questions and answers as a try. After your understanding of our reliability, I believe you will quickly add BraindumpQuiz's products to your cart. BraindumpQuiz will achieve your dream.

Cisco 300-610 exam is a comprehensive test that covers a wide range of topics related to data center infrastructure design. 300-610 exam focuses on the latest Cisco technologies, including Cisco ACI, Cisco UCS, and Cisco NX-OS. 300-610 exam also covers the latest design methodologies, including automation and orchestration, which are essential for designing modern data centers. Passing the Cisco 300-610 Exam demonstrates that the candidate has the necessary skills and knowledge to design and implement complex data center infrastructure solutions using Cisco technologies.

300-610 Accurate Prep Material, Latest 300-610 Exam Simulator

Forget your daydream! Forget living in cloud-cuckoo-land! Just be down-to-earth to prepare for an IT certification. Cisco 300-610 latest exam sample questions on our website are free to download for your reference. If you still want to find a valid dump, our website will be your beginning. Our Cisco 300-610 Latest Exam sample questions are a small part of our real products. If you think the free version is excellent, you can purchase our complete version.

Cisco 300-610 Certification is an excellent way for IT professionals to enhance their skills and advance their careers in the data center industry. Designing Cisco Data Center Infrastructure certification is recognized globally and is highly valued by employers. It is a challenging certification, but those who pass the exam will have a deep understanding of Cisco data center technologies and will be well-equipped to design and implement complex solutions.

Cisco Designing Cisco Data Center Infrastructure Sample Questions (Q216-Q221):

NEW QUESTION # 216

What is an advantage of Cisco HyperFlex Edge as compared to Cisco HyperFlex Standard Clusters?

- A. Cisco UCS 5108 Blade Server chassis provides SEEPRM connectivity to solve split-brain scenarios.
- B. Cisco HyperFlex Edge provides native container support through the KVM hypervisor.
- **C. Cisco Intersight automatically creates an invisible cloud witness.**
- D. Cisco UCS Manager provides service profile portability across nodes.

Answer: C

NEW QUESTION # 217

A company data center requires a new disaster recovery solution to host critical services. The solution can sustain several hours of data loss because the services are routinely backed up to an offsite location. Also, the disaster recovery solution must provide 24-hour availability. Due to the strict policy requirements, the company wants to retain complete control of when the failover process occurs. Which solution meets these requirements?

- A. warm standby
- **B. cold standby**
- C. active/active
- D. hot standby

Answer: B

NEW QUESTION # 218

An engineer must design a solution based on Cisco Nexus 7709 Switches. The solution must connect test and development network segments and separate the enterprise applications from the production network. The network security team requires routing instances and the IP stack to be completely separated from each other and for traffic between the environments to undergo a deep packet inspection. The development team also requests the ability to allocate additional physical interfaces from the Cisco Nexus 7709 device in each environment.

Which solution meets these requirements?

- **A. 1) Create a separate VRF for the testing and development environments.
2) Control reachability by using firewall access policies.**
- B. 1) Assign a separate VDC for the testing and development environments.
2. Place a firewall between the VDCs.
- C. 1) Create a VRF for the testing and development environments.
2) Use ACLs to control traffic between the two environments.
- D. 1) Enable new routing instances for the testing and development environments in the same VDC.
2) Control reachability by using firewall access policies.

Answer: A

NEW QUESTION # 219

Which two statements describe Ethernet switching mode on Cisco UCS 6100 Series Fabric Interconnects? (Choose two.)

- **A. STP runs on the uplink ports of each VLAN, as defined by PVSTP+.**
- B. STP runs on the uplink ports of each VLAN, as defined by MSTP.
- C. The STP parameter configuration is supported.
- **D. The STP parameter configuration is unsupported.**
- E. STP runs on the server ports.

Answer: A,D

Explanation:

NEW QUESTION # 220

Which approach splits a pair of clustered fabric interconnects into two standalone devices?

- A. Run the connect local-management command on each fabric interconnect.
- **B. Erase the configuration of both fabric interconnects.**
- C. Unplug the Layer 1 and Layer 2 interfaces between the devices.
- D. Run the disable fips-mode command on each fabric interconnect.

Answer: B

Explanation:

There is no way to convert back cluster into two standalone.
