Many people worry about buying electronic products on Internet, like our GH-100 preparation quiz, we must emphasize that our GH-100 simulating materials are absolutely safe without viruses, if there is any doubt about this after the pre-sale, we provide remote online guidance installation of our GH-100 Exam Practice. It is worth noticing that some people who do not use professional anti-virus software will mistakenly report the virus.

Microsoft GitHub Administration Sample Questions (Q27-Q32):

NEW QUESTION # 27

Which factor affects GitHub Actions pricing for GitHub-hosted runners on GitHub Enterprise Cloud?

- A. Total number of repositories using Actions
- B. Number of contributors to the repository Explanation:Incorrect. Contributor count does not impact billing for Actions
- C. Operating system used in the runner environment
- D. Number of workflows defined in .github/workflows/

Answer: C

Explanation:

GitHub Actions billing for GitHub-hosted runners is based on the number of minutes consumed and the operating system of the runner - Linux, Windows, and macOS each have different per-minute rates.

NEW QUESTION # 28

Which of the following is a benefit of creating a new GitHub organization?

- A. Clear separation of reggs, projects, teams, billing, and organization-specific policies.
- B. Automatic inheritance of policies from other organizations.
- C. Reduced administrative overhead.
- D. Simplified collaboration across all organizations.

Answer: A

Explanation:

Creating a new organization gives you a dedicated container for your shared work, letting you isolate repositories, projects, teams, billing settings, and policy configurations on an organization-by-organization basis.

NEW QUESTION # 29

What additional capability does secret scanning offer for private repositories on GitHub Enterprise Cloud?

- A. Disables any code that contains a secret.
- B. Allows custom pattern definitions for internal secret formats.
- C. Rewrites history to remove secrets.
- D. Revokes GitHub access tokens automatically.

Answer: B

Explanation:

Secret scanning in private repositories on GitHub Enterprise Cloud lets you define and use custom regular-expression patterns - so you can detect internal or proprietary secret formats beyond the default partner-provided types.

NEW QUESTION # 30

What benefit does GitHub Advanced Security provide?

- A. helps developers improve and maintain the security and quality of code
- B. helps enterprise administrators improve and maintain network security for their GitHub Enterprise Server instances
- C. helps organization administrators manage security tokens
- D. helps organization administrators analyze and configure permissions to the least privilege required

Answer: A

Explanation:

GitHub Advanced Security equips developers with built-in code scanning (CodeQL), secret scanning, dependency review, and other AppSec tools - helping them find, fix, and prevent security vulnerabilities while maintaining code quality.

NEW QUESTION # 31

You have subscribed to GitHub Premium Support, and you need to submit a support ticket. GitHub Premium Support can help you with:

- A. setting up hardware.
- B. installing GitHub Enterprise Server.
- C. writing scripts.
- D. integrating with third-party applications.

Answer: B

Explanation:

GitHub Premium Support includes assistance with installing and using GitHub Enterprise Server, ensuring your deployment is configured correctly and any installation issues are resolved.
