

Web-based C_BCBTP_2502 Practice Test With Dumps

BTW, DOWNLOAD part of GetValidTest C_BCBTP_2502 dumps from Cloud Storage: <https://drive.google.com/open?id=1jCu7Zsfjtk7KCIvAypq7KpWhii6hm8ux>

Our C_BCBTP_2502 guide materials are constantly updated. In order to ensure that you can use the latest version as quickly as possible, our professional experts check the C_BCBTP_2502 exam questions every day for updates. If there is an update system, it will be automatically sent to you. The C_BCBTP_2502 learning prep you use is definitely the latest information on the market without doubt. And you can enjoy free updates for one year after purchase.

Many people dream about occupying a prominent position in the society and being successful in their career and social circle. Thus owning a valuable certificate is of paramount importance to them and passing the test C_BCBTP_2502 certification can help them realize their goals. If you are one of them buying our C_BCBTP_2502 Exam Prep will help you pass the exam successfully and easily. Our C_BCBTP_2502 guide torrent provides free download and tryout before the purchase and our purchase procedures are safe.

100% Pass 2026 High-quality C_BCBTP_2502: SAP Certified Associate - Positioning SAP Business Technology Platform as part of SAP Business Suite

Exam Test

When you first contacted us with C_BCBTP_2502 quiz torrent, you may be confused about our C_BCBTP_2502 exam question and would like to learn more about our products to confirm our claims. We have a trial version for you to experience. If you choose to purchase our C_BCBTP_2502 quiz torrent, you will have the right to get the update system and the update system is free of charge. We do not charge any additional fees. Once our C_BCBTP_2502 Learning Materials are updated, we will automatically send you the latest information about our C_BCBTP_2502 exam question. We assure you that our company will provide customers with a sustainable update system.

SAP Certified Associate - Positioning SAP Business Technology Platform as part of SAP Business Suite Sample Questions (Q22-Q27):

NEW QUESTION # 22

Which of the following are key products of SAP Business Technology Platform (SAP BTP)? (Choose two).

- A. SAP HANA Cloud
- B. SAP Ariba
- C. SAP Integration Suite
- D. SAP SuccessFactors

Answer: A,C

Explanation:

SAP Business Technology Platform (SAP BTP) is organized into four primary functional pillars: Database and Data Management, Analytics, Application Development and Integration, and Intelligent Technologies.

SAP HANA Cloud serves as the foundation of the Database and Data Management pillar, providing a single, integrated powerhouse for all enterprise data. It offers the speed of in-memory processing combined with the scalability of the cloud, allowing businesses to manage large volumes of data while providing a "single source of truth." On the other hand, SAP Integration Suite is the cornerstone of the Integration pillar. It is an integration platform-as-a-service (iPaaS) that allows organizations to seamlessly connect SAP and non-SAP applications, whether they reside on-premise or in the cloud. It provides pre-built content and connectors that significantly reduce the complexity of landscape orchestration. In contrast, SAP Ariba and SAP SuccessFactors are specialized Software-as-a-Service (SaaS) applications. While they are part of the broader SAP ecosystem and often run on or integrate via BTP, they are considered line-of-business (LoB) solutions rather than core components of the technology platform itself. Understanding this distinction is vital for positioning BTP as the underlying "glue" that enables the "Intelligent Enterprise" strategy by providing the technical tools necessary to extend and integrate these LoB applications.

NEW QUESTION # 23

Which SAP BTP service allows businesses to create low-code/no-code applications?

- A. SAP Build Apps
- B. SAP Business Network
- C. SAP Concur
- D. SAP BusinessObjects

Answer: A

Explanation:

To accelerate digital transformation, SAP has introduced the SAP Build portfolio on BTP, which is specifically designed to democratize application development. SAP Build Apps (formerly AppGyver) is the primary service within this portfolio that enables the creation of enterprise-grade applications using a no-code visual environment. This service allows users to build sophisticated user interfaces for mobile and web applications by simply dragging and dropping components. It also includes a visual logic editor, which eliminates the need to write traditional code for defining how the application behaves.

The strategic importance of SAP Build Apps within the SAP Business Technology Platform is its ability to reduce the backlog of IT departments. By allowing business experts-who understand the process but may not know how to code-to build their own solutions, SAP ensures that innovation can happen at the "front lines" of the business. These apps can easily be connected to SAP S/4HANA or other backend systems through secure APIs, ensuring that data integrity is maintained. This contrasts with tools like SAP BusinessObjects, which is focused on business intelligence and reporting, or SAP Concur, which is a specific SaaS application for travel and expense management. SAP Build Apps is a foundational service for positioning BTP as an agile platform for rapid extension and innovation.

NEW QUESTION # 24

Which SAP BTP capability enables businesses to deploy AI-driven chatbots?

- A. SAP Business Process Intelligence
- **B. SAP Conversational AI**
- C. SAP Event Mesh
- D. SAP Fiori

Answer: B

Explanation:

To improve user experience and automate customer or employee interactions, SAP BTP offers SAP Conversational AI. This service provides an end-to-end platform for building, training, and monitoring intelligent chatbots (digital assistants). These chatbots utilize Natural Language Processing (NLP) to understand human language, identify user intent, and extract relevant entities from a conversation. Unlike simple rule-based scripts, these AI-driven bots can learn over time and provide a more intuitive, human-like interaction.

In the context of the SAP Business Suite, SAP Conversational AI is positioned as a powerful tool for scaling business operations without increasing headcount. For example, a chatbot can be integrated into SAP S/4HANA to help users check invoice statuses or into SAP SuccessFactors to answer common HR policy questions. This capability shifts the burden of routine inquiries away from human agents to automated systems that are available 24/7. While SAP Fiori provides the visual design language and SAP Event Mesh handles asynchronous messaging between systems, SAP Conversational AI is the specific component responsible for the "intelligence" and "interaction" layers of the platform, enabling a more conversational and efficient enterprise environment.

NEW QUESTION # 25

How does SAP LeanIX support IT landscape management when integrated with SAP BTP?

- A. By enforcing manual IT infrastructure tracking.
- B. By preventing real-time integration with business processes.
- C. By restricting governance of IT landscapes.
- **D. By providing enterprise architecture visualization and analysis.**

Answer: D

Explanation:

As organizations adopt SAP BTP to build and extend their applications, their IT landscapes can become increasingly complex. SAP LeanIX (now a core part of SAP's enterprise architecture strategy) supports management by providing comprehensive visualization and analysis of the enterprise architecture. When integrated with SAP BTP, LeanIX allows IT leaders to see exactly how different BTP services, cloud applications, and on-premise systems are interconnected. This "map" of the IT landscape is essential for identifying redundant applications, managing technical debt, and ensuring that the IT strategy aligns with business goals.

The positioning of LeanIX alongside BTP is crucial for "Transformation Management." During a move to SAP S/4HANA or a transition to the cloud, LeanIX helps organizations plan their roadmap by showing the impact of changes on the existing architecture. It provides data-driven insights into which applications are critical, which are obsolete, and where there are gaps in security or compliance. By providing this transparency, LeanIX empowers architects to make informed decisions about where to deploy new BTP services. This prevents the "sprawl" of unmanaged cloud services and ensures that the evolution of the SAP Business Suite is organized, cost-effective, and fully aligned with the broader digital transformation objectives of the company.

NEW QUESTION # 26

How does SAP BTP support hybrid cloud strategies?

- A. By restricting enterprises to a single cloud vendor.
- B. By eliminating the need for cloud-based analytics.
- **C. By allowing seamless integration between on-premise and cloud systems.**
- D. By enforcing cloud-only solutions without on-premise support.

Answer: C

Explanation:

Most large enterprises do not operate solely in the cloud; they maintain a "hybrid" environment consisting of legacy on-premise systems (like SAP ERP 6.0) and modern cloud applications (like SAP S/4HANA Cloud).

SAP BTP supports hybrid cloud strategies by acting as the bridge between these two worlds. Through the SAP Connectivity Service and the Cloud Connector, BTP establishes a secure, encrypted tunnel that allows cloud-based services to access on-premise data and processes without requiring complex VPN setups or opening vulnerable firewall ports.

This capability is essential for businesses that are mid-transition in their digital transformation journey. It allows them to keep their core "system of record" on-premise for compliance or technical reasons while still taking advantage of cloud-native innovations on BTP, such as advanced analytics, AI, and mobile extensions.

By positioning BTP as a hybrid-ready platform, SAP ensures that customers can modernize at their own pace.

This "side-by-side" extensibility model ensures that the on-premise core remains clean and stable, while the cloud layer provides the agility needed to respond to market changes. This flexibility is a cornerstone of the SAP Business Suite's value proposition, offering a path to the cloud that respects the existing investments of the enterprise.

NEW QUESTION # 27

.....

Our company has taken a lot of measures to ensure the quality of our C_BCBTP_2502 preparation materials. It is really difficult for us to hire a professional team, regularly investigate market conditions, and constantly update our C_BCBTP_2502 exam questions. But we persisted for so many years. And our quality of our C_BCBTP_2502 study braindumps are praised by all of our worthy customers. And you can always get the most updated and latest C_BCBTP_2502 training guide if you buy them.
