We have free demos of our ZDTA study materials for your reference, as in the following, you can download which ZDTA exam materials demo you like and make a choice. We have three versions of our ZDTA exam guide, so we have according three versions of free demos. Therefore, if you really have some interests in our ZDTA Study Materials, then trust our professionalism, we promise a full refund if you fail exam.

Zscaler ZDTA Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Access Control Services: This area assesses Security Operations Specialists on implementing access control mechanisms including cloud app control, URL filtering, file type controls, bandwidth controls, and segmentation. It also covers Microsoft 365 policies, private application access strategies, and firewall configurations to protect enterprise resources.
Topic 2	<ul style="list-style-type: none">Risk Management: This domain measures skills of Risk Managers and Security Architects in using Zscaler's comprehensive risk management suite. Candidates are expected to understand risk capabilities, dashboards, asset and financial risk insights, vulnerability management, deception tactics, identity protection, and breach prediction analytics.
Topic 3	<ul style="list-style-type: none">This section assesses Data Protection Officers on techniques to secure data across motion, SaaS, cloud, and endpoints using Zscaler's AI-driven data discovery and data protection technologies. It involves securing BYOD environments and understanding risk management to protect sensitive information.

Topic 4	<ul style="list-style-type: none"> • Zscaler Zero Trust Automation: This part measures Automation Engineers on their ability to utilize Zscaler APIs, including the One API framework, for automating zero trust security functions and integrating with broader enterprise security and orchestration tools.
Topic 5	<ul style="list-style-type: none"> • Identity Services: This section of the exam measures skills of Identity and Access Management Engineers and covers foundational identity services including authentication and authorization protocols such as SAML, SCIM, and OIDC. Candidates should understand identity administration tasks and how to manage policies and audit logs within the Zscaler platform.

Your eligibility of getting a high standard of career situation will be improved if you can pass the exam, and our ZDTA practice materials are your most reliable ways to get it. You can feel assertive about your exam with our 100 guaranteed professional ZDTA practice materials, let along various opportunities like getting promotion, being respected by surrounding people on your profession's perspective. All those beneficial outcomes come from your decision of our ZDTA practice materials. We are willing to be your side offering whatever you need compared to other exam materials that malfunctioning in the market.

Zscaler Digital Transformation Administrator Sample Questions (Q75-Q80):

NEW QUESTION # 75

The Security Alerts section of the Alerts dashboard has a graph showing what information?

- A. Top 5 Viruses by Region
- **B. Top 5 Threats by Systems Impacted**
- C. Top 5 Malware Programs Detected
- D. Top 5 Unified Threat Yara Options

Answer: B

Explanation:

The graph in the Security Alerts section displays the Top 5 Threats by Systems Impacted, highlighting which threats have affected the most endpoints over the selected time period.

NEW QUESTION # 76

Can URL Filtering make use of Cloud Browser Isolation?

- **A. Yes. Isolate is a possible Action for URL Filtering.**
- B. No. Cloud Browser Isolation is a separate platform.
- C. Yes. After blocking access to a site, the user can manually switch on isolation.
- D. No. Cloud Browser Isolation is only a feature of Advanced Threat Defense.

Answer: A

Explanation:

Yes, URL Filtering can make use of Cloud Browser Isolation. Specifically, "Isolate" is an available action in URL Filtering policies that enables users to access potentially risky or untrusted websites in an isolated environment, preventing any malicious content from reaching the user's device.

The study guide explains that integrating Cloud Browser Isolation into URL Filtering enhances security by isolating risky browsing activities directly from policy enforcement points.

NEW QUESTION # 77

An organization has more than one ZIA instance, each on different clouds. The organization is using the same login domain for both and upon login users are given this menu in ZCC asking which cloud they would like to join. What steps could an Administrator take

to avoid having this menu appear?

- A. Create only one SAML integration with the desired ZIA instance.
- B. Customize an MSI version of the ZCC file specifying the USERDOMAIN variable.
- C. Federate the login domain between two different IDP instances.
- **D. Customize an MSI version of the ZCC file specifying the CLOUDNAME variable.**

Answer: D

Explanation:

To avoid prompting users with a cloud selection menu in the Zscaler Client Connector (ZCC), administrators should customize the MSI installation package with the CLOUDNAME parameter. This setting ensures the ZCC automatically connects to the correct ZIA cloud instance without user intervention. The CLOUDNAME corresponds to the designated cloud name for the organization's ZIA tenant, effectively bypassing the prompt.

This is outlined under Zscaler's deployment and configuration instructions for ZCC.

NEW QUESTION # 78

Which of the following are correct request methods when configuring a URL filtering rule with a Caution action?

- **A. Connect, Get, Head**
- B. Options, Delete, Put
- C. Get, Delete, Trace
- D. Connect, Post, Put

Answer: A

Explanation:

When you configure a URL Filtering rule with the Caution action, the only HTTP methods you can select for that rule are CONNECT, GET, and HEAD.

NEW QUESTION # 79

How does Zscaler Risk360 quantify risk?

- A. A risk score is computed for each of the four stages of breach.
- B. Time to mitigate each identified risk is totaled, averaged, and tracked to show ongoing trends.
- **C. A risk score is computed based on the number of remediations needed compared to the industry peer average.**
- D. The number of risk events is totaled by location and combined.

Answer: C

Explanation:

Zscaler Risk360 quantifies risk by computing a risk score that is based on the number of remediations needed in comparison to the industry peer average. This approach allows organizations to understand their relative security posture by evaluating how many issues require remediation and benchmarking that against peers in the industry. This methodology enables prioritized risk management and provides context around the urgency and scale of remediation activities necessary to reduce risk.

Unlike simply counting risk events or focusing on time to mitigate, Risk360 uses this comparative remediation-based scoring to give a comprehensive view of risk. It does not compute separate scores for each of the four breach stages but rather aggregates remediation efforts and benchmarks them to industry standards.

This is confirmed by the study guide's explanation of Risk360's scoring method, highlighting the use of remediation counts compared to peers as the basis for risk scoring.

NEW QUESTION # 80

.....

Pass your ZDTA exam certification with ZDTA reliable test. The ITCertMagic ZDTA practice material can guarantee you success at your first try. When you choose ZDTA updated dumps, you will enjoy instant downloads and get your ZDTA study files the moment you have paid for them. In addition, the update is frequent so that you can get the ZDTA latest information for preparation.
