During your practice process, the C_WME_2506 test questions would be absorbed, which is time-saving and high-efficient. Concentrated all our energies on the study C_WME_2506 learning guide we never change the goal of helping candidates pass the exam. Our C_WME_2506 test questions' quality is guaranteed by our experts' hard work. So what are you waiting for? Just choose our C_WME_2506 exam materials, and you won't be regret.

SAP C_WME_2506 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Starting your Digital Adoption Journey: WalkMe Fundamentals: This section of the exam measures the skills of SAP project managers and covers the foundational concepts of digital adoption within SAP environments using WalkMe. Candidates are expected to understand the value of digital adoption platforms, the basic components of WalkMe, and how these tools align with business goals. The section emphasizes knowledge of the user experience within SAP and the ability to identify opportunities for improving digital workflows through in-app guidance and automation.

Topic 2	<ul style="list-style-type: none"> Advancing your Skills in Building WalkMe Solutions: This section of the exam tests the advanced competencies of functional and business analysts in designing more complex and customized WalkMe solutions within SAP platforms. It requires a deeper understanding of user segmentation, advanced rules and triggers, performance optimization, and the use of analytics to refine user experiences. Candidates are expected to demonstrate their ability to design scalable and impactful guidance that aligns with SAP business processes and drives user adoption across the enterprise.
Topic 3	<ul style="list-style-type: none"> Getting Started with Building WalkMe Solutions: This section of the exam evaluates the capabilities of WalkMe implementers and focuses on the practical aspects of creating and configuring WalkMe solutions. It includes understanding the WalkMe Editor, planning solution flows, creating Smart Walk-Thrus, Launchers, and ShoutOuts, and managing end-user guidance effectively. Candidates should be comfortable building initial WalkMe experiences that improve SAP usability and provide contextual help for users navigating SAP applications.

SAP Certified Associate - WalkMe Digital Adoption Consultant Sample Questions (Q17-Q22):

NEW QUESTION # 17

You have just created a few new pieces of content. Now, you are ready to view how they work together and see how they will look from the end user experience before you publish. Which feature will be best to do this?

- A. Preview
- B. Publish Settings
- C. Play multiple items
- D. Play

Answer: A

Explanation:

The Preview feature in the WalkMe Editor allows Builders to simulate the end-user experience for multiple pieces of content before publishing. It shows how content (e.g., Smart Walk-Thrus, SmartTips, ShoutOuts) appears and interacts on the page, ensuring they work together seamlessly and look as intended from the user's perspective.

The other options are incorrect:

- * Play multiple items(A) is not a standard WalkMe feature.
- * Play(C) typically refers to testing a single Smart Walk-Thru, not multiple content types.
- * Publish Settings(D) configure deployment options, not preview functionality.

Extract from Official WalkMe Documentation:

Per the WalkMe Editor User Guide (SAP WalkMe Digital Adoption Consultant Study Guide, Section 1.4:

Quality Assurance):

"The Preview feature enables Builders to test multiple pieces of content together, simulating the end-user experience to verify appearance and interactions before publishing." The course Getting Started with Building WalkMe Solutions explains:

"Use Preview in the Editor to see how new content will look and function for end users, allowing you to test combinations of content without publishing." Option B, Preview, is the best feature for this purpose.

Course: Getting Started with Building WalkMe Solutions, Module 5: Testing Content.

NEW QUESTION # 18

Which of the following options would be appropriate to create a Segment in the Segmentation center? Note: There are 3 correct answers to this question.

- A. Geographic location
- B. User Role
- C. Autoplay on 1 page
- D. IP Address
- E. Department

Answer: B,D,E

NEW QUESTION # 19

Which is the most preferred Unique User ID setting and the one you should explore first for UUID setup?

- A. WalkMe ID
- **B. Variable**
- C. jQuery
- D. Cookie

Answer: B

NEW QUESTION # 20

You're getting ready to plan your next build. What data/section in Insights can you use to help you Capacitor determine which content your end users may need you to build next?

- A. Total Menu Opens
- B. Activity Log
- C. Text and Multilanguage
- **D. What Users Are Searching For**

Answer: D

Explanation:

The WalkMe Insights platform is designed to provide actionable data to optimize digital adoption by identifying user behavior and content needs. The "What Users Are Searching For" section in Insights specifically tracks search terms entered by end users in the WalkMe Menu, revealing what content or guidance they are seeking. This data is critical for planning future builds because it highlights gaps in existing content or areas where users need additional support. For example, if many users search for "profile settings" but find no relevant content, this indicates a need to build guidance for that process.

In the context of the question, "What Users Are Searching For" directly informs the WalkMe Builder about user pain points and content demands, unlike the other options:

* Total Menu Opens only shows how often the WalkMe Menu is accessed, not what users are looking for.

* Activity Log provides a record of user interactions with WalkMe content but doesn't specifically highlight search behavior or content needs.

* Text and Multilanguage relates to content localization settings, not user behavior or content planning.

Extract from Official WalkMe Documentation:

According to the WalkMe Insights User Guide (SAP WalkMe Digital Adoption Consultant Study Guide, Section 3.2: Analytics and Reporting):

"The 'What Users Are Searching For' report in Insights displays the search terms entered by end-users in the WalkMe Menu, along with metrics such as the percentage of searches resulting in no action. This report helps Builders identify content gaps and prioritize new builds based on user demand." Additionally, the course *Advancing Your Skills in Building WalkMe Solutions* emphasizes:

"Leveraging Insights data, particularly the 'What Users Are Searching For' section, enables Builders to align content creation with user needs, ensuring proactive digital adoption support." This confirms that option C is the correct choice, as it directly correlates with determining future content needs based on user search behavior.

NEW QUESTION # 21

You are analyzing your Smart Walk-Thru steps and see significant drop-off following a Wait For step.

What should you investigate to try to get to the root of the issue?

- **A. Look at your Wait For condition rules.**
- B. Update your step triggers.
- C. Remove the step completely.
- D. Look at your Smart Walk-Thru step initiators.

Answer: A

NEW QUESTION # 22

.....
